REPORT

OF THE

SECRETARY OF INTERNAL AFFAIRS.

COMMUNICATION.

DEPARTMENT OF INTERNAL AFFAIRS,
HARRISBURG, *December 1, 1887.*

To His Excellency JAMES A. BEAVER,
Governor of the Commonwealth:

Complying with the requirements of the Constitution, I have the honor to present to you herewith, for transmission to the General Assembly, reports of this Department for the year ending November 30, 1887, as follows:

Part I. Land Office.
State Weather Service.
Vital Statistics.
Part II. Assessments.

Very respectfully,
Your obedient servant,
THOS. J. STEWART,
Secretary of Internal Affairs.

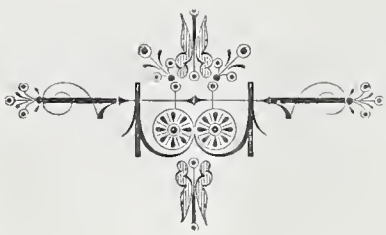
181275

The Department of Internal Affairs under present organization consists of six Bureaus, as follows:

1. *Land Office.*
2. *Vital Statistics.*
3. *State Weather Service.*
4. *Assessments.*
5. *Industrial Statistics.*
6. *Railroads, Canals, Telegraphs and Telephones.*

A record of the business of the Department is published in four parts: the first four Bureaus being included in one volume, and designated Parts I and II, while the Bureaus of Industrial Statistics and Railroads, &c., are each published in separate volumes, and designated respectively Parts III and IV.

PART I.—LAND OFFICE. STATE WEATHER SERVICE. VITAL STATISTICS.



REPORT.

DEPARTMENT OF INTERNAL AFFAIRS.
HARRISBURG, *December 1, 1887.*

To His Excellency JAMES A. BEAVER,
Governor of Pennsylvania:

As required by law, I submit herewith a detailed report of the business of the Department within the year ending on the 30th day of November, 1887. I also submit suggestions as to needed legislation, which I trust may receive your approval.

Respectfully submitted.

THOS. J. STEWART,
Secretary of Internal Affairs.

Money Received.

During the fiscal year ending with the 30th day of November, 1887, there was received in this Department, and paid into the State Treasury the sum of $5,920 94. Of this amount, $2,746 31 was for purchase money for lands and interest thereon; $779 91 for warrant and patent fees; $444 00, for fees for certificates of service and certificates of qualification issued to anthracite mine foremen, and $1,950 72, for fees received for copies of warrants, surveys, patents and miscellaneous documents, as will appear in the following detailed statement:

STATEMENT

Showing the number of warrants, patents and certificates to the State Treasurer, issued from December 1, 1886, to November 30, 1887, both days included, with the amount of purchase money and fees for warrants, patents, etc.; also, copying fees received during the same period:

MONTH AND YEAR.	New warrants.	Patents.	Excess tickets.	Certificates to State Treasurer.	Purchase money.	Warrant and patent fees.	Fees for certificates to mine foremen.	Copying fees.	Totals.

Mine foremen's certificate fees,	444 00	
Copying fees,	1,950 72	
		3,174 63
Total amount received,		$5,920 94

RESUME OF BUSINESS OF THE DEPARTMENT FOR THE YEAR ENDING NOVEMBER 30, 1887.

Letters Received and Answered.

4,030 relative to land office business.
2,000 relative to industrial statistics.
518 relative to railroads and assessments.

Blanks, Reports, Certificates and Circulars Forwarded, and Certificates Issued and Recorded.

2,198 relative to land-office business.
4,000 relative to industrial statistics.
2,500 relative to railroads and assessments.
148 mine inspectors' certificates issued.
2,500 relative to vital statistics.
148 mine inspectors' certificates recorded.
33 certificates to Observers Pennsylvania State Weather Service issued.
33 certificates Weather Service recorded.

Land Office.

1,860 copies of original papers certified and issued under the seal of the Department.
5,085 searches for warrants and surveys, required for patenting, copying and connections, and refiling the same.
2,258 entries in fee-book, transcribing the same *quarterly* for settlement with the Auditor General.
4 quarterly returns to Auditor General.
50 applications for warrants received and entered on register.

*Cash for four patents reported in 1886.

23 applications for patents received and entered on register.
50 applications for warrants endorsed and filed.
23 applications for patents endorsed and filed.
53 tickets issued for warrants.
12 tickets issued for excess.
55 tickets issued for patents.
43 new warrants issued, recorded, registered, numbered and filed.
43 new warrants issued and directed to county surveyors for execution.
33 new surveys from county surveyors, calculated and compared with warrants.
33 new surveys entered on surveyors' list of returns, numbered and filed.
7 new surveys containing an excess of land calculated, compared with warrants and placed in excess files.
6 new surveys calculated, compared with warrants and returned to county surveyors for correction.
55 entries on warrants or applications of the time of patenting.
55 endorsements on surveys of the time of patenting.
55 entries in warrant registers of the time of patenting.
106 calculations of sums due.
106 certificates of sums due directed to State Treasurer.
106 State Treasurer's receipts entered and delivered to the Auditor General.
106 vouchers written and entered in fee-book.
106 vouchers numbered and filed.
55 patents written, recorded and indexed, embracing 7,844 acres of land.
25 satisfaction of liens entered on land lien dockets.
25 certificates of liquidation of liens made out and forwarded to the prothonotaries of the several counties, under the act of the 4th day of April, 1868.
14 caveats entered, recorded on caveat-book and filed.
9 citations issued and noted on caveat book.
94 surveys copied and certified under the act of 16th day of February, 1833.
12 monthly statements delivered to the Auditor General.

Vital Statistics.

In the records of marriages the names of 8,520 men, with their occupation, ages, residence and name of counties where the license was issued, have been recorded.

In the records of marriages the names of 8,520 women, with their ages, residence and name of counties where the license was issued, have been recorded.

THE LAND OFFICE BUREAU.

Among the records of this Bureau are the following:

1. The records of the first title acquired by the proprietaries and the Commonwealth to all the lands within the limits of the State.

2. The records of all grants and conveyances from the proprietaries and the Commonwealth, which include the original application for the warrant to survey the land applied for, the warrant directed to the deputy surveyor, the return of survey by the deputy surveyor, the Surveyor General's return to the Secretary of the Land Office for patenting and the records of patents granted by the Commonwealth.

3. The books of accounts showing the financial transactions of the proprietaries and the State with the purchasers of land, from the time the public domain was offered for sale down to the present time, including the lien dockets which indicate the amount of purchase money and fees remaining charged against the lands applied for.

4. The maps, drafts, reports and other papers relating to the surveys of the State and county lines, State and turnpike roads, railroads, canals and other public improvements.

5. The orders, decrees, commissions and reports of commissioners relative to the running, establishing and marking the boundary lines between the Province of Pennsylvania and the Provinces adjoining; also all the papers bearing upon the adjustment of the boundary lines between this Commonwealth and States of New York, Ohio, Maryland and Virginia.

6. The records of the organization of the different counties, their boundary lines and the proceedings, reports and maps relating to the erection of new counties and the re-marking, changing and resurveying of the lines of the old counties.

7. The charters, maps, commissions, public documents, records and other papers pertaining to the colonial history of Pennsylvania. Also the records of the Pennsylvania commissioners relative to the Centennial Exposition of 1876.

8. The reports of the county commissioners, as provided by the act of 1887, relative to the inspection and preservation of, and the enforcement of the penal laws regarding the State boundary monuments.

9. The reports of the boards of examiners on all successful candidates who apply for certificates as mine foremen or certificates of qualification, as required by the act of 1885.

The business of this Bureau for the year 1887 shows a marked increase in the amount of work performed. Especially is this true in that branch in which certified copies, the exemplifications of old surveys and other papers, are prepared. The amount of money paid into the State treasury for the quarter ending September 30 was greater than that for any other quarter since the reorganization of the Department under the new Constitution. The following statement, exhibiting the amounts received for copies during the first seven months of

this administration as compared with the relative seven months of the preceding administration, will indicate this increase of work:

1886.	*Amount received.*	*1887.*	*Amount received.*
May,	$94 50	May,	$214 25
June,	93 25	June,	151 25
July,	81 25	July,	377 50
August,	134 50	August,	264 55
September,	103 25	September,	215 25
October,	106 75	Oetober,	128 75
November,	68 75	November,	281 25
	$682 25		$1,632 80

There are comparatively few tracts of land remaining in Pennsylvania the titles to which are still in the Commonwealth, and yet there are so many persons constantly searching for these unappropriated lands that our correspondence is rendered very heavy. This correspondence consists chiefly in replies made to letters of inquiry regarding the price and location of these lands. Applications are frequently presented for warrants to survey such lands, but an exceedingly large number of them are opposed by those who claim to have previously acquired title to the lands in question. These contests multiply the business of the Bureau in the recording of caveats, the preparation of certified copies of applications and caveats, the issuance of citations and the preparation of such cases as may be brought to issue before the Board of Property. On account of the increase of work in this branch of the Bureau it has been impossible to make any perceptible advancement in the copying of old surveys. Under the act of 1833 it is the duty of the Department to employ the force, so far as other business will permit, in the copying of old and mutilated surveys. This act has been in force for upwards of fifty years, and yet there have been only about ten thousand copies made. Undoubtedly there might have been much more accomplished. It is proper now, however, to speak only of the present possibilities of the Bureau in this direction, in order that the Legislature may appreciate the duty devolving upon it and provide the means whereby the purpose of the act of 1833 may be accomplished. That this needed work cannot be done by the present force may be inferred from the fact that since 1874 the work of the Department has been enlarged by transferring to it the railroad bureau, the canal and State road records, the county and State boundary line reports, the Bureau of Vital Statistics and the State Weather Service Bureau without any increase being made in the number of employés. There should be provision made for the employment of at least three skillful and careful draftsmen, who services should be devoted exclusively to the copying of the old papers in the Department that are falling to pieces from age. Thousands of these papers are so badly mutilated that perfect copies cannot be made of them, but the vast ma-

jority are still susceptible of complete reproduction, and, as many of them are closely connected with the early history of the Commonwealth, a spirit of patriotism should inspire the proper authorities to make provision for the preservation of the information they contain. They are invaluable to the people as title papers, and their disappearance from any cause would lead to the most hopeless confusion and costly litigation and would, in many cases, destroy the possibility of ascertaining the facts necessary to settle the disputes that are sure to rise regarding original titles. In former reports attention has frequently been called to the bad condition of these papers, and legislation has been suggested whereby it might be better; but unfortunately nothing has yet been done. It is hoped that the Department may be able to present the question to the next Legislature in such a way that proper regard for public duty will furnish the means necessary for the accomplishment of this work. In order that these papers may be preserved so far as possible in the meantime, the Department has provided 2,500 document boxes, in which they have been filed.

MISSING SURVEYS.

During the year there have been many requests for copies of surveys the originals of which could not be found on file, so easy is it for these papers to become displaced. In view of this fact it was deemed advisable to examine all the surveys in the Department in order that they might be returned to their proper places among the files. About one hundred were found filed under the wrong letters and a much larger number were found to be chronologically misplaced, but the proportion was small compared with the exceedingly large number on file. Still, there are hundreds of surveys that cannot be found at all, many of which have disappeared in unaccountable ways, while many others have fallen to pieces through the effects of time.

STATE BOUNDARY LINES AND BOUNDARY LINE MONUMENTS.

The Legislature by a concurrent resolution passed on the 7th day of May, 1885, directed the Secretary of Internal Affairs to prepare for publication the final reports of the commissioners appointed to resurvey and remark the boundry lines of the Commonwealth. In accordance with this instruction, the Hon. J. Simpson Africa, during the last year of his administration as Secretary, prepared and had published copies of the old agreements, decisions, decrees, compromises, surveys, resurveys, the several acts of Assembly and other official documents which pertain to the boundary lines between this Commonwealth and the States of Virginia, West Virginia, New York and Ohio. No other official report issued from this department has received more favorable commendation than this boundary line report of Mr. Africa's, and it is very highly prized as a historical work.

The report is arranged in two volumes, one embracing maps, charts, etc., and the other the detailed reports of surveys and examinations. Unfortunately the Legislature limited the edition to one thousand

copies, all of which were distributed under the administration of Mr. Africa. The resolution referred to above directed that this report be furnished to adjoining States, public libraries, public officers in the counties situated along the boundary lines, and to individuals interested therein. The constant demand for this work evidences in a marked degree its worth, and indicates that it would be wise for the Legislature to provide for a second edition.

It may now be said that the location of State boundary lines, except the line between the counties of Chester and Delaware and the States of Maryland and Delaware, is well defined and marked by enduring monuments. Their preservation is an imperative duty; and the Legislature at its last session saw the necessity of action tending to this end, and by statute charged upon the county commissioners of the boundary counties the care and preservation of these monuments. The commissioners are required to enforce the statutes for the preservation of monuments and landmarks so far as they pertain to boundary monuments, and to prosecute any person or persons who may in any manner disturb or mutilate them. By the same statute the said commissioners are required to visit and examine, on or before the 1st day of June of every year, each of said monuments, with a view of ascertaining their condition, "and to make a detailed report thereof, and transmit the same to the Department of Internal Affairs." This act became a law on the 19th day of May, 1887. Immediately thereafter blanks were prepared calling for the necessary information, and the same were forwarded, together with a letter of instructions to the commissioners of the counties affected by the act. These blanks did not reach the commissioners until after the 1st of June, which made it impossible for them to make the investigations in strict conformity with the act as to the time of inspection; but after an exceedingly large amount of correspondence, aided by the willingness of most of the commissioners to comply with the law as far as possible, we have succeeded in procuring reports from twenty-three of the twenty-four counties, which are submitted herewith. In this matter the county of Bedford is made unhappily conspicuous by the non-compliance of the county commissioners with the law and the requests from this Department.

While the information furnished by the commissioners is generally satisfactory, as to the condition of the monuments, it is nevertheless evident that frost and flood have affected many of them along the northern bonndary and that vandalism has mutilated and destroyed many along the southern boundary. The latter boundary, known as the "Mason and Dixon line," is of all lines in the country the most noted, in that it for so many years marked the bounds of freedom and limited the extension of the northern encroachment of American slavery.

In the arrangement of the reports from the county commissioners we have commenced with the county of Erie and proceeded east-

wardly along the New York line to the county of Wayne. Then commencing with the south-eastern county, Delaware, we have taken the counties that extend westward and northward to the county of Erie. The returns from this latter county indicate that the commissioners have taken exceedingly great care in the investigation and inspection of the boundary line and monuments. They describe accurately every stone and corner and specify its exact location as to other permanent objects in the locality in which the stone is situated. The report is one of the most valuable in the way of information of any that have been submitted. The lines of this county embrace territory that was at one time claimed by the States of Connecticut, Massachusetts and New York. This territory was afterwards conveyed to the United States Government by the three States named, and then by deed signed by George Washington, as President, and Thomas Jefferson, as Secretary of State, it was transferred to the State of Pennsylvania. Its boundary lines, are, therefore, of great value to historians, and undoubtedly influenced the commissioners of Erie county to make the complete and extensive report which they did. They also report that the citizens along the line are interested in the care, protection and preservation of these monuments; and in their opinion the annual inspection imposes a useless expense upon the county. The Warren county commissioners report all monuments in good condition, except milestone 197, which has been partly dislocated by frost. Every monument along the border line of McKean county is reported to be in good condition, as are all the Potter county ones. The commissioners of Tioga county, in the inspection of the monuments along their boundary, discovered that stone 100 had been displaced by a flood in the creek in whose bed it had been set. The monument was found on the banks of the stream some distance from its proper location, and as nothing remained to indicate where its exact location had been, the question arose as to what disposition should be made of it. A communication was addressed to this Department under date of October 31st, in which the facts were stated and instructions requested. The monument not only marked the boundary line between this Commonwealth and the State of New York, but it also marked the corner of Woodhull and Tuscarora townships in the latter State. The commissioners further stated that in their opinion they could reset the corner where it belonged in such a way as to be secure from the flood in future. They suggested that it be set on the bank of the stream some ten feet distant from its original location, and they asked for instructions from this Department as to what course to pursue. This communication raised a question which we were unable to determine. No authority is given this Department or the commissioners of the several counties to reset or erect monuments that have disappeared or been displaced from any cause. The State of New York was equally interested with Pennsylvania in

the proper location of this stone, and the two townships mentioned before were also interested. The Department, therefore, did not think that its action alone, without the concurrence of the proper authorities of New York State and the townships mentioned would be justifiable. The commissioners, therefore, were recommended to correspond with the authorities of New York with a view of having joint action in the resetting of this monument. Nothing, however was done in the matter, as appears by their printed report, except to correspond with the commissioners of the townships referred to. It might be proper to add here that it would be well for the Legislature at its next session to confer upon some State officer the authority to coöperate with the authorities of adjoining States in the resetting or reërection of monuments that have been displaced, where their original location can not be determined without re-running the lines. The other monuments along the boundary of Tioga county are in good condition. All of the ninety-five monuments alone the line of Bradford county, except two, are reported to be in good condition. These have been partly displaced by the frost, and the commissioners recommend that they be reset. The commissioners of Susquehanna county make their report in the form of a letter which appears in its proper place. This letter represents three of the monuments as somewhat displaced by the frost. All the monuments along the Wayne county line are reported to be in good condition. The commissioners of Delaware and Chester counties, two counties whose territory is bounded in part by the New Castle circle, forcibly call attention to the fact that this circular line is unmarked and that there are many persons living in the vicinity of the line whose residence cannot be definitely settled as to the State they are in, owing to the uncertainty of its exact location. The Chester county commissioners also represent that the people on both sides of the line are anxious to have it surveyed and marked by permanent monuments. They also represent that the land running down between the States of Delaware and Maryland which embraces some six hundred and seventy acres and belongs to the State of Pennsylvania, is claimed by the State of Delaware. The people living there vote and pay taxes in Delaware, and the titles to their lands are recorded in New Castle county, of that State. In the report of Colonel J. D. Graham, upon the southern boundary lines of Pennsylvania, on page 168, in speaking of the uncertainty of the location of this circular line, he says: "Mr. W. Smith, a gentleman who has once served as a member of the Legislalature of Delaware, resides a full half mile in the State of Pennsylvania, measured in the shortest direction from his dwelling house to the circular boundary." This reference to the uncertainty of the exact location of the circular line, and the expression of the citizens residing in its vicinity ought to influence legislation in the two States

which would lead to the exact location and marking of this historical line. The commissioners of Lancaster county had but four monuments to inspect. One of them has entirely disappeared, two are badly mutilated, and one is in good condition. It is proper to call attention to the remarks of these commissioners regarding the three links of an iron chain on a rock on an island in the Susquehanna river, and which were placed there by the noted surveyors Mason and Dixon. Next is an interesting report submitted by the commissioners of York county, in which a full description of the present condition of the monuments is given. There are forty milestones along the border of this county, eight of which are designated as crowned stones. These stones are marked with the coat of arms of the Baltimores and of the Penn family. The other stones are marked with the letters M and P on opposite sides, representing respectively the States of Maryland and Pennsylvania. The monuments used to designate this line were made in England and placed in position under the direction of Mason and Dixon one hundred and twenty-five years ago. Along the line of this county there are twelve of these original monuments that have been displaced, some of which are entirely gone. Some others are broken; one is used as a doorstep away from the line about sixty yards, at the house of J. V. Strickler, a resident of Maryland; another one, in apparently perfect condition, being the fifty-sixth milestone, is lying in the engine house of a grist mill some distance from the line. The report from Adams county indicates that the monuments there have suffered more from lawlessness than those of York county. A number of them have been badly mutilated and some have been displaced and removed some distance from the line. The Franklin county commissioners report the condition of their monuments as equally bad. One of them is being used as a doorstep, another for some reason has been taken to Washington or Baltimore, and still another has been placed at a fence fifty yards from the line. The Fulton county report indicates that the monuments have suffered less from the elements and the hands of the lawless than those of Franklin county, all the monuments having been found except one, whose disappearance cannot be accounted for. The commissioners of Somerset county have taken a great deal of pains to make a full and complete report of the condition of the monuments that mark the line along their boundary. They secured the services of a surveyor who has made a complete report of his investigations, which we print as a supplement to their report. The lines along this county were designated by earth and stone mounds, and it seems that many of them were destroyed by curiosity seekers who imagined that they contained Indian relics. All the monuments along the Fayette line are reported to be in good condition except the one indicating the northwest corner of Maryland. The line along Greene county seems to be well marked, as the commissioners report every monument to be in

good condition. Beaver, Washington and Lawrence counties fail to make any report, as requested, but submit letters to show the condition of their boundary lines. The report from Mercer county indicates that the commissioners appointed to re-survey and re-mark the lines on the first boundary, did their work well, as the monuments are all in good condition. The commissioners of Crawford county filed a statement which can not be classed either as a letter or a report. The commissioners seem to have performed their duty in inspecting the monuments, but their report was not presented in an acceptable form.

We have called attention to some of these monuments in order that the Legislature may be furnished with such information as will lead it to pass proper enactments for replacing the missing monuments and reëstablishing the lines wherever their exact location is not known. The Ohio line and the New York line are so well marked that no further expenditure of money is necessary for them; but the southern line, as is clearly shown by the reports, should receive attention at once, and an appropriation should be made for this line, which, as we have before indicated, is so closely connected with the history of our Commonwealth. It should be accurately and permanently marked. This is a duty devolving upon the State, not only as an obligation to the people living along the line, but also to preserve the line on account of its history.

ANNUAL REPORTS OF THE COUNTY COMMISSIONERS OF THE BORDER COUNTIES ON THE BOUNDARY MONUMENT LINES FOR THE YEAR 1887.

ERIE COUNTY.

INSPECTION OF MONUMENTS ON LINE BETWEEN PENNSYLVANIA AND NEW YORK, BY COMMISSIONERS OF ERIE COUNTY, 1887.

Number or style of monument, mile or index stone, or other landmark.	When examined and by whom.	Condition.—(If mutilated or disturbed state to what extent.)	If mutilated or disturbed, what action has been taken to repair or replace.	What action has been taken to apprehend and punish offenders.	Remarks.
Small monument, ...	Oct. 18, 1887, by Gillett, Wade & Whitley,	Good condition,	.....	.....	On the bank of Lake Erie.

Monument, ...	do. do.	do.	.....	.....	On north bank of Twenty Mile creek.
Do.	do. do.	do.	.....	.....	On south bank of Twenty Mile creek.
Third Milestone,.....	do. do.	do.	.....	.....	In a broad ravine; an original monument stands here.
Highway monument,..	do do.	do.			
Monument, ...	do. do.	do.	.....	.....	Stands 30 feet from the edge of a bluff.
Fourth milestone,.. ..	do. do.	do.	....	.....	Stands between two pieces of standing timber.
Highway monument,..	do. do.	do.	.....	.....	Stands on the north side of a road.
Fifth milestone,.....	do. do.	do.	.....	.....	Stands in cleared land.
Highway monument,..	do. do.	do.			
Sixth milestone,.....	do. do.	do.	....	.....	Stands on the west side of State line road near line of Repley and Mira townships.
Seventh milestone,.....	do. do.	do.	.....	.....	Stands on the west side of State line road, near Mr. Stetson's house.
Highway monument, ..	Oct. 19, 1887, do.	do.			
Highway monument, ..	do. do.	do.			
Highway monument, ..	do. do.	do.	.....	.....	This marks the line between North-East and Greenfield townships.

Eighth milestone,	Oct. 19, 1887, by Gillett, Wade & Whitley,		Good condition,			Stands on west side of State line road.
Highway monument,	do.	do.	do.			Stands at intersection of State line road with road to Findley's Lake.
Ninth milestone,	do.	do.	do.			Stands on east side of State line road, about eight rods south of Black Brook.
Highway monument,	do.	do.	do.			Stands at intersection of State line road with road to Wattsburg.
Tenth milestone,	do.	do.	do.			Stands in a deep ravine in standing timber; hard to find.
Highway monument,	do.	do.	do.			About 120 rods south of tenth milestone.
Eleventh milestone,	do.	do.	do.			Stands in a meadow.
Highway monument,	do.	do.	do.			Stands about 50 rods south of eleventh milestone.
Twelfth milestone,	do.	do.	do.			Stands in open country near a small ravine.
Highway monument,	do.	do.	do.			Stands about 200 feet south of twelfth milestone.
Do.	do.	do.	do.			Stands on line of Greenfield and Venango townships.
Thirteenth milestone,	do.	do.	do.			Stands on the bank of a small ravine, near a thicket of brush, difficult to find.
Fourteenth milestone,	do.	do.	do.			
Holland Land Company's monument.	do.	do.	do.			Marked "4½," stands 742 feet south of fourteenth milestone in thick woods and brush.
Fifteenth milestone,	do.	do.	do.			Stands in the bottom of a deep ravine in thick woods; difficult to find.
Holland Land Company's monument.	do.	do.	do.			Stands 750 feet south of fifteenth milestone, marked "3½ M. P."
Monument marked "3 M. P."	do.	do.	do.			Stands just south of a deep ravine.
Highway monument,	do.	do.	do.			Stands 245 feet from last monument.
Sixteenth milestone,	do.	do.	do.			Stands in a deep ravine in the midst of a large wind fall grown up with briars.
Monument marked "2 M. P."	do.	do.	do.			Stands about one-third distance to seventeenth milestone.
Seventeenth milestone,	do.	do.	do.			Stands on north side of French creek; near it is a flat stone marked "17 M. of Penna., 1786."
Highway monument,	Oct. 20, 1887,	do.	do.			Stands on road leading from Wattsburg to Clymer, in French Creek valley.
Eighteenth milestone,	do.	do.	do.			On a hill south of the valley, at edge of thick woods. We found here a stone marked "Penna. and N. Y., 18 M." We placed it beside of the monument. This monument is two-thirds of a mile north of the south-west corner of New York State.
Large monument,	do.	do.	do.			100 feet north of the south-west corner of New York State, six feet high and one foot thick, with inscriptions.
Highway monument,	do.	do.	do.			85 feet south of large monument on north side of road.
Monument,	do.	do.	do.			Flush with the ground in the middle of road, twenty feet south of last monument.
Do.	do.	do.	do.			In middle of highway, on line of Amity and Wayne townships, 376 feet of corner of New York State.

INSPECTION OF MONUMENTS—*Continued.*

Number or style of monument, mile or index stone, or other landmark.	When examined and by whom,	Condition—(If mutilated or disturbed state to what extent).	If mutilated or disturbed, what action has been taken to repair or replace.	What action has been taken to apprehend and punish offenders.	Remarks.
Highway monument, ..	Oct. 20, 1887, by Gillett, Wade & Whitley,	Good Condition,	.....	.....	About one-half mile east of corner of New York State, on road to Corry.
224th milestone, ...	do. do.	do.	.....	.....	Marked on south side P. A., and on north side N. Y., near middle of road.
223d milestone,.....	do. do.	do.	.....	.....	Stands on north side of road.
Highway monument, ..	do. do.	do.	.....	.....	Stands on east side of a brook.
222d milestone,.....	do. do.	do.	.....	.....	Stands on north side of road.
Highway monument, ..	do. do.	do.	.....	.....	About forty rods east of 222d milestone.
221st milestone,.....	do. do.	do.	.....	.....	Stands on north side of road at the south edge of woods.
Highway monument, ..	do. do.	do.			
220th milestone, ...	do. do.	do.	.....	.....	Stands on north side of road east of Hare Creek valley.
Highway monument, ..	do. do.	do.			
219th milestone, ...	do. do.	do.	.....	.....	Stands near middle of road.
Monument, ...	do. do.	do.	.....	.....	Marked "5½ M. P."
Do.	do. do.	do.	.....	.....	On corner of Clymer, French Creek and Wayne townships.
Highway monument, ..	do. do.	do.	.....	.....	Marked "M. P." on west side of road.
Do. ..	do. do.	do.	.....	.....	Marked "M. P.;" stands on east side of steep ravine.
218th milestone, ...	do. do.	do.	.....	.....	Stands on the south side of a maple grove and north of an orchard.
Highway monument, ..	do. do.	do.	.....	.....	Stands on east side of Clymer and Columbus road.
Monument, ...	do. do.	do.	.....	.....	Stands on railroad about 200 feet east of last mentioned monument.
Highway monument, ..	do. do.	do.	.....	.....	Stands on east side of west branch of Broken-straw creek, east side of a mill.
Do. ..	do. do.	do.	.....	.....	Stands on corner of Erie and Warren counties, the end of our inspection.

INSPECTION OF MONUMENTS ON LINE OF OHIO AND PENNSYLVANIA BY COMMISSIONERS OF ERIE COUNTY.

Number or style of monument, mile or index stone, or other landmark.	When examined and by whom.	Condition—(If mutilated or disturbed state to what extent.)	If mutilated or disturbed, what action has been taken to repair or replace.	What action has been taken to apprehend and punish offenders.	Remarks.
Monument, ...	Oct. 11, 1887, by Gillett, Wade & Whitney,	Good condition.	.....	.....	Stands 1,945 feet north of initial stone of last survey.
Highway monument, ..	do. do.	do.	.....	.....	Stands at end of the State line road at intersection of lake road.
Northern terminal monument.	do. do.	do.	.....	.....	Stands at middle of highway leading east.
Highway monument, ..	Oct. 20, 1887, do.	do.			
First milestone, ...	do. do.	do.	.....	.....	Stands on west side of road.
Monument, ...	do. do.	do.	.....	.....	Stands at the side of Lake Shore and Michigan Southern railway.
Highway monument, ..	do. do.	do.	.....	.....	Stands in middle of Ridge Road.
Second milestone, ...	do. do.	do.	.....	.....	Stands in open field; road has been opened from here to the next milestone since the last survey was made.
Third milestone, ...	do. do.	do.	.....	.....	Stands on west side of road.
Highway monument, ..	do. do.	do.	.....	.....	Stands in the middle of Under Ridge Road.
Fourth milestone, ...	do. do.	do.	.....	.....	Stands on west side of road.
Monument, ...	do. do.	do.	.....	.....	Stands on top of a ridge.
Fifth milestone, ...	do. do.	do.	.....	.....	Near a piece of woods; some pieces have been chipped off, but inscriptions not injured.
Monument, ...	do. do,	do.	.....	.....	Stands on top of an east and west ridge.
Highway monument, ..	do. do.	do.	.....	.....	In middle of State road.
Sixth milestone, ...	do. do.	do.			
Highway monument, ..	do. do.	do.	.....	.....	In middle of Albion road.
Seventh milestone, ...	do. do.	do.	.....	.....	On west side of road.
Highway monument, ..	do. do.	do.	.....	.....	In middle of road running west.
Eighth milestone, ...	do. do.	do.	.....	.....	In middle of State line road.
Monument, ...	do. do.	do.	.....	.....	At the corner of Erie and Crawford counties.

We are pleased to report of all the monuments (75 on New York State line and 21 on Ohio line), not one was defaced or out of line that we could discover. The people living along the State lines feel an interest (not to say a pride) in caring for these monuments, and in our opinion it will be a useless expenditure of public money to make this yearly examination. The same end could be as well served by offering a reward for the apprehension of any person molesting them.

A. O. GILLETT,
B. B. WHITLEY,
WILLLIAM R. WADE,
} *Commissioners of Erie County.*

WARREN.

No. 79, small stone,.	do. do.	do. do.			
Monument stone,...	do. do.	do. do.			
No. 80, monument stone.	do. do.	do. do.	.....	.....	At corner of Bradford and Tioga counties.

SUSQUEHANNA.

We, the undersigned, two of the county commissioners of Susquehanna county, certify that we have examined the State line monuments on the boundary of Susquehanna county and New York State, beginning with the monument at the corner of Wayne and Susquehanna county, and ending with the (40th) fortieth milestone at the corner of Susquehanna and Bradford county, and find all of the monuments on said line to be in place, as described on map and in book describing said monuments.

There is no evidence that any of the monuments have been disturbed by any one. The highway monument on the west bank of the Susquehanna river, near milestone No. 13, has been raised out of the ground about six inches by the action of the frost. Also milestone No. 27 and highway monument standing 197 feet east of milestone No. 27, have been forced up some by the action of the frost, but we did not consider them out of place enough to necessitate resetting. We find that there is (81) eighty-one milestones and highway monuments on said line.

The above examination was made between the dates of October 24th and 29th, inclusive.

James E. Curtis,
F. M. Woodhouse, } *Commissioners.*

WAYNE.

Number or style of monument, mile or index stone, or other landmark.	When examined and by whom.	Condition—(If mutilated or disturbed state to what extent.)	If mutilated or disturbed, what action has been taken to repair or replace.	What action has been taken to apprehend and punish offenders.	Remarks.
Large initial monument,	October 19, 1887, by county commissioners,	Not disturbed or mutilated,			
Meridan mark with "crow foot," 984 feet south of intersection monument,	October 19, 1887, by county commissioners,	do. do.

DELAWARE.

To the Hon. Thomas J. Stewart, *Secretary of Internal Affairs:*

We, the undersigned, county commissioners of Delaware county, State of Pennsylvania, certify that we have examined the boundary line between Delaware county and the State of Delaware, and find that there are no monuments, mile or index stones or other landmarks than trees along the whole boundary, beginning at the farm of George Thompson, on the Delaware river, and ending on the farm of E. I. Du Pont, in Birmingham township, a distance of ten miles.

In witness whereof we hereunto fix our hands and seal of office this fifth day of December, A. D. 1887.

Andrew Osborne,
Benjamin F. Pretty,
William Armstrong. } *Commissioners.*

CHESTER.

Number or style of monument, mile or index stone, or other landmark.	When examined and by whom.	Condition—(If mutilated or disturbed state to what extent.	If mutilated or disturbed, what action has been taken to repair or replace.	What action has been taken to apprehend and punish offenders.	Remarks.
Three cornered granite, set 1849.	Sep. 20, 1887, by the commissioners.	Good condition.			
1st stone North, set 1766, ...	do. do.	Leaning badly, ...	None.		
2d do. do.	do. do.	Good condition.			
3d do. do.	do. do.	do.			
At N. E. corner of Maryland granite set in 1849, ...	do. do.	do.			
1st stone W. of corner, set 1766.	do. do.	do.			
2d do. do.	do. do.	Good condition, but nearly buried.	None.		
3d do. do.	do. do.	Good condition.			
4th do. do.	do. do.	do.			
5th do. do.	do. do.	Good condition, leaning slightly.	None.		
6th do. do.	Sep. 21, 1887, do.	Good condition.			
7th do. do.	do. do.	do.			
8th do. do.	do. do.	Split open, one side loose.....	None.		
9th do. do.	do. do.	Stone in good condition, but entirely out of ground.	None.		
10th do. do.	do. do.	Good condition, leaning slightly.			
11th do. do.	do. do.	Good condition, entirely out of ground.	None.		
12th do. do.	do. do.	Good condition.			
13th do. do.	do. do.	Broken off, very little use, ..	None.		
14th do. do.	do. do.	Leaning badly and almost buried.	None.		
15th do. do.	do. do.	Good condition.			
16th do. do.	Sep. 22, 1887, do.	Leaning slightly.			
17th do. do.	do. do.	Broken off, of little use.			
18th do. do.	do. do.	Good condition.			

NOTES.—Between this county and State of Delaware there does not appear to be any stone of any kind. The people living near the line on both sides think it should be surveyed and marked.

The point of land running down between the States of Delaware and Maryland, which according to the map is a part of this county, is claimed by the State of Delaware. The people living on it vote and pay their taxes in Delaware. The titles to their lands are recorded in New Castle county, Delaware.

LANCASTER.

Number or style of monument, mile or index stone, or other landmark.	When examined and by whom.	Condition—(If mutilated or disturbed state to what extent.)	If mutilated or disturbed, what action has been taken to repair or replace.	What action has been taken to apprehend and punish offenders.	Remarks.
1st east of Susquehanna.	County commissioners, Oct. 12, 1887.	In first-class condition.			
2d do.	do. do.	Cannot be found,.....	It is now being searched for by order of the co. com.		
3d do.	do. do.	Badly broken and laying on ground.	.....	.....	This is a fifth milestone.
4th do.	do. do.	Standing erect, but several pieces broken off.			

NOTE.—Besides these four stones, Mason and Dixon also put on the southern boundary of Lancaster county three links of an iron chain in a rock. This rock is on an island in the river, one mile west of the last stone east of the river. At the present stage of water these links are about eighteen inches beneath the surface. Few living men have seen them. Wm. P. Haines, a well known citizen who lives at Pleasant Grove, says that he saw these links frequently when a boy. In all probability he is the only living man who can point out the location of this interesting and historic landmark.

YORK.

SOMERSET.

Number or style of monument, mile or index stone, or other landmark.	When examined and by whom.	Condition—(If mutilated or disturbed state to what extent.)	If mutilated or disturbed, what action has been taken to repair or replace.	What action has been taken to apprehend and punish offenders.	Remarks.
Sixteen earth mounds, ..	Examined from the 26th of October to the 8th of November by Commissioner A. C. Lepley or William M. Schrock, surveyor, and both.	With only a few exceptions, were wholly or partly destroyed at a remote period in search of relics.	Nearly all has been put in good repair as originally constructed; a number could not at the time be fully repaired, but all are now easily recognizable.	No action has been taken; nearly all the mounds were destroyed years ago.	
Eighteen stone mounds,	Examined as above, ...	With only one exception all were more or less disturbed, and many wholly destroyed with few exceptions, in our opinion, in search of Indian relics.	Nearly all were thrown up so as to make them easily recognizable as mounds at sight; several were in tolerably good shape and left undisturbed by us; where there were trees in close proximity they were given marks facing the mounds.	No action can be taken, as the destruction of these mounds occurred very many years ago.	
Two stone and earth,....	Examined by W. M. Schrock, surveyor, and others.	Slightly mutilated,...	Put in good repair,.....	No action; for reasons as above.	

To the Honorable the Board of County Commissioners of Somerset county, Pennsylvania:

GENTLEMEN: Having, by your request, accompanied you to make an examination of the boundary line of Pennsylvania, on the southern borders of Somerset county, I have the honor of submitting to you the following report:

After having examined a copy of the survey made by Mason & Dixon, 1763–7, furnished you by the Secretary of Internal Affairs, I was lead to believe that monuments had been placed regularly at intervals of five miles, with intermediate stone shafts or other marks, but from the great length of time since the survey, you deemed it advisable to make a careful survey of the entire line along this county, to enable you to discover and carefully examine all marks of any kind whatever.

The survey was commenced on October 26, 1887, at a point on Youghiogheny river, the boundary at that point of Somerset and Fayette county, thence running east with a magnetic bearing of 3 degrees north at the west end, and $2\frac{3}{4}$ at the east end (Bedford county).

The entire line was very difficult to trace for the following reasons:

First. The mounds, which were of stone or earth, or both, were found, not at regular five-mile intervals, but at irregular distances, varying from twenty-two to nine hundred and twenty rods apart.

Second. The great length of time since the construction of the mounds and the ignorance of the greater portion of the old settlers in the vicinity of the line of their use, nearly all having believed them Indian mounds, or Indian burial places, and believing them to be such, were, in nearly every instance, partly or entirely destroyed. Some were so completely demolished that it was only with the most careful running of the line and constant watch that they could be found. Several were found that citizens, who had lived in the neighborhood for years and passed them within a few rods many times in a year, yet never knew of their existence until pointed to them on the survey. One man seen admitted that he had opened a stone mound twenty-five or thirty years ago in search of Indian relics, and that he had never known that they were State line marks, yet this same man lived in the vicinity of the line all his life. Another man said he had heard it said that money and other valuables had been hid in the earth mounds and that for that purpose had been opened years ago.

A notable feature of the line was the sparseness of mounds at the east and west end of the line. This I would account for at the west

by the fact that the greater portion of the mounds, possibly, were earth and when the country in the vicinity of the line was first cleared out, may have been dug open in search of relics and finally disappeared entirely under the plow. At the east end of the line, if mounds were thrown up at other points than those found and repaired, they were destroyed in search of relics or by vandal hands for the purpose of obliterating all traces of the line. In either event the work was so effectually done that no traces have been left of former existence of mounds.

The earth mounds were found, as a whole, to have been less disturbed than those erected of all stone. Several of the earth mounds were found almost perfect, as left by Mason & Dixon one hundred and twenty-five years ago, with the exception of a hole having been dug in the top center. These, on measurement, were found to have been from eighteen to twenty feet in diameter and from four and one-half to fully five feet in height. The greater portion, however, were estimated to have been from ten to twelve feet in diameter, and from three to four feet in height.

Only one stone mound was found that, in our opinion, had been undisturbed. This was on the summit of Allegheny mountain, and measured fully twenty feet in diameter and five feet high and contained in the center traces of a chestnut post twelve inches in diameter. All other stone mounds had apparently been from ten to eighteen feet in diameter and from three to four feet in height.

Some of the stone mounds show evidences of careful construction, with flat stone of nearly uniform size, set on edge in alternate courses around a center post and in tiers, one above the other and completed in cone shape with evidences of all the openings having been filled with small broken stones. These mounds, as originally constructed, would have stood for ages if they had remained undisturbed. The greater number, I regret to state, showed evidences of very hasty construction, with stones of various sizes thrown up in shape of an ordinary stone heap, and were only discernible from such by a few courses of stone at the base having been set uniformly on the outer edge. This apparent hasty construction may be accounted for from the fact that Indians gave the surveying party considerable trouble in this vicinity.

The earth mounds, with a few exceptions, were repaired and fitted up in as nearly the original size and shape as it was possible.

The stone mounds, or heaps, were thrown up and put in much better condition than found. To put all in the best possible shape would have required fully one week longer time. The fact that the extended time allowed by the Secretary of Internal Affairs had nearly or quite expired, the work was gone over as hastily as possible. Even then fifteen days were consumed in making the survey and repairs of mounds, of which there were thirty-six—sixteen earth, eighteen stone

and two earth and stone—in a line a fraction less than thirty-one miles in length.

All mounds found are now clearly defined, and in a condition to make them easily recognized.

I would further report that considerable dissatisfaction exists at a number of places along the line on account of real estate owners not being able to agree on the exact locality of the line as originally surveyed by Mason & Dixon. Some parties on the Maryland side claiming lands into Pennsylvania, and on the Pennsylvania side claiming into Maryland. Some of this trouble has come about by surveyors, who did not have a full knowledge of the mounds, or if they did may not have had the true magnetic variation. We often found land lines varying from several feet to several rods of being the true Mason & Dixon line, although each land owner would claim it to be so. When citizens, owners of lands, were present we assured them we had nothing to do with land lines, and were not settling disputes in that direction.

The greatest trouble exists in Greenville township. Here there was a line surveyed at an early day by a surveyor purporting to be Pennsylvania and Maryland line, whilst in reality he was running from several rods to fourteen rods to the north of the Mason & Dixon survey. This, at early date, caused a number of errors to be made in the entry of lands, and the purchase of others, causing misunderstandings as to the true lines, &c., and has lead to some litigation with prospects of more. Many citizens that we met along the line, are exceedingly anxious that a commission be appointed from both States, to erect monuments and milestones, so as to more clearly define the actual line and thus settling forever all boundary disputes.

Whilst the finding and repairing of the mounds will greatly aid citizens in properly locating their land lines it will not, in my opinion, fully settle all difficulties relative to the line until a commission is duly authorized to put up monuments at regular intervals and clearly define the line between these points. As the matter now exists some of the mounds are at great distances, with nothing to define the line between.

As an example of the difficulties in citizens getting the correct line I note the following:

My attention was called by a land owner of a land corner made by a surveyor and which was to have been on the boundary, who, on running sixty or seventy rods from a well-defined mound, had varied from the true line more than two rods. It is, therefore, easily to be seen what such errors will eventually lead to, unless regular monuments and milestone are constructed at an early day.

Taking into consideration the early day of the running of Mason & Dixon line and the disadvantages they labored under, and the rough and mountainous country through which the line was surveyed, and

the accuracy with which it was run, and with an ordinary *surveyor's compass at that (which is on exhibition at the Franklin Institute in Philadelphia), gives evidence of great engineering skill of those engaged in the work.

Respectfully submitting the foregoing report for your consideration,

I am respectfully yours,

William M. Schrock,
Surveyor.

Somerset, Pa., *November 15, 1887.*

We, the undersigned, commissioners of Somerset county, Pennsylvania, concur in the foregoing report and respectfully submit the same to the Secretary of Internal affairs.

Peter Dumbauld,
Adam C. Lepley,
Jonas McClintock,
Commissioners.

Attest:

A. J. Hileman, *Clerk.*
November 15, 1887.

---

* This statement seems to be an error, for Mason & Dixon were supplied with transits and other istruments of excellent make, which enabled them to do such perfect work.

WASHINGTON.

To Hon. THOMAS J. STEWART,

Secretary of Internal Affairs, Harrisburg, Pa.:

The commissioners of Washington county, Pennsylvania, respectfully report:

That in pursuance of an act of Assembly, dated May 19th, 1887, they inspected the monuments marking the boundary between West Virginia and Pennsylvania, along the line of said county, and find that said monuments, from No. 33 to No. 11, inclusive, as per survey, are in condition.

They also find four other monuments shown, but not numbered on survey, which are in good condition, except the one at crossing of the P., C. and St. L. R. R., at Hamlins' station, which has been covered by a dump made by said railroad company, and replaced by a wooden one.

They further report that none of the distances marked on said monuments correspond with said distances as represented on survey.

Very truly,

J. S. ROSS,
DAVID BRADFORD,
A. T. HOHLER,
Commissioners of Washington county.

Attest:

JAMES E. BARNETT,

BEAVER.

Hon. ISAAC B. BROWN,

Deputy Secretary of Internal Affairs, Harrisburg, Pa.:

DEAR SIR: In reply to yours of 29th ult., we have to say, that for want of time we did not examine the boundary line monuments, etc. But we have made inquiry of our assessors of townships lying on the borders, and they all report that no complaints have been made of any landmarks having been mutilated or disturbed.

Yours truly,

COMMISSIONERS OF BEAVER COUNTY,
per R. S. HERRON, *Clerk.*

LAWRENCE.

Numbers 59 to 78, inclusive, of Cleaveland stone, examined on September 6th and 7th by board of county commissioners; none of them mutilated or disturbed.

CRAWFORD.

Number or style of monument, mile or index stone, or other landmark.	When examined and by whom.	Condition—(If mutilated or disturbed state to what extent.)	If mutilated or disturbed, what action has been taken to repair or replace.	What action has been taken to apprehend and punish the offenders.	Remarks.
One monument, No. 25, displaced; measured 3½ feet in length; one foot of top dressed smooth, one foot square and lettered; on north side number of miles from place of beginning; east side, capital P for Pennsylvania; south side, 1881; west side, capital O for Ohio. There are 23 monuments in Crawford county line; between Ohio and Crawford county are all white sandstone, all lettered and numbered as above; beginning at No. 9, north end, and ending at 32 south end.	Between October 13 and 19, 1887, by Scott A. Marshall and Henry P. Marly, County Commissioners of Crawford, Pa.	No. 9 two corners off, letters or figures not mutilated; No. 12 one corner off; No. 16 one corner off, letters or figures not mutilated; No. 18 mutilated by being shot into by rifle balls; the O on west side destroyed; the figures "1" and "8" in 1881 on south side destroyed; No. 25 turned over on side; set in marsh or swampy ground; No. 30 has two corners off; letters and figures all right.	No. 25 has been replaced; no repairs deemed necessary on any of the others.	Not any.	

MERCER.

Number or style of monument, mile or index stone, or other landmark.	When examined and by whom.	Condition—(If mutilated or disturbed state to what extent.)	If mutilated or disturbed, what action has been taken to repair or replace.	What action has been taken to apprehend and punish the offenders.	Remarks.

LAND LINES AND CORNERS.

The continued increase in value of landed properties throughout the Commonwealth demands, on the part of surveyors, civil engineers and land owners, a more careful study of the methods of tracing and marking boundary lines, with a view to the discovery and adoption of the best practical means for determining the true location of original lines and corners, their reëstablishment and preservation, and the marking of new lines in such manner that no reasonable doubt can be raised in the future as to their authenticity and correctness. Experience has shown that as lands increase in value the owners become more sensitive in the matter of the location of their lines, and no more bitter disturbance of the social state of a community can be created than by calling in question the location of such lines. The peace of old settled communities has in many cases been disrupted by the retracing of old farm lines. This occurs where lines have been recognized and looked upon as well established by a number of succeeding generations. In course of time the living monuments—line and corner trees—die and decay, and nothing being planted to mark the place where they stood, disputes as to their original location are almost certain to follow. Such cases usually culminate in expensive litigation which does little toward restoring social harmony and often as little toward determining the original location of the lines and corners in controversy.

It would seem that much good might be accomplished if the land owners would erect good stone monuments at corners and along lines that are known and recognized as correct by the persons directly interested, and especially where line and corner trees have died and disappeared or are disappearing. By this suggestion is not meant the setting in the ground of unshapely field stones, a few inches in size, that bear no indications of purpose or design, but carefully dressed stones several feet in length and a foot or more in width and thickness, with *their base well set below the frost line.* It would also be eminently proper to have the date of setting and names of adjoining land owners carved thereon. Stone monuments set in this way would be regarded with veneration by the generations to come, and few surveyors would be found inclined to disregard their evidence and value as landmarks.

We would suggest, in addition to the above, that original corners ought also to be preserved (even if they have by subsequent subdivisions or other changes ceased to form the corners of present boundary lines) because of their value in retracing original lines and the relation of the subdivisions to the original lines.

MAPS, REPORTS, &c.

Under the act of May 8, 1876, maps and reports have been numbered and filed among the department records during the past year as follows, to wit:

Railroads.

No. 53. Schuylkill and Lehigh Valley railroad. Map showing the location of the road from the Lehigh Valley railroad near Bowman's station to Schuylkill Haven. Filed February 4, 1887.

No. 54. Schuylkill and Lehigh Valley railroad. Map showing a section of four miles of surveyed and located line from Schuylkill Haven to Indian Run. Filed February 4, 1887.

No. 55. Schuylkill and Lehigh Valley railroad. Report of the preamble and resolutions of the board of directors in relation to the surveyed lines of the road, accompanying maps No. 53 and 54. Filed February 4, 1887.

County Lines.

No. 120. Map of the boundary line between the counties of Beaver and Lawrence. Filed May 27, 1887.

THE MAGNETIC NEEDLE,

By authority of the act of 1850, the county commissioners of each county were required to establish at or near the county seat a true meridian line and a fixed standard measure of two and four pole chains; and the surveyors, during the month of April in each year, were required to adjust and verify their instruments by the meridian lines so established, with a view of securing uniformity and correctness in the establishment of lines, as well as to determine the annual variation or declination of the magnetic needle. In answer to questions sent out to county and other surveyors, we have received much information of a practical nature which will be of use and interest to those who have made a study of the peculiar movements of the needle. The act of 1850, however, is not accomplishing all that we may suppose its framers desired, as many of the county authorities have never obeyed its plain mandates regarding the establishment of meridian lines. Our reports show also that in some instances the monuments by which the lines were established have become displaced or moved to the extent of destroying the line formerly established. In addition to this, the most fruitful cause of difficulty arises from local attractions which render it impossible for surveyors to make any tests of value as to the annual declination or to satisfactorily adjust their instruments. Most of these meridian lines were established in court-house yards, where at the time of their location they were comparatively remote from influences that would materially affect the needle. Improvements in these court-house yards have brought substances, such as iron fences, iron sewer pipes, telephone, telegraph and electric light wires, in such proximity to these meridian lines as to destroy their use and only confuse surveyors who attempt to make tests according to the act of 1850. It therefore follows that the present law fails largely to be as effective in producing accuracy and uniformity in surveying as it was designed it should be.

Some of the reports show great care and intelligence on the part of the surveyors, and they will be read by the profession with great interest.

We print a large number of extracts from these reports and also submit a table compiled from them and other reliable sources showing the variations of the needle.

ARMSTRONG—Samuel B. Cochran.

1. There is no meridian line established in this county. It appears that the county does not own a foot of land outside of a court yard too small for such a purpose.

2. My observation is that the present declination of the needle is from 3° 30′ to 3° 45′ in this county. At Freeport, Pa., it is very accurately 3½°, and seems to progress at the rate of about 4′ per year.

3. Having been a surveyor of this county for only about five years, I form my conclusions mainly from tracing well established, marked lines, and with the calculation of 4′ per year on bearings of not over forty or fifty years' standing, I have been able in nine cases out of ten to find the correct line.

5. I would recommend that the county commissioners purchase a plot of ground of sufficient size and establish a true meridian line thereon. It would certainly save much trouble and might prevent a great many lawsuits that now originate in a slight difference in the the magnetic bearing of surveyors' compasses and transits.

BUTLER—B. F. Hilliard, C. S.

2. Since April, 1875, to November, 1887, 0° 33′+.

3. Lines run since 1815, an allowance of 2′ 6″ will re-run them correctly.

4. To compel a better system of chaining by the use of a light steel chain, or steel tape, and incompetent persons not to be employed to chain. In my experience nine-tenths of the mistakes in the original surveys of location and in recent surveys are the result of bad chain measurements.

BLAIR.—O. M. Irvine, C. S.

2. Reports of my predecessors show the worthlessness of the meridian line in this county. From other and more reliable tests I find the present declination to be 4° 27′. My observations in the years 1879, 1880 and 1881 showed that the rate of progression had been greatly accelerated during that time—amounting to 22′. For the last year or two the movement is scarcely perceptible. May this not be an indication that the western limit has been reached, and that the needle is about to start, or has started, on its return swing?

3. We have in this county several large bodies of land called the "London lands," from the fact of their having been owned by London Land Company, which were surveyed in 1766, and as the work was done with unusual care, judging from its accuracy, the lines furnished an admirable test for ascertaining the difference between the bearings then and now. In April, 1885, I had occasion to run one of these lines, 1,132 perches in length, the original bearing of which was N. 44° E., and found it to be N. 45° 5′ E. Now deduct from this the sum of the average annual progression for seventeen years, and we find that in the year 1868 there was no variation on these lines; thus, apparently requiring about one hundred years to accomplish one-half the cycle.

4. An act compelling land owners to put in permanent stone corners, dressed in some peculiar design, would fix the boundaries and prevent a vast deal of litigation. A prolific cause of inaccuracy in surveying is the employment of careless, ignorant, and oftentimes vicious chain carriers. In my practice I find it quite impossible to impress the average chain carrier with the importance of *all day* watchfulness and care. Then, too, great haste is a fruitful cause of bad work; but I don't see exactly how this evil can be regulated by legislation.

5. The appropriation of nearly all the vacant land in the State renders the office of county surveyor a thing of ornament only; but Messrs. Laird and Eldred, of Lycoming county, in the report of 1884, point out how this office can be made useful above that, perhaps, of any other in the county, and one through which the comfort and happiness of all who have occasion to use, *or look at*, the public can be immeasurably enhanced. The happy-go-lucky manner in which the public roads in too many counties of the State are opened and maintained is a melancholy blot upon our civilization, an inexcusable drain upon the public purse and a temptation to violate the letter and spirit of the third commandment, which the adoption of the suggestions above referred to would effectually remedy.

CAMERON—V. A. Brooks.

1. A meridian line has not been established in this county.

2. By retracing the district lines and lines of 1793–4, we find the declination of the magnetic needle to be 4° 45′ west, or nearly so.

4. I would recommend the passage of laws to compel owners of tracts, where the original monuments are yet on the ground, to have stone monuments put up at corners on base lines, and on district lines where the tracts may corner, as in this rough and hilly country the measurements are imperfect, and a measurement taken now would no doubt change the lines on most of the surveys.

5. In running lines with plain compass there are likely to be many errors from local attraction and other causes. I would suggest that there should be in all important lines stone monuments put up, so as to save great inconvenience in the future, and where practicable, such lines should be run with transit and back sights taken very carefully. If the corners so put in could be marked with date of survey and declination of needle they would be good guides to surveyors who may come on the lands in after years.

CENTRE—John H. Reifsnyder, C. S.

1. A meridian line has never been established in Centre county.

3. The valley lines of 1766 do not seem to vary much, but the lines of 1794 vary from 3° to 3½°.

4. A law should be passed, with a penalty attached, compelling parties in making surveys to establish monuments.

5. Most of the surveys in this county were badly made. There are plenty of farms with but one or two established corners, and the work of retracing lines without any measurements or data is very difficult.

CUMBERLAND—J. C. Eckels.

1. A description of the meridian line was given in a former report.

2. Present declination of the needle from the true meridian is 4⅜°. Progression since its establishment, in 1854, to 1887 is 2⅛°.

The surveyors' registrations throughout have a variation of about ¼°, which is owing to a want of accuracy in adjusting.

3. There are many lines well fixed by the living monuments on the ground. When these are gone the lines will be difficult to re-establish, because you could not adjust an instrument to strike all the marked monuments when on the line before removal.

DELAWARE—Benjamin H. Smith.

1. A meridian line was established at Media, the county seat of Delaware county, in conformity with the act of April 26, 1850. It was marked by two stones about 300 feet apart, the northerly one being in the court house square, near an iron fence, and the southerly one in the sidewalk on Olive street, near a large brick dwelling house, both points therefore liable to local attraction. Date of establishment unknown, but probably soon after the passage of the act.

2. Not observed.

While practicing surveying in this county from 1860 to 1880, I was in the habit, in common with other surveyors, of adjusting my chain

with the standard measure in the court house and taking observations on the meridian for declination. The results were recorded in a book kept in the prothonotary's office for several years, Since the receipt of your circular I have made a careful search for this book, but am unable to find it. The present land surveyors here do not appear to have ever made any use of it, and the requirements of the law of 1850 are at the present time entirely ignored.

4. Surveyors should be required, if practicable, to return all surveys with the lines deflected from the true meridian, which should either be established by a solar transit or by astronomical observations. The use of the needle alone for making surveys should be strictly prohibited. A standard measure should be established by the State in every county town. Dressed stones, properly set in the ground, should be required to constitute legal corners.

A State triangulation survey under direction of your office would be of great advantage towards securing uniformity in land surveys.

5. It has been customary in this county to take the angles or deflections and calculate the courses therefrom, taking as a basis the side least affected by local attraction. This, of course, secures as great accuracy as far as the resulting area is concerned as though the boundaries had been referred to the true meridian, instead of the magnetic. But on account of the constant change in declination the practice has resulted in a want of uniformity in the returns of surveys, so that in tracing a title back the same line will apparently have as many different bearings as dates of surveys.

Solar transits are now made to determine the meridian to a minute, and their general use as suggested would, I think, give very satisfactory results and cure the defects in the present system.

W. H. Flaville.

1. In my report to your office in 1883 I gave the particulars regarding the establishing of a meridian at Media, the county seat of Delaware. Everything remains as then reported. There is no register, no standard distance, and no notice whatever is taken of the law. Whilst all will concede its excellence, if duly observed, why not amend the law by imposing penalties that will insure its effectiveness?

2. The declination of the needle in 1850 was 5° 30′ west; in 1883 it was 7° 35′ west; in 1887 is 7° 55′ west, or a progression of, say, 4′ annually.

3. I can only repeat my suggestion regarding additional legislation that there should be some law regulating the practicing of the surveyor and engineer, requiring full proof of his qualifications and efficiency before some board or tribunal duly authorized by law to pass thereon.

ELK.

Wilcox, Elk Co., Pa., *December 10, 1887.*

Hon. Thomas J. Stewart,

Secretary of Internal Affairs:

Dear Sir: Without any attempt to explain causes, I desire to present the result of my observations and experience with the magnetic needle, and its changes of declination, both annual and diurnal. The original surveys of the lands lying in this county were made during the years 1793–94–95.

My experience has been that an instrument properly adjusted to the "true meridian" will follow very closely the original surveys which were made at the point of the needle without adjustment. This fact leads me to the conclusion that the territory of this county, was at that date, 1794, lying within the belt of magnetic and true meridian coincidence. In June, 1852, when I began work, the declination of my needle was 2° west. It is now 4° 20′ W.; annual change, 4′. Whilst this is the average, I do not wish to be understood as attempting to say that the movement has been uniform during these years. All who have observed the fluctuations in the movement of the needle for the last eight years, will agree with me in saying that the change has not been uniform. However this average of four minutes will aid in solving some of the problems that have forced themselves upon the surveyors in this county. It will readily by calculation be seen, that the magnetic center was moving eastward when the original surveys were made, and that it continued to move in that direction for a dozen years afterwards, the change to the westward evidently beginning about the year 1807. This movement to the westward brought the belt of magnetic and true meridian coincidence over this county again about the year 1820. At this period, or near it, the needle began to diverge to the westward, and has continued to do so until its declination has reached the amount named. The change of the magnetic centre, as already set forth, explains why surveys made during the years 1885–6, at magnetic courses, diverge to the eastward from the original surveys, while those made about the years 1819–20–21, so nearly coincide with them.

The rapid decline in the westward movement of the magnetic center during the past two or three years, until there is at present no perceptible change (if any it is to the eastward), brings up the question, have we not again reached a transition period? Of course there may be others, and perhaps temporary influences, that are neutralizing the forces of the magnetic center which will soon subside, and the needle make another 1879 leap, setting the surveyor frantic and ready to condemn his instrument without the "benefit of clergy."

While the needle is somewhat capricious in its annual change, it is very much more so with respect to its diurnal fluctuations. The influence producing the change, whether solar, change of temperature, or other causes, steals so silently and stealthily upon the needle that the surveyor has no intimation of its presence until he finds himself producing curves instead of a straight line. On one occasion I found this change to reach twelve minutes (12′) during the working hours of a day. It was during the autumn of 1879—the year of great magnetic disturbances.

Yours truly,

J. L. BROWN.

John Wainwright.

3. Change of 1° during past ten years. In the township of Benezette the present variation is $4\frac{1}{2}°$.

4. Impossible to make anything like accurate work with inexperienced chain carriers. They ought to be selected by the surveyor. All warrant corners ought to be replaced by stone, or anything substantial, under direction of the county surveyor.

ERIE—David Wilson.

1. Meridian line located in cemetery at Erie, in, I think, 1854. Marked by two marble shafts about three feet high, with a crease cut in the side of each, painted black.

2. Cannot tell, as I quit surveying several years ago on account of my age and live thirty miles from where the records are kept. All the compasses do not agree in the account of declination, but I think they will average a little over 3° in this county. When I first tested my compass by it in April, 1855, the declination was 1° 27′ to the left. Its progression since then has not been regular, some years more, some less.

4. I have no plan of a law which I wish to recommend. Land owners are not careful enough to keep up their landmarks as made by the surveyors. The corners are generally marked at first by a post, which rots away and the place is lost. But I do not see how this can be prevented by legislation.

5. The surveyors of Erie county have generally adjusted according to law, but all have not done so.

FAYETTE—Andrew J. Gilmore, C. S.

1. We have no meridian line—see my report, 1885.

2. Having no meridian, cannot give the variation at this place. On the Washington county meridian, my transit shows a variation of 2° 35′ west of north—compared on the 15th of August, 1887.

3. In addition to my former reports, I would say I ran a part of the line between Washington and Greene counties last August, with my transit set to read the bearings by the Washington county meridian, and found that I had to add 1° 30′ to the south-west courses and subtract the same from north-west courses, on lines that had been run in 1798, the original survey. In 1802 a change was made in part of the line, and on the lines run at that time, there was a variation of 1° 45′ in the same direction, making a difference of 15′ in four years. There were no marks on this line, but the description of the original survey gave the contour of the grounds, and my having corresponded with the contour as given, and was satisfactory to the other members of the commission, R. V. Johnson, of Washington county, and James B. Smith, of Greene county, both practical surveyors. Whole distance run by the old notes, 26½ miles.

Uniontown, Pa., *October 29, 1887.*

Hon. Thos. J. Stewart,

Secretary of Department of Internal Affairs:

Dear Sir: Following please find copy of entries (since June 1, 1883,) found in book for recording variations of surveyors' compasses:

A. J. Gilmore, April 7, 1884, 2.30 p. m., variation, 3° 22′ west of north.

A. J. Gilmore, April 14, 1884, 10 a. m., variation 3° 18′ west of north.

Thomas Hazen, May 26, 1884, 9 a. m., variations 2° 54′ west of north.

Very respectfully,

S. B. Rothermel,

Clerk for Commissioners of Fayette county, Pa.

FOREST—Samuel D. Irwin,

1. No meridian line ever established by our county commissioners, as required by law.

I have a dial made of marble, which gives it the style or gnomon, which I set astronomically on the north star (polaris) on June 21, 1876, (summer solstice); but no regular meridian line was ever made here.

3. The only mode by which we can determine is by a change in the old lines of tracts. In this county are two sets of original surveys, viz: The surveys of John Broadhead, made in 1793 mostly, and includes the Leroy & Linklain, Nichelson, Wilhelm, Willuck and other patents; and Erwin Williams, the Mead, Mefflin, Biddle and other warrants. Now the best informed surveyors find that the variation on the Mead tract is as near 3° 45′ as could be stated, while on the Broadhead surveys about 4° runs the ancient lines. The cause of the difference in these two old surveys is not accounted for by time, as the surveys were both originally made within a year of each other. So we must account

for it in some other way. There are many causes, such as imperfect graduation of the old Rittenhouse & English compasses used, needles not properly polarized or charged, habits of surveyors, carrying too much wire about their person, running lines when the air was charged with electricity, and a score of causes that might create differences. That many of the old compasses were defectively graduated or imperfectly charged is well known to experienced surveyors who have examined the instruments. The writer has a Rittenhouse made about 1802, which belonged to his father, Richard Irwin, a surveyor of fifty years' experience, the graduation of which is perfect, but is a decided exception to most of the old instruments. Dr. Kane, in his Arctic Explorations, says substantially, "as I went on north, I still found that unaccountable variation of the needle." If that variation was regular in each decade, it would be a simple question to solve; but the declination is irregular, as is well known, rendering experiment necessary to determine it. The action of the needle seems subject to no known law; there are diurnal changes, as well as yearly.

4. That the surveyor be required to have the best instruments, with Vernier attachments of perfect character, keep the chains and axes about ten feet or more from the compass, wear no hat with a steel rim, and carry as little wire or metal about him as possible. F. F. Whitaker, a surveyor and civil engineer of eminent ability, suggests that the surveys of this section during the oil excitement were "fearfully and wonderfully made." From my experience of about thirty years in this State and Kansas, I am of the same opinion, as lines were run here by artists from every section of our beloved country.

As to monuments and their preservation, I would suggest increased penalties in the law for men who wantonly remove them. Solomon says, "Remove not the ancient landmarks." Then I would suggest, especially in unsettled and wild portions of the country, better landmarks, stones marked with a letter or some figure. Then I would "tie" them by bearings and distances to a tree cut with a marker, or axe figures, facing where possible—thus, "XV," for fifteen feet—and have as many of them as possible. The old three hacks gives no idea of distance the witness tree is from the corner. Then I would take the bearings of these witnesses from the corner. Where no trees or living witnesses are, I would use stone sunk in the ground, similarly marked.

Henry C. Whittekin.

1. Our commissioners will not purchase the ground suitable for a meridian. They say it is not necessary to establish a meridian or a standard measure. I am ready at any time to do the work. I have called their attention to the law.

3. Lines of 1794, 4° of variation.

4. That the Assembly pass an act to place stone monuments where there are original corners.

FRANKLIN.

Upper Strasburg, *Franklin Co., Pa.*
October 24th, 1887.

Hon. Thos. J. Stewart,
Secretary of Internal Affairs, Harrisburg, Pa.

Dear Sir: I herewith send you my report on meridian lines, and the variations of the declination of the needle, as manifested at the county meridian as well as here, about ten miles northward of the first-named meridian, where I have a line which I established some years ago for my own use, and upon which I observe frequently and have collated a few of them in tabular form.

It is an intensely interesting subject, and I feel very much rejoiced that you have also taken the matter in hand, for, in this way a great amount of valuable information will, in time, be collected and preserved which may throw much light upon the somewhat hidden mysteries of terrestrial magnetism. It is a pleasure to know that Prof. C. A. Schott, of the Coast and Geodetic Survey, in his valuable paper in Appendix No. 13, Report of 1882, quoted very largely and copiously from the reports of 1876-7-8 (as Secretary Dunkel did not send out blanks during his term these were the only reports then out) and I expect in the next report (1886) his sixth edition of the same papers will be still further enriched by matter taken from the later reports of your Department.

Thus you see these statistics gathered and reported to your Department will not only be preserved in permanent form, but will also find their way to the Bureau of the Coast and Geodetic Survey at Washington, and used by one of the greatest mathematicians in the land, if not in the world.

I only regret that hitherto so few of our surveyors have responded. Some of those best qualified to do so, either for want of time, or inclination, not having been heard from, or if at all, but seldom.

I should be very glad to find that George Platt of Erie county, A. J. Gilmore of Fayette, and James Brooks of Jefferson county, have been heard from again.

I am, very respectfully yours,
John B. Kauffman.

John B. Kauffman.

2. The declinatation of my needle at the county meridian at noon, April 26, 1887, was 3° 58′ west. The same needle at 10.40 A. M., April 27, 1886, showed a declination of 3° 57′ west, the apparent change during the year, being one minute westerly, and the change since the establishment of the meridian, two degrees and nineteen minutes, and an annual change of 3.97 minutes. Eight surveyors and engineers were present the day above named, and two days later another surveyor tested his instrument. The results are shown below:

Surveyor or Engineer.	Kind of Instrument.	Date.	Hour of day.	State of weather.	Declination.	Remarks.
John W. Kuhn,	Young's Vernier compass,	April 26, 1887,	10 A. M.	Clear and pleasant.	4° 00′ W.	Vernier reads to 5 minutes.
A. G. Kauffman,	Plain compass,	April 26, 1887,	10 A. M.	Clear and pleasant.	4° 00′ W.	No Vernier.
F. J. Pfoutz,	Heisely plain compass,	April 26, 1887,	10 A. M.	Clear and pleasant.	3° 52′ W.	No Vernier.
G. M. Stenger,	Gurley plain compass,	April 26, 1887,	10 A. M.	Clear and pleasant.	4° 00′ W.	No Vernier.
W. M. Gillan,	Draper Vernier compass,*	April 26, 1887,	11 A. M.	Clear and pleasant.	4° 00′ W.	Vernier reads to 5 minutes.
Jno. R. McElroy,	Gurley Vernier compass,	April 26, 1887,	11 A. M.	Clear and pleasant.	3° 57′ W.	Vernier reads single minutes
Jno. B. Kauffman	Gurley solar transit compass,	April 26, 1887,	12 M.	Clear and pleasant.	3° 58′ W.	Vernier reads single minutes
A. S. Winger,	Gurley Vernier compass,	April 26, 1887,	12 M.	Clear and pleasant.	4° 18′ W.	Vernier reads single minutes
H. E. Wertz,	Heisely plain compass,	April 23, 1887,	.....	.....	4° 00′ W.	No Vernier.

*Same instrument formerly tested by Hon. James D. M'Dowell, deceased.

The average as appears by the above table, is somewhat greater than shown by my instrument on that day. The average declination of nine instruments is 4° 0′ $33\frac{1}{3}$″, and the average change since April, 1852, is 4.03 minutes per year.

On my meridian line, at my home, I have made observations at various times during the year, that seem to agree pretty well with the average obtained at the county meridian.

TABLE OF OBSERVATIONS.

Date.	Hour.	Number of observations.	Average December.	Corrected December.	Probable Error.	Average.

It will be observed that the fluctuations in the movements, are of considerable amount, and prove to the observer, how variable are the diurnal changes of the needle, some days, being small in amount, and on other days, quite large, reaching twenty minutes or more. The above corrections made for diurnal variation, were taken from a table compiled for Philadelphia from daily observations taken there at all hours of the day, during a period of several years. They are, however, the monthly averages obtained by these observations, and are the most probable values, but as some days there is little or no change at all, it is evident that on other days, it may rise to double the average. Hence these corrections are rather uncertain.

3. Under this head I have little to add. I however find by allowing the quantities as found in a variation table, constructed from a formula obtained especially from observation equations of allowances made on old surveys of various ages, I can approximate quite closely in retracing old lines. The formula is: Declination—2.47°+2.95 Sin (1.5517 m—21.7°) +.18 Sin (5.2 m+154.°) where m represents the number of years from 1850.

An earlier formula, and about as accurate is: D—2.43°+2.90 Sin (1.55 m—27.7°) +.12 Sin (5 m+140°). Of course they differ somewhat in results, but not very largely. I have found the numerical values for each year, and they form a useful table in the surveyor's field book, from which the approximate change to be allowed, can be found at once by inspection. It will however be understood, that no provision is made therein for diurnal and electrical changes, or the peculiarities of individual instruments.

Prof. C. A. Schott, last spring, computed and constructed a formula from a much larger number of observations sent by me, than from which my own were constructed. His formula is: D—2.7908°+3.101° Sin (1.55 m—30.6°) +.15 Sin (4.6 m+124°) Epoch also 1850. He admits that his and mine produce nearly the same values.

4. I would be in favor of a law forbidding the use of needle instruments, unless capable of taking angles independently of the needle and requiring the substitution of steel tapes, or other improved measuring appliances, instead of the old-fashioned, clumsy and ever varying chain; and that surveying boundaries of lands should be confined to surveyors who understand the business, and weed out that numerous class who have brought reproach upon the profession.

A better class of surveyors, and better instruments, mean better work, and consequently better pay, and the elevation of the profession.

I would be in favor of legislation appropriating, a reasonable sum each year, to lengthen the season, the coast and geodetic survey parties who operate in this State, can remain in the field. The survey must and will be brought to completion some day. At present for want of sufficient funds, they can operate but a short time each season. The

expenses of going and coming are the same, be the season long or short. If the survey were pushed, surveyors and others, could take advantage sooner of the checks, the lines and angles would furnish, which would certainly be a long step towards the "greatest attainable accuracy," and a further inducement to place more permanent monuments to mark the boundaries. I would also favor a law making the provisions of the act of April 26, 1850, more imperative and effective, and changing the month for testing instruments to some particular day in a pleasanter month than April, May, or even September, would be preferable.

5. In order to mark the corners of tracts more permanently, it is the practice of many surveyors to collect some broken glass, broken pottery or stone coal, and place it under the stone, which is then firmly set. When lime is attainable and convenient, I would suggest drilling a hole several feet deep in the earth, and filling it with slacked lime, made a little thicker than the consistency of cream. This will set and harden very much like cement in grouting, and will show for years, if needed for identification. It is used in some parts of the west, and has been very satisfactory wherever adopted, and it seems to me, would be worth a trial here.

John W. Kuhn.

1. See former report.

2. The variation of my Vernier compass on April 26, 1887, was 4° west. A. G. Kaufman's, William M. Gilliland's and Hon. George M. Stenger's showed the same. County Surveyor John B. Kaufman's solar transit was 3° 58′; T. J. Pfoutz (plain compass), 3° 52′; J. R. McElroy (Vernier compass), 3° 55′, and A. S. Winger (Vernier), 4° 19′. The average variation of the eight instruments made between the hours of 10 and 12 A. M. of the same day, was 4° 30″.

Progression, since April, 1852, (35 years), is 2° 21′ 30″. Average annual change 4′ 2.57″. A. G. Kaufman and William M. Gilliland's are also Vernier compasses.

3. During the past eighteen months I have re-surveyed quite a number of lines (several hundred) of the lands owned by the S. P. R. R. and I. Co., located in the neighborhood of Fort Loudon and Richmond, and also for the heirs of A. Ritchey, deceased. These lands lie along the western border of our county, along the Tuscarora mountains, extending from near Cove Gap to Cowan Gap. Most of the lines which I run had been originally surveyed about the year 1794—a few in 1792–3. These lands being located fully sixteen miles west of our "meridian line" would make the true variation probably about $3\frac{1}{2}°$ (or perhaps a little more) instead of 4°.

When I had my Vernier set to the true bearing of our meridian line, I could run out these old lines without any, or at least very little, change. Hence I conclude that in 1794 the variation here was about

$\frac{1}{2}°$ E. On a number of these lines I found originally marked trees to verify by. On several lines north of Fort Loudon, and on the Kittochtinny side, surveyed in 1785, I had to allow about 7′ east to trace the lines correctly.

One line originally surveyed in 1762, and bearing N. 47° W, now bears with Vernier at true meridian, N. $48\frac{3}{4}°$ W., a change of $1\frac{3}{4}°$ west. In March, 1782, a tract of land was surveyed in Montgomery township, about eighteen miles south-west of Chambersburg, and within about three miles north of Mason and Dixon's line. One line on this track running S. 48° E., forty-four perches, and distinctly marked by original trees along the line, in 1877, having my instrument adjusted to the true meridian, I run the line out exactly by the original bearing. In 1881, and also in July of 1887, while making certain divisions, I again run said line with the same result.

In August, 1818, the borough lines of Greencastle were surveyed by Archibald Flemming, C. S., when the bearings of the streets were N. 18° E. and S. 18° W. and N. 72° W. and S. 72° E. In August of this year I run the lines with my instrument adjusted to the true meridian, N. $18\frac{1}{4}°$ E. and S. $18\frac{1}{4}°$ W. and N. $71\frac{3}{4}°$ W. and S. $71\frac{3}{4}°$ E. Hence in 1818 the variation was about $\frac{1}{4}°$ E. and it seems the magnetic pole was progressing very slowly westward. It is difficult to ascertain just when it had reached its farthest east point, as I do not find many drafts on record of this time.

FULTON—William P. Gordon.

1. Meridian line established in 1883 in vacant piece of ground on the west side of the court house, marked by two monuments, one in the south and the other in the north end of said lot of ground. They are planted perpendicular, and from scientific tests, seem to be nearly or about correct. (A former description was, I think, given by Jonas Lake, ex-surveyor.)

2. I am unable to give all the changes of different surveyors' needles, but from entries in the book provided by the county commissioners, the average is about 4° west of north for 1887—the present variation.

3. Counting the growth of line trees, standing on the logical course of line, is in my practice, the determination of an original line. Other monuments, and unmovable points, are good evidence of the place of first location of line and corners.

4. Some legislation, that would make those concerned in landmarks and corners feel the importance of not letting lines get obscure, and a severe penalty for removing landmarks or monuments by wicked persons.

HUNTINGDON—John E. Ketterman, C. S.

1. Commissioners established no meridian line at our county seat. Can find no book of records in which the magnetic bearings were kept.

2. On August 31, 1887, in company with Hon. J. Simpson Africa and J. Murray Africa, made tests of our instruments on true meridian line, about three-fourths mile on the north-eastern limits of the borough of Huntingdon, established by the Hon. J. Simpson Africa, Ther. 80°—found the variation to be 4° 38′ strong west.

3. Observations of the bearings on a fixed line at my place 15 miles southwest of Huntingdon, gave the following results. Same instrument:

March 7, 1883, ... S. 36° 30′ W.
June 21, 1884, ... S. 36° 35′ W.
September 20, 1886, ... S. 36° 45′ W.

Average progression for about 3½ years 4′ 17″.

INDIANA—R. L. Slaymaker, C. E.

1. There is no meridian line in this county or standard measure.

3. The only test we have to note the progression of the needle, is from marked lines, and by retracing old lines where the corners are known to be reliable. I find 4′ per year to be the progression for this county.

4. None, except requiring stone corners to be put in as soon as possible after a new survey, and replace living corners with stone as fast as they rot away.

5. The reason why a meridian line has not been established is, there is no suitable place near enough to the county seat to establish one, and as the county does not own any land except the ground on which the court house and jail are, and the buildings occupying all of it, there would be difficulty in getting a place near the court house or town without paying high for the privilege, and unless the county has control of the grounds, it would be almost impossible to preserve the monuments marking the line.

I use a steel tape, as it is less liable to change.

I test my own chain.

INDIANA—John R. Caldwell.

1. No meridian line established.

I put up a temporary line this summer for my own use.

2. Present declination—3° 45′.

3. On fixed lines in N. E. part of county, average 3° 40′.

4. A suitable stone at every corner, now or hereafter made.

JUNIATA—B. F. Burchfield.

1. There is no meridian line established in this county. I, when county surveyor, brought it to the attention of the commissioners each year, but nothing was done. There is no chain standard measure. No surveyors are registered. All test of instruments and chains by meridians and standards, must be made in some other county.

3. The only tests of instruments that can be made here, is by trac-

ing lines which are certain, and there are very few. Such retracings are pretty reliable tests.

4. In this county there are but few of the original markings of boundary lines and corners remaining, that are absolutely certain—and they are fast disappearing. Legislation, to compel the retention of those yet remaining, or, the re-markings of same, if destroyed, would be of great advantage. Where the trees, being original corners, have become so old as to make it impossible longer to preserve them as markers, the county should furnish a stone, with such an inscription, as to distinguish the corner or lines to be planted in place of the tree, and that, on application of the owner of the land, or the county surveyor. The owner of the land, should be compelled to report such corners liable to be destroyed.

M. F. Macahan.

2. I have two trees for my own observation, one north of Mifflintown, from walnut tree south 11° E. about 240 perches to steeple of Juniata county court house, the other from Snyder's advertising post in Miliford township, north 51½° E., about 320 perches to the aforesaid steeple. I use one as a check on the other, and find that the declination has been from three to five minutes to the eastward. Whether this declination is diurnal or magnetic I cannot say.

4. Think there should be additional legislation as regards the establishment of monuments, especially corners. Every surveyor will agree with me, that in many instances they have to use their own judgment as to location of corners destroyed with road making, stone piles, and by wind falls, &c.

5. I would suggest the establishment of more witness corners, for instance, a cliff of rocks, the corner of a house wall, or any permanent object.

In surveying, I take angle to some object and put it on my field notes—this method I find of great use to me in after years.

LACKAWANNA—J. L. Lawrence.

2. In 1879, P. M. Walsh, the first county surveyor of Lackawanna, county served on a commisson to mark out boundaries of this and Wyoming county. While thus engaged, he took astronomical and solar observations to determine the variation of the needle, and found it to be 6° 24′ west.

In 1881, Mr. Ashburner, director of the Second Geological Survey of Pennsylvania, established an astronomical station at Wilkes-Barre, in the adjoining county of Luzerne, and among other points of information found the variation to be 6° 30′ west. Now the ascertained change of variation in this locality, is 3′ of arc in a year, increasing westerly, which makes the variation found by Mr. Walsh, agree with that found by Mr. Ashburner; and according to the same ratio of increase, the variation now should be 6° 48′ west.

LANCASTER—John C. Lewis.

1. Perhaps two years after the passage of the act of 1850, the commissioners of this county, apparently with great reluctance, established and marked what was called a true meridian, and gave the required notice in the month of May of the same year. During the twelve months following, about thirty surveyors registered, only three of them in April, as required by law. The next April three registered, two of them having registered before, and one new one. I was one of the three in each case. The following April I registered alone. This, so far as I know, was the last entry ever made in the surveyors' book. The line was established, I think, in May, 1852, and was marked by three stones set in the jail yard, the extreme ones being perhaps 20 perches apart. The chain measures were marked on the stone foundations of the iron fence of the yard.

2. In three years from their first establishment one of the terminal stones of the line had disappeared, and no care being taken of the others, they followed in quick succession and I am not aware of either of them being in position to-day. No other line, so far as I am informed, has ever been substituted. It is, of course, impossible to state the present declination of the needle from such a "true meridian," nor its progression since its establishment. I made some observations of my own last fall, from which I inferred the present declination to be about $4\frac{1}{2}°$ easterly; but the observations were so imperfect that I place little reliance on them. I have no established meridian of my own with which to make comparisons. If these premises can be relied on the, the progress of the declination is a little over $3\frac{1}{2}'$ to the year, or a little less than 1° in 16 years.

3. I have retraced some lines that exactly indicate a variation of 1° in 16 years. Some others vary slightly from this, but I find in my practice that this comes nearer to tracing old lines correctly than any other that I can adopt, and accordingly I make my corrections generally on that basis, subject to the controlling circumstances of each particular case.

4. In the prevailing carelessness and want of interest in the subject, it would be very difficult, not to say impossible, to adopt any additional legislation that would secure the object. The cheapness of the survey seems to be of more importance generally, to the employer, than its correctness. Consequently haste and want of care are mostly the attendants of the survey, and inaccuracy the necessary result. The defect in the act of 1850 was, that while it provided a penalty for using an instrument not tested and registered as required, it imposed no penalty for a failure to return the survey from the true meridian, as also was required by that act. This might be remedied by an amendment to that act, and other provisions might be added. As far as this county is con-

cerned, the act of 1850 is a dead letter, and I fear that any other legislation on the subject would be little if any better. Better instruments and more care would, of course, improve the results; but as long as cheap work is the object of his employer, the agent employed has no inducement either to provide the implements or to take the care required, as he will not be adequately paid either for the one or for the other. There is also too little care in placing or retaining the corners already fixed and known.

5. In regard to the old "true meridian" of this county, it was never reliable on account of its location. One of its terminal monuments was placed within a very few feet of a heavy iron fence surrounding the prison yard, while the other was but little further removed from a wall surmounted by an iron coping, and of course subject to local attraction. The measures also of the two and the four pole chain, started from the corner stone of the iron fence, and was doubtless correct when first laid out; but when I last tested by it, this stone had parted an inch or more from that next to it, and would therefore, unless allowed for, increase its length unduly. The second two-pole, ending at the ending mark of the four-pole chain, remained intact and afforded the best test of a two-pole chain.

I suggest that the meridian line should have a much longer range, from some fixed point of observation to some prominent object, well-defined and not susceptible of change. Also, that the standard measures be marked at each end in such way as to be permanent and unchangeable, otherwise they will be of little service to the end proposed.

Calvin Cooper.

2. I notice in my practice a continuous declination of the needle westward, at the rate of about three minutes annually.

4. Accuracy in land surveying, is of the utmost importance. The farms, &c., of this section are of such irregular shapes, that the surveyor should use the greatest care and accuracy, in order to compute the correct area; his instrument should be in proper adjustment, and his chains of the standard measure, both of which should be subject to the examination of a competent person appointed by the State, whose duty it should be to examine all instruments and chains annually, and furnish a certificate for all that are in proper adjustment.

All surveys should note the declination of the needle at the time, and the surveyor be required to furnish a draft, with all the lines properly described, with the declination clearly stated, so that in future surveys, no difficulty would occur in finding the original lines.

M. N. Brubaker,

2. The present declination of the needle from the true meridian, is 3° 15′ west.

I frequently test my transit, and find it as above stated.

3. The only reliable method for retracing old lines, I find to be from

old established stones or trees. I cannot rely altogether upon the needle, on account of errors in former surveys, and local attraction in many localities.

4. I think there should be an act passed, compelling owners of land to put in dressed stones at each corner, of such a character, and of such prominence, that they could not be mistaken; and placed deep enough in the ground as not to be effected by frosts and other causes.

LAWRENCE—J. H. Miller, Civil Engineer.

1. A meridian line was established in the court yard in 1850 or '51. It is marked by two substantial stone monuments three and a half feet high, with iron points for holding the instruments. Distance apart, about one hundred and twenty feet. Have not tested their accuracy.

The record of tests of instruments shows what any practical surveyor would promptly discover, viz: that local attraction prevents the possibility of determining the variation of the needle by placing it on said meridian. The meridian line is but ten feet from the court house, a brick structure with six large stone columns in front, whilst an iron fence passes near to the monuments and buildings, interfering with the projection of the line, either northward or southward.

2. The following tests made by the county surveyors, I copy from the county records. The earlier ones, are probably the most reliable, there not being so much local attraction in the way of iron fences, lamp posts, (one of which is midway between the monuments and not more than twenty feet from line) electric light and telegraph wires, water and gas pipes, &c.

By James Pearson, recorded September 25, 1852, . .	N. 0° 12′ W.
By Henry Peason, recorded September 21, 1852, . . .	N. 0° 10′ W.
By James McClane, recorded November 4, 1852, . . .	Due north.
By James Oliver, recorded October 6, 1852, ...	N. 0° 7½′ W.
By Azariah Wynn, recorded November 9, 1852, . . .	Due north.
By R. D. Hudson, recorded October 9, 1852, ...	N. 0° 6′ E.
By Josiah McCaskey, recorded January 10, 1853, . .	Due north.
By Wm. F. Davidson, recorded February 3, 1853, . .	Due north.
By Robert Dilworth, recorded April 6, 1853, ...	Due north.
By Azariah Wynn, recorded May 3, 1853, ...	Due north.
Variations, Wm. F. Davidson, recorded April 5, 1856,	¼° E.
Variations, James Pearson, recorded May 5, 1856, . .	0°
Variations, James Pearson, recorded May 14, 1856, .	25′ W.
Variations, Henry Pearson, recorded May 29, 1856, .	½° W.

May 5, 1857, James T. Robinson, on setting compass between the monuments in front of court house, found the variation 1° west, and by placing the compass in the street, north of court house, the needle settled due north.

James McClane made tests same day with variation in front, 1° E. In street, north 5¼° W.

Henry Pearson tests two instruments the same day and finds one $\frac{5}{8}°$ and the other $\frac{1}{4}°$ east.

H. R. Cloak, November 5, 1875, finds variation to be 2°.

J. M. and C. F. Lawrence, June 8, 1876, finds variation to be 1° 25′ E.

H. R. Cloak, April 16, 1877, finds variation to be 2° E.

H. R. Cloak, August 14, 1877, finds variation to be 0° 49′ E.

C. F. Lawrence, February 6, 1882, finds variations to be N. 0° 35′ E.

C. F. Lawrence, April 10, 1883, finds variations to be N. 1° 45′ E.

C. F. Lawrence, November 2, 1883, finds variations to be 1° 50′ E.

3. The most reliable test in my experience is by taking the magnetic bearing of the Pennsylvania and Ohio State boundary line as readjusted. That portion of said line which bounds our county on the west near the south line of the county is a true meridian. The magnetic course of said line as taken May 21, 1886, at 5 o'clock P. M., I found to be N. 2° 38′ E. The point at which this bearing was taken is the south-west corner of Lawrence county and is free from local attraction. The boundary line between this and Beaver county was run and established in the year 1849 and recorded by the artist, Henry Pearson, as N. 89° E. He at the same time records the State boundary line as due south. In resurveying the line of Lawrence and Beaver counties last year we found the same to be S. 88° 10′ E, showing a change of about 2°, and corresponds nearly with the county record.

4. Such legislation as will prohibit the recording of surveys by magnetic bearings—requiring the reference of all lines, to some fixed line, or to the true meridian, to be determined by astronomical observations, and the angles measured by instruments with telescope sights and bearing to minutes.

5. It seems to me that each county should have a regularly appointed engineer, and that it should be his duty in addition to having charge of the bridgework of his county, to survey and mark with suitable monuments the township boundaries after the county boundaries have been fixed by commissions appointed by the courts of the counties interested. That he should keep a record of all monuments fixed by him, which record should be open to the examination of all surveyors wishing information relative to any such lines. By referring all county lines to the State boundaries, and all township lines to the county boundaries and all farm lines to the township boundaries, we would soon have a complete system from which accurate maps could be made, and by the aid of which land lines could be definitely determined, thus avoiding much of the vexatious and expensive litigation so frequently arising from the inaccurate and careless work of the past.

Carl F. Lawrence.

1. The location for the meridian line for this county has been given you in former reports. It does not seem to be reliable on account of proximity to the iron work of the court house, and is consequently not used to any great extent.

4. The passage of a law making it obligatory either on owners or surveyors to establish a permanent corner would be advisable. An iron rod, three-fourths of an inch round, and two feet long, driven into the soil one and a half feet, would make a permanent mark.

LEHIGH.—Francis Weiss, C. S.

1. Some twenty odd years ago, G. A. Aschbach, C. E., from Allentown, this county, undertook to erect, set up or establish the true meridian line on the grounds of the Lehigh county poorhouse. After it was established notice was given that each practical surveyor should on a certain day go and have their instruments tested and chains adjusted. I, and some others were there, but the correctness of the line was by some of the surveyers doubted, and afterwards not regarded or cared about, and so remains yet.

3. I generally trace old and fixed lines by the variation they have, and new surveys by the present bearings.

5. I would suggest that an expert be called or sent to examine the said meridian line and correct the same if found necessary.

LUZERNE.—Charles H. Cooke.

1. There is no meridian established in this county. It is as much the neglect of the surveyors as the commissioners. There are very many instruments not fit to put in the field to run lines. There is on both sides a hesitancy about the meridian line.

2. The variation of the magnetic needles from the surveys in this locality made in 1798, is 4° 20′. There are some surveys, a batch including the Simon Harmon and adjoining tracts in Wyoming county, that the original work is on the ground that bear 5° variation, and one line of 6° 30′. Great care and steady nerve is required in looking up the original surveys, and many have been missed by setting the instrument on the usual variation without regard to what might be found a little to the right or to the left.

4. That the surveyor get his usual fees paid by the county, or appropriated by the Legislature, for attending the annual meeting to adjust his instrument, then we will all be there—otherwise there seems to be no interest. That a law be passed forbidding any surveyor to make any survey or testify in any land case without a certificate from some proper authority, of the adjustment of his instrument and its qualities, is suggested.

M. B. Prescott.

1. Our commissioners have established no meridian line nor any standard of measure.

2. From the best means we have of determining it, we find about 4° 20′.

3. When I find a well run and marked line of old surveys, I generally take it as a standard, but so many of the lines were irregularly run that scarcely two paralleled and opposite sides of a tract can be made to agree. The surveys here were made in 1769–71–72–73–74–75–76–84–85–86–89–90–92–93–94–95 and a few as late as 1796. They were made by many different surveyors with different instruments. It is not uncommon to find the work of two surveyors, with different instruments on the same days and on the same blocks of surveys differing from one to one and a half degrees, where both lines appear to be well run.

4. I cannot conceive that accuracy can be reached by legislation. Men will employ the most convenient surveyors, whether capable or not, and the only way to prevent it would be by the passage of laws requiring the same rigid examination of surveyors as the mine engineers are now subject to. This would undoubtedly work more or less mischief among men.

The preservation of landmarks, lines and corners, is entirely in the hands of the landowners and any laws aiming at that point would only be a dead letter.

5. The establishment of a true meridian line and a standard of measure would be a convenience to many, but if established by one board of commissioners their successors would not know where to find it. Who would they employ to establish such meridian? The commissioners of one county would employ one man, who would say his line was right; in another county another man would be employed, who would say his line was right, and so all through the State. Surveyors would find a great inconvenience in having their instruments adjusted to a standard meridian for say fifteen or twenty different counties, during the month of April each year. I regard the best method to use only the best instruments in the hands of skillful and honest men, and this can only be accomplished through those employing the surveyors.

MIFFLIN—John C. Swigart, C. S.

1. True meridian line established for this county on the county farm near Lewistown, March 5, 1851. Was marked by two local posts set into the ground probably two feet; distance apart 592 feet 3 inches. About '71 or '72 one of the posts was taken out. Since that time Mifflin county has had no meridian line.

The line was established by John N. Weeks and David Hough.

TABLE OF OBSERVATIONS.

5. The meridian line was destroyed before I began surveying. I shall bring the matter before the commissioners, in regard to having it re-established.

MONROE—George G. Shaffer.

1. No meridian line established.

2. I have no convenient arrangement for taking observations, and cannot give precise declination at present time, but think it is about 7° 30′. and is increasing at the rate of nearly 5′ per year. I wish to offer the following theory on this subject—that the magnetic pole, be what it may, moves in a circle, having a diameter of about 160 miles, travels from north to east, to south, and west to north, and makes a revolution in about 300 years. In support of this we have the fact that in about 1660 the direction of its movement changed in America from west to east. In England from east to west. About 1810, it reached its most eastern elongation in America, and began to move westward, and about same time it changed in England from west to east, thus completing half of a revolution in about 150 years. That it moves in a circle, seems to be shown by the fact that for several years just before, and just after its most eastern and its most western elongation there was scarcely any effect on the meridian by the movement of the pole, illustrated by the "swing" of a connecting rod, driven by a crank. (See U. S. Coast Survey Report, 1859, page ——.)

That the circle is about 160 miles in diameter, is based on the angle and distances, thus, in New York in 1680 the angle was 8.8°, and in 1810 4.2°, making the difference 4.6°, there being scarcely any change from 1660 to 1680, the 4.6° is very nearly correct, for the half of the revolution, or the whole angle.

Assuming the distance from New York to the Gulf of Bothnia to be 2,000 miles, we find 160 miles will about subtend the above angle (all in round numbers). That it moves from N. to E. and so on, is shown by the fact that it reached its most eastern elongation in New England several years before it did in New York, and it was still later in the south and west.

3. The first line I ever traced, was in New Jersey in 1852, and had as shown by the records, been originally run in 1711. The next record, was of a survey in 1800, with an allowance of five degrees for variation.

In 1852 it required 2° 40′ on the survey of 1800, or 2° 20′ in opposite direction on that of 1711—that line would now require about 4° 15′ on that of 1800, or 15′ on that of 1711, and in about three years, or 1890, will run as it was in 1711—the needle pointing now, as it did in about 1715.

4. I think of no further legislation required, unless it be to test qualification of surveyors, and license only such as are competent.

5. I am not certain that it would be of any advantage to change from the magnetic, to the true meridian as the base of measures in our surveys. It of course is true, that the magnetic is unreliable, as it is

continually shifting, and that the "true meridian" is unmovable, yet, to change, would likely lead to confusion, especially in tracing, by surveyors accustomed to the former method.

All surveyors should however state in their returns, from what meridian their surveys were made, and should on hilly lines, give both slope and horizontal distances.

Most of my work for the past four years has been in a state, where surveys are professedly, made from the "true meridian." I learn that in 1835 the true meridian was ascertained at several points and the variation noted, and on their returns the surveyors would give the variation used, and in most of those places they have always given, and I suppose used, that same amount, and continued to do so, making confusion confounded.

Where corners are made in places where it is difficult to keep a mound or other mark, it is a good plan to "tie" the corner to some permanent object near by, if such there be, by measuring by course and distance from the corner to the object and embracing those measures in the return. Thus—corner in road, from which S. W. corner of dwelling bears N. 10° E. 80 links (or 3.2 perches).

PERRY—James B. Hackett.

1. There has never been a meridian line established in Perry county, and from present indications, I think it will be a long time before it is done, so we have no way of adjusting our compasses, or determining the variation or progression of the needle, except by actual work on the ground, and our own knowledge and experience as practical surveyors.

The official surveys of Perry county have all been made and returned agreeably to the magnetic bearing at the time the surveys were made.

3. On the 20th day of April, 1843, I divided a tract of land between Robert and Alexander Garrett, lying on the north side of the Big Buffalo creek, in Juniata township, about six miles north-east of Bloomfield, the county seat of Perry. In doing this I ran and marked for the division four new lines, measuring about one mile in length, through broadland and marked them well. On the 17th of September, 1866 twenty-three and one-half years afterwards, I was called to re-survey the eastern side of this tract, and in retracing the division lines with the same instruments, a good Whitney (Phila.) Vernier compass, I found one and a-half degrees variation on them, or about one degree in sixteen years. The corners were all standing, and the marks found along the lines when I made the re-survey, so that I had a fair opportunity to test the variation or declination correctly. On lines run in 1866, and retracing them now in 1887—twenty-one years—I find there is a small increase in the declination or progression of the needle, and that is now four minutes per year,

or one degree for every fifteen years. I can't tell why this is so, but it is a fact, and I wish our scientists would hurry up and explain the reason for it, so that we poor old country surveyors would not have to wrestle with it any longer.

5. I don't think that I could recommend any legislation that would secure greater accuracy in surveying and marking boundary lines. I see some surveyors recommend that all surveys should be made by triangulation, and do away with the needle entirely. I am now in the sixty-ninth year of my age, and have been a practical surveyor since 1842, nearly fifty years, and still follow it, and I have never used anything but a good Vernier compass. For me to attempt to survey now without a needle would be something like an actor attempting to play Hamlet with Hamlet left out—it would not amount to much. If others think they can devise plans that will be more accurate, let them go ahead, and I hope they may succeed, but for the little time yet left me to survey, I will still adhere to the good old compass and needle, on which I always take front and back sights, and which has ever been true to the "pole," and has never yet deceived me. As I have had a good deal of trouble in getting out patents because our county surveyors were not duly qualified, I would suggest that the law requiring them to return their oaths to one department, and their bonds to another, be so amended that they can return both to the Department of Internal Affairs. This would be the proper place for them, as all their duties as county surveyors are connected with that office. If this were done they would have less trouble to qualify, and we would have less labor in hunting up and seeing if they were qualified. In February, 1883, I applied for three patents for persons in our county, and did not get them till May, 1887, all because the county surveyors were not duly qualified, and the department could accept their surveys.

PIKE—J. C. Westbrook, Jr., C. S.

1. See report of 1883.

2. There are no books in the commissioners' office for surveyors to record the variation of their needles in. Surveyors of this county do not consider it important The annual variation is about 3′ 4″. Some time ago I set my compass on the meridian at Milford, and found a variation to the west of about 7°. Am told the meridian is unreliable on account of local attractions. Unless meridians are established in every township or on every survey, I don't consider them of any importance. Our meridian is situated on one edge of the county, and surveys made on the other, or west end, would not be the same variation, as every place has its own meridian.

3. I find by allowing 1° for about eighteen or twenty years will retrace an old line generally. Surveys made by George Palmer, 1792 to 1794, take fully 4½° to trace, while surveys made by James Sewill

some thirty years previous admit but very little variation, in most cases less than half a degree.

5. It is a hard matter to suggest what would be the best method of land surveying, as needle surveys are hardly reliable when made by competent surveyors in active practice. All corners should be stone monuments. The present laws for the preservation of landmarks are good enough, if enforced.

John Layton.

1. See former reports.

Iron water pipes running under the ground near the monuments, and other substances effecting the magnetic needle, have rendered the meridian wholly unreliable and completely worthless.

3. I find by retracing lines the annual declination of the needle is about 3′, or 1° in twenty years. In 1857 I traced the lines of a tract of land in Delaware township, this county, surveyed to David Stephens, the longest line of which is 340 perches, or 20 perches over a mile, the corners being certain and undisturbed. A few days ago I retraced the lines of the same tract, and found that during the lapse of these thirty years the needle had traveled 1½°, or 3′ per annum, westward. On both occasions I used the same instrument, rechanged, &c., when necessary, and was especially careful in the work. Another opportunity I had of testing yearly variation was upon the lines of a body of land containing over 8,000 acres, known as the Shohola property, located in this county. Twenty years elapsed between the two surveys I made of this large scope of country, and in that time the bearings had changed 1° westward on every line. A curious fact is that surveys made about 1784–88 do not require as much variation by about 30′ as those made at a later date, say from 1793 to about the yerr 1800.

4. Surveyors before being permitted to practice should by law be subjected to a rigid examination. It is a lamentable fact that many calling themselves surveyors know nothing of geometry or algebra, cannot define the different lines of a circle nor their functions, nor calculate the area of a survey when oblique, excepting by the scale and dividers, which at best is only a possible approximation. The physician and lawyer before being suffered to practice must undergo an examination and receive a diploma of qualification, and why not the surveyor?

The preservation of boundary monuments is a difficult problem, especially when such monuments are within the bounds of the lands of an individual or company.

POTTER—O. J. Rees, C. S.

1. During 1856 Zalmon Robinson, county surveyor, established a meridian line in the court-house yard and set up two stones 1,050 feet from center to center, with a × mark on top. In the year 1877 John Ross and myself tested this line, and found it to run north 35′ east.

Since that time the frost has moved the top of the southern stone at least two inches to the west. Have reported the matter to the county commissioners, but they as yet have taken no action.

2. The declination of the needle west, July 27, 1887, was 4° 46′.

3. I retraced a line last week the variation of which was 3° 38′ in 1879. I now find the declination to be 4°, or an increase of 22′ in eight years, indicating an annual progression west of 2′ 26½″. In running a trial line and estimating the variation, I should allow 3′ per annum.

SCHUYLKILL—J. F. Staudt, C. S.

1. See report, 1885, page 28.

2. See report, 1885. On account of iron fences and electric light wires over the monuments, there are only a few instruments on record for the last ten years. I will advise the commissioners to appoint some reliable man, and establish them at the almshouse; also a standard measure.

3. I tested a line on the Blue mountains which was run in 1794, and found the old marks without variation (this was in 1886). It was also traced by Daniel Boyer in 1872 without variation; since by others.

4. Such legislation that a surveyor should have no right to make a survey unless his instrument be tested frequently would be proper. Put up the monuments, say a sandstone in limestone land and a limestone on other soil—always a different stone, well put up.

SOMERSET—William Barker.

1. See report, 1878, page 31, and 1883, page 32.

2. The average variation of all the instruments tested April, 1883, was 3° 20′; average progression per year, 4′. The average variation of all the instruments tested during the month of April, in 1884–5–6–7, was 3° 25′+. This, however, I think was not a correct result, since several of the instruments tested varied as much as 30′ from the others. By dropping them, we have a variation of 3° 28′, which I think about a fair estimate, which reduces somewhat the average given in my former reports. The tests made April, 1887, of eight instruments, was 3° 26′, nearly. Judging from the above tests, I think the present declination from the true meridian is about 3° 28′ west.

3. See report, 1885, page 28.

4. I think still, as I always have, that a thorough triangulation of the State should be made as soon as possible, and the land lines adjusted thereby. The act of 1850 is not complied with, even where meridian lines are established, hence a dead letter, and the sooner it is repealed the better.

5. I would suggest that the law regarding witness fees of surveyors while attending court in land cases be changed. As it now is they scarcely get enough to pay their board.

J. Harry Fritz.

2. The variation in October, 1855, was 1° west. On the 4th of May, 1875, when the line was reëstablished, it was 2° 45′ west. November 1, 1876, it was 2° 55′; December 31, 1877, it was 3°; April, 1883, it was 3° 20′; April, 1886, it was 3° 40′; April, 1887, it was 3° 45′.

3. See my report of 1877 in your annual of 1878, page 30.

5. See No. 6 in my report of 1878, page 30

TIOGA—H. S. Archer.

1. No meridian line has been established in Tioga county.

3. By retracing lines run in 1794, I find the present declination to be $4\frac{1}{4}$° west.

UNION—Conrad Sheckler, C. S.

1. The meridian line was established about 1870 on the campus that belongs to what is now called Buckner College, at Lewisburg, Union county, marked by marble monuments, heretofore particularly described.

2. The average declination of the needle at our last meeting, last spring, was 5° 35′ west; but I think some of the needles needed adjusting, as they differed too much. Amount of annual progression, about $3\frac{1}{2}$ minutes.

3. The only marked long lines in this and adjoining counties are those marked in 1792, 1793 and 1794, and generally now show a variation of four degrees; but the lines then run, being mostly in the mountains, where land was then considered nearly worthless, in the haste and confusion were carelessly run and marked.

4. To secure the greatest attainable accuracy in land surveying would require the lines to be traced with a solar compass; but to this there is objection, as in cloudy weather the solar compass is no better than any other; in extensive surveys, then, there would be costly delays. The solar compass being costly, and requiring greater preparations to use it, would prevent many young persons from following surveying.

Further, the benefit in using it would only occur after the lines had once been accurately traced.

Incompetent chainmen cause many errors.

After forty years' practice in surveying, I have come to the conclu sion that it should be made a misdemeanor or offense in landowners not keeping up visible and well-marked corners to their lands.

I think surveyors should be examined as to their competency, as in many other pursuits, before being allowed to practice.

John R. Folmer.

3. I still find by retracing lines which I ran some time ago a fraction above three minutes in some lines, and others about three minutes, annual declination.

4. For additional legislation, I refer you to my reports for Union county, 1884 and 1885.

5. After an experience of thirty years, I am fully satisfied that if our Legislature had passed a stringent law concerning the licensing of surveyors of each county by the court, and compelling all chain carriers to be sworn, and authorizing the surveyor, or some one for him, to give notice of the time that he intends to survey a tract of land to all parties concerned, and if all agree upon a certain corner, or corners, to establish a permanent monument of either stone or metal, so as to be seen by all parties.

I recommended certain legislation, and I referred the Secretary of Internal Affairs to the Hon. C. D. Eldred's recommendation in the report of John S. Laird, C. S., for Lycoming, year 1884. I am fully satisfied, were his recommendation put in practice, there would be fewer expensive lawsuits. I would also suggest a law prohibiting all surveyors from calculating and putting out a survey unless the errors are within a certain limit. I ran around a tract of land a few weeks ago, and I found, by my running, three acres less than was represented by the draft. I then calculated the survey as made by the then surveyor of Lycoming county, and I found in the northings and southings about four rods of an error, and over three in the eastings and westings. In surveying old tracts, I have found but one old surveyor, and no young ones, who have performed their duties as they should have done. They would force a balance, and make the calculation, and deliver the parties an erroneous draft, which in after years would cause a lawsuit.

VENANGO—G. M. Bowman.

1. No meridian line ever established.

3. Established land lines; have no agreement with true meridian as fixed by my solar transit.

4. Refer you to my report in your annual of 1883, page 33; also to report of John W. Creigh, C. E., paragraph 4; also to report of John Layton, C. S., page 30, section 4; also to report of Ira Shipman, page 30, section 4, with whom I fully concur.

WARREN—D. T. A. Wheelock.

1. Meridian line two stones, about 300 feet apart, in yard near the court house. Established by A. D. Wood, civil engineer, I think in 1874.

			1886.	1887.
2. A transit	April 9th, 3.30 P. M.,	showed	3° 56′	3° 54′
Do.	do. 25th, 11 A. M.,	do.	3° 49′	3° 54′
Do.	do. 25th, 12 M.,	do.	3° 51′	3° 55′
Compass	do. 25th, 12 M.,	do.	3° 15′	3° 20′
Do.	do. 25th, 11.30 A. M.,	do.	3° 50′	3° 45′
Do.	do. 30th, 11 A. M.,	do.	3° 36′	3° 40′
Do.	do. 30th, 12 M.,		———	4°
Do.	May 9th, 10 A. M.,		———	4° 05′

By reference to the records kept since 1881, and careful tests, with one instrument, at same hour and day each year, the annual progression is shown to be four minutes.

3. By allowing an average of four minutes per annum of change on lines run a few years ago, the same instrument will retrace them now very nearly correct.

4. Discard the use of the needle, as far as is possible, and use the method of triangulation. Make it a crime punishable by fine and imprisonment to destroy monuments.

Allow a surveyor to set stones permanently, and get pay for so doing.

WASHINGTON.

D. M. Pry, *Recorder.*

WAYNE--Lewis S. Collins.

1. See former reports.

2. There were six compasses tested on the Wayne county meridian during this year (1887) showing, as per record in the county commissioner's office, as follows:

Surveyors.	Date.	Declination.
H. L. Stephens,	April 20, 1887,	7° 20′ West.
E. Killain,	April 25, 1887,	7° 30′ West.
Goodrich and Sharrard,	May 3, 1887,	7° 42′ West.
Homer Young,	May 3, 1887,	7° 26′ West.
L. S. Collins,	May 5, 1887,	7° 41′ West.
E. V. Dimmick,	June 4, 1887,	7° 30′ West.

It is a little singular that three of the above-named instruments, should show the same declination in 1887, that they did as recorded in 1885, while two others show a progression of 6′ west for the two years. It is probable that sufficient care was not taken in centering some of the instruments over the meridian point; in some instances, it being done without a plumb line, which may account for so much difference in declinations. The above tests show an average declination of 7° 14′ 50″ in 1887, which is 10′ 59″ less than by the tests for 1885, which is not very likely. Take the two instruments showing

respectively 7° 42′ and 7° 41′ in 1887, and the progression since 1885 will show six minutes, or an annual change of three minutes west.

3. The method adopted by a commission appointed by the court of Wayne county to run and mark the north line of Damascus and Lebanon townships in this county in April last, a line of some ten miles length, and which, from the records of the county appears to have been first run in 1807, was as follows: The declination of the magnetic needle for 1807 was calculated from formula published by the United States Coast and Geodetic Survey, as determined by C. A. Shott, for deducing secular variation of the magnetic declination in the United States. The declination of the magnetic needle for the year 1887, was derived from tests on the Wayne county true meridian, and the difference of 4° 45′ allowed for the change since 1807. With this allowance the line was run from the initial point on Delaware river, west. The country for about five miles had been entirely striped of original timber and for that distance no old line marks were found, but at 1,646½ rods the line as run passed two feet north of a tree, bearing the old centre township line marks, and at 1,672 rods passed one foot north of a tree bearing same marking, and other marks were found differing little from the foregoing and verifying the closeness of retracing the old line. The time from the year 1807 being 80 years and the change in declination being 4° 45′ would give a mean annual change of $3\frac{56}{100}$ minutes west.

GEODETIC SURVEY IN PENNSYLVANIA.

The Department is again greatly favored through the kindness of Prof. F. M. Thorn, Superintendent United States Coast and Geodetic Survey, and his acting assistant, Prof. Louis H. Barnard, in furnishing an exceedingly valuable report on the progress and completion of

Geodetic Triangulation in Central Pennsylvania.

The report will be valuable to those who take an interest in this important work.

REPORT ON THE GEODETIC SURVEY IN CENTRAL PENNSYLVANIA.

The triangulation in Central Pennsylvania has been completed as far west as the stations Round Top and Pulpit Rock, or, in general, as far west as the meridian through Harrisburg. (See sketch of the triangulation).

Subsequently, a reconnaissance was executed to the south and west, reaching the State line at the stations Mount Quirauk, near Pen-Mar, and Fairview, near Hagerstown, in Maryland.

The object of the work of the past season was to extend the triangulation still further to the south, in order to make a connection with the main primary system in Maryland, and so prevent that accumulation of error that always occurs when a triangulation is extended over a large area. In this case the lengths of the lines in the main system are known with the utmost accuracy, so that the one on which the connection is made serves as an auxiliary or check base line—that is, its length may be computed through the Pennsylvania triangulation, and the result compared with its previously determined value, accepting this latter as standard.

The problem then was to connect the stations Pulpit Rock, Mount Quirauk and Fairview, of the Pennsylvania system, with Sugar Loaf and Maryland Heights, of the Maryland system, by well-conditioned triangles or quadrilaterals, and to put those stations that it was necessary to occupy for the measurement of horizontal angles into condition for occupation, and to erect signals to observe upon.

The accompanying sketch shows the connection and the scheme of the triangulation between the lines Round Top-Pulpit Rock and Sugar Loaf-Maryland Heights. The connection is through two triangles, viz:

Triangulation & Reconnaissance
In Pennsylvania

Sugar Loaf-Maryland Heights-Mount Quirauk and Maryland Heights-Mount Quirauk-Fairview.

It is highly probable that Sugar Loaf and Pulpit Rock are inter-visible, and if so, the triangle Sugar Loaf-Mount Quirauk-Pulpit Rock may be combined with Sugar Loaf-Maryland Heights-Mount Quirauk to form a second connection. The line Sugar Loaf-Pulpit Rock is a very long one, nearly fifty miles, and the atmosphere was not clear enough when Pulpit Rock was visited to definitely decide the question of inter-visibility. It will be necessary to occupy the following stations in order to complete the measurement of horizontal angles, viz: Round Top, Pulpit Rock, Piney Mount, Mount Quirauk, Clark's Knob, Fairview, Maryland Heights and Sugar Loaf. At all of these that are in the Pennsylvania system, except Mount Quirauk and Fairview, tripods have been erected and fitted with cap blocks; signal poles, six inches square, have been inserted and plumbed over the station marks. These signal poles vary in length up to twenty feet, two-thirds of them being above the cap block. This portion is hexagonal in cross section. One half is painted white, the other black. The lower end is secured to the tripod by heel braces, and the whole is so arranged that the pole can be lowered away when the station is occupied or a heliotrope is to be posted; an iron rod, three-quarters of an inch in diameter, is driven into the end of the pole. It is made long enough to serve as a spindle, upon which to mount a barrel, the latter serving as a signal for purposes of reconnaissance.

To sum up, the connection has been made, all of the stations except three are ready for occupation, signal poles are in position, and it remains to measure the horizontal angles.

STATE WEATHER SERVICE BUREAU.

The practical benefits to be derived from weather forecasts have never been generally enjoyed by those whose interests would be most clearly affected by a prompt dissemination of the official reports of the United States Signal Service. Of all classes of citizens the farmers are in the greatest need of prompt and accurate knowledge of anticipated climatic changes, to enable them to protect the fruits of their husbandry. With a desire to benefit people generally, and more especially those engaged in agricultural pursuits, the Legislature at its last session, by an act approved May 13, 1887, established a State Weather Service Bureau in connection with this Department. The management of the affairs of the Bureau was, by virtue of the said act, imposed partly on the Franklin Institute, of Philadelphia. So short a time has expired since the passage of this act that the Bureau has not yet been thoroughly organized; but under proper management it may be expected that in a few years it will develop into one of the most beneficial and interesting branches of the public service. The report of William H. Wahl, secretary of the Franklin Institute, is submitted herewith, in which he sets forth in detail the operations of the Bureau since its organization, and in addition thereto furnishes historical matter which will no doubt awaken a new interest among the people.

REPORT OF THE PENNSYLVANIA STATE WEATHER SERVICE, MAY 13, — NOVEMBER 30, 1887.

HALL OF THE FRANKLIN INSTITUTE,
PHILADELPHIA, *November 30th, 1887.*

The Hon. T. J. STEWART, *Secretary of Internal Affairs of the State of Pennsylvania:*

SIR: I have the honor to transmit herewith the report of the committee on meteorology of the Franklin Institute, of the State of Pennsylvania, on the operations of the Pennsylvania State Weather Service for the year ending November 30, 1887.

WM. H. WAHL, *Secretary.*

For several years past the United States Weather Bureau, with the object of increasing the usefulness of the service to the people of the country, and more especially to that portion engaged in agricultural

pursuits, has endeavored to enlist organized coöperation in the several States, in the hope that the weather forecasts, frost and storm warnings, might, with such aid, be more promptly and thoroughly distributed than the machinery and facilities at the command of the Signal Office permitted. The plan that the Weather Bureau had in view in this endeavor was the organization in each State of an auxiliary weather service, which would take up the work where the Government service was compelled to drop it, and with the help of such special facilities as such State organization might have power to control and create, would be able to distribute the weather forecasts of the Central Bureau, promptly and systematically, to every section of the State that could be benefited by such information. Primarily, therefore, the purpose in view in creating this auxiliary weather service was to provide means for the better and more extensive dissemination of the weather predictions; but it was also contemplated that each of their organizations should encourage and promote the study of the meteorology and climatology of their respective States, by establishing and equipping such proper instruments, stations for daily observations of the barometric pressure, temperature, relative humidity, rainfall, force of the wind, and other meteorological phenomena which, in time, would afford data of the utmost value for the study of the climatology of the State.

In furtherance of the plan above described, of supplementing and extending its work by the organization of auxiliary weather services in the several States, the United States Weather Bureau in the early autumn of the year 1886, authorized and directed Sergeant T. F. Townsend, at that time the weather service observer at Philadelphia, to propose to the Franklin Institute of the State of Pennsylvania that it should undertake the organization of an auxiliary weather service for the State of Pennsylvania, and assume the general control of the operations of said service. After some informal discussion of the subject between Sergeant Townsend and the officers of the institute, a meeting of the committee on meteorology was called to consider it formally. The result of this meeting appears in the accompanying extract from the minutes of the stated meeting of the institute held October 20, 1886, viz:

"At a conference of the officers of the United States Signal Service and the committee on meteorology of the Franklin Institute, held Tuesday, October 19, 1886, to consider the feasibility of establishing a State weather service, the following was unanimously adopted:

"Whereas, The Franklin Institute ceased the direction and arrangement of meteorological observations in the State of Pennsylvania, because of the establishment of a National Weather Bureau; and

"*Whereas*, It is believed that the time has arrived when the institute may largely aid the people of the State, and the United States Signal Service, in disseminating their forecasts and weather statistics,

collect climatic and other data, that will be of much importance to our agricultural, manufacturing and commercial interests; therefore it is resolved by the meeting to recommend to the institute the passage of the following resolution, viz:

"*Resolved*, That the subject of organizing a State weather service be referred to a special committee to be appointed by the President, with the request to report a plan for the same, if possible, to the stated meeting of the institute in November.

"The resolution was adopted, and the president appointed the following members to constitute the committee: Mr. W. P. Tatham, Professor Edwin J. Houston, Mr. Alexander E. Outerbridge, jr., Mr. Lorin Blodget, Mr. Joshua Tiney, Professor M. B. Snyder, Professor N. Wily Thomas and Dr. Wm. H. Wahl."

The committee above named held several conferences with representatives of the United States Weather Bureau, presented a report, and at the stated meeting of the institute held December 15, 1886, the report of the committee, as it appears in the impression of the journal of the institute for January, 1887, reads as follows:—

REPORT OF A SPECIAL COMMITTEE OF THE FRANKLIN INSTITUTE TO FORMULATE A PLAN FOR A STATE WEATHER SERVICE.

[Presented at the stated meeting held Wednesday, December 15, 1886.]

At a meeting of the special committee to formulate a plan for a State weather service, held Wednesday, December 15, 1886, the following report was adopted, and ordered to be reported to the next monthly meeting of the institute.

W. P. TATHAM, *Chairman.*
LORIN BLODGET,
M. B. SNYDER,
WM. H. WAHL,
ALEX. E. OUTERBRIDGE, JR.

The sub-committee, appointed to consider the advisability of establishing a "State Weather Service" for Pennsylvania, under the auspices of the Franklin Institute, and in conjunction with the United States Government Meteorological Bureau in Washington, begs leave to offer the following report:

Report.

Experience has proved that the practical benefits to be derived from the daily forecasts of storms, cold waves, etc., are greatly restricted, especially in the agricultural districts, by the want of sufficient facilities for disseminating the official information promptly. Farmers, who are especially interested in these forecasts, are usually so located that the reports do not reach them in time to be available as predictions, and they are therefore of little value to this class of the com

munity. In order to overcome this deficiency, the experiment has been tried of establishing, in several of the western and southern States, an auxiliary "State Weather Service," with volunteer observers located at available points working under a chief, residing at some central locality, who in turn is in daily telegraphic communication with the government bureau in Washington. By the aid of this organization it is found that the weather forecasts may be much more rapidly and widely disseminated than has heretofore been practicable. The State services already established have proved of great value to the citizens, and have afforded material aid to the Meteorological Bureau in its efforts to extend its usefulness. It is at the request of the officers of this bureau that the Franklin Institute is considering the advisability of fostering the establishment of a similar service for Pennsylvania.

The chief signal officer offers to aid the work by furnishing all blank forms upon which the reports are written, by supplying a competent instructor and an inspector, who will visit the stations, compare and correct the instruments, collate the reports, etc., etc.

It appears from the statements of the officers of the Meteorological Bureau, that the State services already established, have proved invaluable to the communities in which they are placed, and this committee is of the opinion that a similar service would prove equally valuable in Pennsylvania, and that it is a proper subject for the careful consideration of the Franklin Institute.

By means of the efficient "Railway Bulletin Service," now in operation by the different railroad companies in this State, such a system is both possible and practicable at a very small expense. By these companies the weather indications of the signal service are daily posted at over 300 stations, well located, for points of distribution.

By the "Flag Weather Signals," which can be displayed at these centers and repeated or duplicated at proper distance from each other, the entire State can soon be covered with symbols, and the indications or warnings given to every locality participating in the work.

The value of such information is sufficient to induce the belief that if a system was properly organized, the people would very generally aid in these displays by volunteering their services.

While the stations of the signal service may be numerous enough for storm and frost warnings and general weather predictions, they are not sufficient to determine the climatic conditions of our State sufficiently for the best scientific and practical results.

They are mere outposts for general work, so far apart that numberless meteorological phenomena occur, that, being unrecorded, are lost for comparison and study.

The value of systematic and continuous records of atmospheric changes cannot be over-estimated. There is not an industry in the country that could not be benefited by them.

For this purpose a thorough system of taking and recording observations should be organized in every county. No doubt, with proper encouragement, a sufficient number of volunteers could be found for this work, and in a short time such an array of climatic data might be collected, that valuable and comprehensive information might be given concerning the meteorological condition of any part of the State.

As above remarked, several of the States have already experienced and recognized the practical benefits to be derived from a "State Weather Service," and have appropriated money to properly furnish the stations with the necessary government standard instruments for measuring the pressure, temperature, humidity, rainfall, wind, etc.

This should be done by the State of Pennsylvania, as the benefits would be general.

An appropriation of $3,000 will properly equip one station in every county, and furnish means for the monthly publication of a *Weather Review* containing the tabulated reports of the observations.

After the stations are once established the cost of maintaining a continuous service will be slight.

The following is a price list of standard instruments, as published by the signal service:

Barometer,		$30 00
Thermometers,	Dry bulb,	3 00
	Wet bulb,	3 00
	Maximum,	5 00
	Minimum,	4 00
Rain-gauge,		2 50
Instrument shelter,		5 00

For the reasons herein stated, we suggest:

That the Franklin Institute at once organize a "State Weather Service" for Pennsylvania, having for its object the collection and collation of climatic data and phenomena, and the dissemination of the weather forecasts, storm and frost warning of the signal service.

That the work of taking observations, disseminating forecasts, warnings, etc., be accomplished by volunteer service.

That the coöperation of railroad companies, telegraph companies, telephone companies, newspapers and others, who can materially aid in the dissemination of information, be solicited.

That the offer of the chief signal officer of the army to furnish a member of the signal corps to assist in the work be accepted.

That an effort be made to secure an appropriation of $3,000 from the State for the purchase of instruments and for the publication of the observations in a tabulated form.

That all institutions of learning throughout the State be solicited to take an active interest in the collection of meteorological data and the study of the science, for practical applicatien to the various pursuits of life.

That at least one observer be secured in every county of the State, ten of whom should take and record barometric readings.

That copies of all meteorological data relating to the State be secured and placed on file in the central office.

That immediate action be taken to secure observers and displaymen, so that the work may be commenced, if possible, on January 1, 1887.

That if all the work suggested cannot be at once carried out such portions as can be done without expense be started as soon as practicable.

That the management of this service be placed in charge of a committee appointed by the Institute, with power to regulate the service according to requirements.

At the stated meeting of the Franklin Institute of the State of Pennsylvania for the Promotion of the Mechanic Arts, held Wednesday, December 15, 1886, the foregoing report was adopted and the committee was continued, with instructions to carry into effect the plans proposed.

Attest:

William H. Wahl,
Secretary.

Pursuant to its instructions the committee prepared the draft of a bill, which, with unimportant modifications, was passed by the Legislature of Pennsylvania at the session of 1887, and was approved by the Governor, May 13, 1887.

The act is as follows, viz:

AN ACT

To establish a State weather service in this Commonwealth for the purpose of increasing the efficiency of the United States signal service by disseminating more speedily and thoroughly the weather forecasts, storm and frost warnings, for the benefit of the citizens of this State, and for the purpose of establishing and maintaining in each county thereof meteorological stations for the collection of climatic data and making an appropration therefor.

Whereas, By reason of the limited facilities of the United States signal service, the practical benefits to be derived from the weather forecasts, storms and frost warnings issued from the chief signal office at Washington, District of Columbia, are greatly restricted, especially in the agricultural districts, by the want of proper means for disseminating these official reports promptly:

And whereas, By the organization of a State weather service coöperating with the United States signal service, the weather forecasts, storm and frost warning hitherto accessible only to a very small proportion of our people, may be much more rapidly and widely disseminated throughout the State, whereby the value of the same to the agricultural and other interests will be largely increased:

And whereas, The climatology of the State has never been observed and recorded in as thorough and systematic a manner as is necessary for the best promotion of the various industries:

And whereas, The State weather services already established and maintained by State aid in Alabama, Illinois, Indiana, Iowa, Minnesota, Mississippi, Missouri, Nebraska, Massachusetts, Ohio, Tennessee and other States, coöperating with the United States signal service, have proved of great value to their citizens, especially to the farmers, who stand most in need of prompt and accurate information of anticipated climatic changes for the protection of their crops, and who are most directly benefited thereby:

And whereas, At the request of the chief signal officer, the Franklin Institute of the State of Pennsylvania, for the Promotion of the Mechanic Arts, has proposed a plan for the organization of an efficient weather service for this State; therefore,

SECTION 1. *Be it enacted by the Senate and House of Representatives of the Commonwealth of Pennsylvania in General Assembly met, and it is hereby enacted by the authority of the same*, That the Secretary of Internal Affairs of this Commonwealth be and is hereby authorized and directed to name and appoint, on the recommendation of the Franklin Institute of the State of Pennsylvania for the Promotion of the Mechanic Arts one or more competent observers in each county of the State for the purpose of taking, recording and transmitting observations of the atmospheric pressure, temperature, humidity, rainfall, wind and other meteorological phenomena, occurring in their respective localities; and the Secretary of Internal Affairs is hereby authorized and directed to purchase and furnish to each of said observers such standard meteorological instruments as are used by the United States signal service, and such signal flags and other necessary equipments, and such necessary clerical expenses as shall be designated and approved by the said Franklin Institute.

SECTION 2. The central office of the State weather service shall be located in the city of Philadelphia, at which the weather forecasts and warning of the United States signal service shall be received, and from which the same shall be disseminated throughout the State, and to which the State weather service observers shall send their observations.

SECTION 3. The management of the work of the Pennsylvania State weather service shall be under the supervision and direction of the Franklin Institute of the State of Pennsylvania for the Promotion of the Mechanic Arts, and the said Franklin Institute is hereby authorized to make such use of the information thus collected by the publication of a weather review, and by other proper means as will best promote the usefulness of the service to the citizens of the State. And the services of the said Franklin Institute and of the said observers of the State weather service shall be made without compesation.

SECTION 4. The sum of three thousand dollars be and the same is hereby appropriated out of any money in the treasury not otherwise

appropriated, for the purpose of carrying into effect the provisions of this act.

On March 11, 1887, Sergeant T. F. Townsend, of the signal corps, was ordered to report to the committee on meteorology of the Franklin Institute for duty, and was appointed as assistant of the organization.

In order that the system of operation of the Pennsylvania State Weather Service should be conducted under a common plan, and that the data should be collected and recorded in a manner best adapted for study and comparison with similar data from other sections of the country, the following forms, issued by the United States Signal Service to all State weather organizations, were adopted: (See appended form 122 B. and P. S. W. S. form 1. Original record.)

WAR DEPARTMENT

SIGNAL SERVICE U. S. ARMY

VOLUNTARY OBSERVERS METEOROLOGICAL RECORD

NOTES

State Weather Service.

CASUAL PHENOMENA AND REMARKS.

As soon as practicable after the passage of the State Weather Service act above referred to, bids were invited through the daily papers for the following instruments and materials for the equipment of observation stations in the counties of the State, as rapidly as suitable volunteer observers could be obtained and appointed under the provisions of the act, viz :

100 (sets)	Weather signal flags.
10	Mercurial barometers.
25	Dry thermometers.
25	Maximum thermometers.
25	Minimum thermometers.
25	Rain gauges; and
25	Instrument shelters.

The instruments above designated were specified to be of the pattern approved by the United States Signal Service Weather Bureau, to be made according to the specifications of the service, and to be mounted, complete and ready for use.

(The contract for the instruments was awarded to Messrs. James W. Queen & Co., of Philadelphia ; for the instrument shelters to the Phœnix Planing Mills of Philadelphia ; and for the flags to Charles M. Simpson, of Philadelphia.)

As rapidly as suitable observers were obtained at desirable localities in the several counties of the State these instruments and flags, with full instructions, record books and forms, were distributed under the authorization of the Secretary of Internal Affairs.

As the work of organization progressed it was found necessary to provide more instruments and shelters, and, accordingly, the following were contracted for with the same parties named in the first order, viz :

20	Maximum thermometers.
20	Minimum thermometers.
20	Dry bulb thermometers.
20	Wet bulb thermometers.
20	Rain gauges.
25	Instrument shelters.

These supplies have been received and partly delivered to observers, with the authorization of the Secretary of Internal Affairs.

The accompanying tabulation will exhibit clearly the extent of the operations of the service at the close of the year 1887. Volunteer observers have been selected and designated in forty-eight counties, nearly all of which are centrally located. Most of them have been furnished with a full set of instruments (except barometers, none of which have yet been sent out), so that the present equipment of nearly all the stations here referred to consists of a set of the signal flags (new code), 6′x6′ in size, a full set of thermometers, wet and dry

Names in italies furnish their own instruments.
*Not yet reporting.

The appended skeleton map of the State exhibits the location of the observing stations thus far established. It has been the desire of the committee from the outset to receive the coöperation of the schools and colleges throughout the State in making observations, and a number of them are already engaged in the work, while others have signified their intention of undertaking it at an early date. The colleges and schools in most cases are provided with their own instruments, and several individual observers have also made a similar provision.

The large area of the State, the limited means for conducting the service, which imposes the most rigid economy in the expenditure of the fund appropriated to it, and the high standard of excellence required of its observers, make the task of organizing necessarily slow. Nevertheless, when it is remembered that the service having been officially established since May 13, 1887, a little more than six months, that which has been accomplished encourages the committee to believe that during the next year the people of the State will begin to reap more substantial benefits from its work. Several of the railroad companies of the State have expressed their readiness to lend their coöperation in extending the usefulness and efficiency of the service, and certain of them have already done good work in this direction by transmitting to, and posting at their stations, the daily weather forecasts and warnings. This is now regularly done along the lines of the Pennsylvania, Philadelphia and Reading and Lehigh Valley railroads. They have likewise furnished free transportation over their lines for the assistant-in-charge, but there is no provision for incidental expenses incurred in traveling. Negotiations have been for some time pending, looking toward the establishment, with the coöperation of the railroad companies, of a signal station at each of the principal stations along the lines of the leading railways of the State.

The display of flag signals, the committee hopes shortly to be able to make a permanent feature of the service, as this is recognized to be the most practicable mode of distributing the benefits of the service throughout the State. It is the intention that the observing station in each county should perform the duty of a central flag station, from which, with the aid of the various county organizations, the signals may be repeated to any desired extent throughout the county. It is apparent that the extent to which the signals shall be duplicated, must depend upon the interest taken in the work by the local communities. The service can afford these communities everywhere in the State the means of obtaining the weather predictions, but can do no more. It is at this point that the county agricultural societies, farmers' clubs, and other local organizations, may materially forward the efficiency of the service, and its value to the agriculturists of the State by systematic coöperations with the view of establishing and maintaining repeating stations more or less numerously throughout each county. Such coöperation the service is at present striving to secure.

During the seeding, growing and harvest season a copy of accompanying form was filled up at the end of the week by each voluntary observer and forwarded to Philadelphia. From these a general report for the State was was made up and telegraphed to Washington each Saturday night. This, in turn, was used by the Chief Signal Officer

in preparing his weekly weather crop bulletin, which proved very popular during the past season.

. . . . . , *June* . . , *1887.*

. . . . . .

. . . . . .

Sir: When the harvest of any crop begins in your vicinity you will please so state in the weekly crop-weather report from your station, naming the kind of crop (whether wheat, corn, etc.), and stating to what extent the work has progressed during the week. The Chief Signal Officer desires to utilize the data gathered from such reports, in the preparation of the weekly crop-weather bulletin of the Signal Service. This bulletin has been received with much favor and it is believed that information as to the beginning of harvest will add materially to its value.

SIGNAL SERVICE OBSERVER.

PHILADELPHIA,

. . . . . .

Following is a specimen of the "Weather-Crop Bulletin," issued by the Central Bureau, on the basis of the information gleaned as above described:

WEATHER-CROP BULLETIN. No. 22.

SIGNAL OFFICE, WAR DEPARTMENT,
WASHINGTON CITY, *October 2, 1887.*

FOR WEEK ENDING OCTOBER 1, 1887.

Temperature.

During the week ending October 1, the weather has been cooler than usual in all agricultural districts east of the Rocky Mountains, the average daily temperature ranging from 3° to 6° below the normal in the central valleys, except from Virginia to Florida, where the temperature was but slightly below the normal. The temperature for the season, from January 1st to October 1st, was slightly below the normal on the Atlantic coast and from New England westward to the Missouri Valley; and it was slightly warmer than usual in the Ohio and central Mississippi valleys and generally throughout the Southern States, the average daily excess or deficiency generally amounting to less than 2°.

Rainfall.

The rainfall for the week has been in excess throughout the greater portions of the cotton and tobacco regions and over the winter-wheat regions, from Ohio westward to Missouri and Iowa. In the regions that have suffered most from drought covering the greater portion of Illinois, southern Indiana, eastern Iowa, and the greater portion of Missouri, the rainfall for the week has been largely in excess. Less than the usual amount of rain fell along the south Atlantic coast, in northern New England, western New York, Nebraska and the north-western portions of Iowa.

The large deficiency in the rainfall for the season continues in the central valleys, but this deficiency has been reduced during the week in the wheat and corn regions of the Northern States. Over the greater portion of the cotton region the deficiency has exceeded ten inches. In the tobacco regions of Virginia, Kentucky and Tennessee

the deficiency in rainfall for the season generally amounts to less than five inches, except in the extreme west portions of Tennessee and Kentucky, where the deficiency in rainfall for the season exceeds ten inches.

The only States reporting an excess of rainfall for the season are Pennsylvania, Maine, southern New York, the west portions of Kansas and Nebraska, northern Texas and eastern Colorado.

General Remarks.

During the week the weather has been favorable for the harvesting of cotton in States west of the Mississippi and in the extreme eastern portion of the cotton-region, while cool weather and heavy rains have affected this and other growing crops unfavorably in Mississippi.

Frosts occurred in the northern portion of the tobacco-region of the Ohio Valley and along the Atlantic coasts as far south as Virginia, which probably resulted in some injury to the crops. These frosts were anticipated and warnings were issued by this office, giving timely notice of the occurrence.

The rains which have occurred during the week in the winter-wheat regions will prove of especial value, as the sowing of wheat has been delayed in that section, owing to the continuance of the drought.

H. H. C. Dunwoody,
Acting Chief Signal Officer.

Note.—This Bulletin is discontinued with this issue until the beginning of the next crop year.

It was not until September that the number of trained observers engaged in the work of the service was deemed to be large enough and sufficiently widespread over the State to warrant the issue of a special publication containing the results of their work. With this month the publication of a "*Summary of Meteorological Reports made by Voluntary Observers to the Meteorological Committee of the Franklin Institute*, Philadelphia, Pa.," was begun, and has since been continued. This publication is at present confined to very modest proportions, but as the work progresses, it is hoped to increase it both in size and in interest and value. Furthermore, meteorological data embracing records kept for a series of years in different parts of the State, are being collected for comparison and with the view of publication, so that the labors of those who have so long and freely given their time and energy to this work, may not be lost.

Appended to this report will be found the three monthly publications that have thus far appeared. One thousand copies of each were distributed, without cost to the State, under the frank of the United States Signal Service, in such a manner as to insure the widest publicity and greatest utility. They were also published as a supplement in the *Journal of the Franklin Institute.*

In conclusion, as a matter of considerable historic interest, it is worthy of being placed on record that the State of Pennsylvania deserves the high honor of being the first to encourage and lend material aid to the science of meteorology. As early as the year 1837, on the joint representation of the American Philosophical Society and the Franklin Institute, the Legislature of Pennsylvania voted an appropriation of money for the organization and conduct of a system of meteorological observations. Stations were established and equipped in each county of the State, and observers were obtained in every part of the United States who corresponded faithfully with the committee of the two societies for a number of years, sending records of their observations, and more especially the details of storms, the nature and origin of which were at that time the theme of earnest controversy among the men of science. In spite of the disadvantages which the absence of facilities for the rapid transmission of news by railway and telegraph imposed on these observers, the committee was furnished by its correspondents with the particulars of fourteen great storms, and was enabled, from the observed data, to evolve a practical theory of storms which is essentially the same as that now accepted as correct. The results obtained were tabulated, and for a number of years were published in the *Journal*. This early work, in which the State of Pennsylvania conspicuously distinguished herself, must be regarded as the first step towards the elaborate system which to-day, with the aid of the telegraph, finds its expression in the signal service of this and other countries, and which has been of such incalculable benefit to commerce and agriculture.

Appended to this is a copy of the act of 1837, herein referred to, and an extract from the minutes of the Franklin Institute committee on meteorology, referring to the distribution of instruments under the act. Inquiries are being instituted to ascertain if any of these instruments are still in existence. Standard barometer with attached thermometer, No. 1, is still in possession of the Franklin Institute.

Respectfully submitted.

WM. H. WAHL,
Secretary Committee on Meteorology.

APPENDIX.

MONTHLY SUMMARIES FOR SEPTEMBER, OCTOBER AND NOVEMBER, 1887, OF METEOROLOGICAL REPORTS MADE BY VOLUNTARY OBSERVERS.

Pennsylvania State Weather Serviee Bulletin for September, 1887.

Hall of the Franklin Institute.
Philadelphia, *October 1, 1887.*

This summary of the meteorological reports of the State observers is not in the form or style intended when the organization is completed. From various causes many unavoidable delays have occurred, and it will yet take time to place the Service on the basis contemplated. In order that the meteorological data of the State may be thoroughly reliable, the best instruments have been secured, and special attention paid to their exposure. Every effort has been made to secure the coöperation of colleges and schools that students may have all the advantages possible for obtaining a meteorological education. Many of these have already made arrangements to aid in the work, and will soon furnish the Service with full reports. As their fall terms did not commence till September, their observations for this month are incomplete. This work requires some practice before proficiency is acquired, and time must be given to attain it.

About thirty counties are now supplied with instruments of the Signal Service pattern, consisting of maximum and minimum thermometers, dry and wet thermometers, rain gauges and instrument shelters, and the rest are being provided for as fast as the instruments can be made and observers secured. Some displaymen have been obtained for the weather signals, and this portion of the work will soon be vigorously pushed forward. The territory to be covered is a large one, and all the aid possible is needed to secure desirable results.

It is not expected that the small appropriation by the State should enable the committee to display the signals throughout the counties. It is hoped that after the original display stations are established in each county, the people will organize and attend to the erection and maintenance of repeating stations, which, being for the benefit of the people of each county, ought to be at their expense.

Observers are particularly requested, when possible, to give all the data called for on the forms, and to complete and mail them as soon after the end of the month as is practicable, that the work of publication may not be delayed. As soon as the data will warrant it a larger

review will be issued, which will contain all matters of interest reported.

A regular commission, signed by the proper authority of the State, will be given to all observers whose reports, after examination, are found satisfactory.

Observers are requested to paste newspaper cuttings containing meteorological data in their original record books, under proper dates.

The Committee on Meteorology of the Franklin Institute,

W. P. TATHAM,

Chairman.

Remarks. The weather for September in Pennsylvania has been slightly colder than the average, and has ranged from nearly normal in the western portion to about 3° below in the eastern portion. The mean temperature for the State was 60°. This, as compared with last September, is between 4° and 5° lower.

About the usual differences have occurred between the tide water sections and the elevated districts.

Rather more than the average amount of cloudiness has prevailed.

The rain fall has averaged about three inches as a whole. The greatest rainfall reported was at West Chester, and amounted to 5.67 inches.

The heaviest rains occurred on the 11th and 12th, and were quite general throughout the State. Heavy rains were also reported on the 28th and 29th in the eastern counties.

The month has been less stormy than usual, and with a small proportion only of windy days. There has been no severe general storm attended with great changes of pressure and profuse rainfall in the eastern counties, as often occurs in September.

The barometer has ranged high, and the monthly mean is above the normal. The mean at Philadelphia being 30.110, Pittsburgh, 30.075, and Erie, 30.100.

While light frosts were reported on low lands during the first and middle of the month, vegetation was vigorous and generally uninterrupted, until it was suspended by the cold and frost of the 25th and 26th.

At this time corn was everywhere fairly ripened, but tobacco, buckwheat and some vegetables were still growing.

These frosts were anticipated by the chief signal officer, and warnings were sent to the tobacco districts.

The wheat seeding season has been favorable, the ground in good condition, and the crop at this date fairly started. The late crop of hay is generally good in the eastern counties.

The fruit crops of the State are gathered so early that they are not subject to risk from frost, except in a few northern districts.

A slight earthquake shock was noticed on the first at Norristown, which was also reported felt at some points eastward.

Lunar halos were noticed on the 3d, 6th, 7th, 11th, 20th, 26th, 30th.

Solar halos on the 6th, 11th, 18th, 26th. Thunder storms occurred on the 6th, 7th, 11th, 13th, 18th, 22d, 29th, 30th. That of the 7th was quite general, and at Shamokin and Dyberry was attended with hail. An aurora was reported from Indiana on the 25th.

T. F. T.

PENNSYLVANIA STATE WEATHER SERVICE BULLETIN FOR OCTOBER, 1887.

Hall of the Franklin Institute,
Philadelphia, *November 1, 1887.*

It will be perceived, on examination of the annexed monthly summary, that the number of observing stations has been increased to thirty-two this month, against twenty for the last, and that the summary now includes barometrical observations in certain localities.

As a general thing, the records appear to be carefully made, and it would tend greatly to the accuracy of the results if each observer would add up his columns and calculate the means. These calculations should be repeated and checked at the general office.

Several of the observers attach interesting and instructive notes of the condition of the crops as affected by the weather, and also of special phenomena. That these notes are valuable as a permanent record, will appear hereafter and it is hoped that all of the observers may give them as fully as the space on blanks will admit. A review by each observer of the general results at his station for the month will add to the value of his report.

Observers will find it interesting to compare their results with those of other stations, and thus to establish their relative portion for each month as respects the principle features of the weather.

Observers are particularly requested to give all the data called for on the forms, and to complete and mail them promptly, so that the publication may not be delayed.

The committee repeat the expression of the hope that the people of each county will organize for the purpose of flagging their county so as to convey promptly to all the farmers, the daily forecasts of the weather for the next twenty-four hours. A little reflection will show the necessity for this. The repeating stations do not repeat the signal for their own benefit, but for that of the people beyond them, who, in turn, pass their signals to their more distant neighbors.

Where some do the work and others reap the benefit, a system of proper compensation is necessary, and this can only be attained by organization.

For the Committee on Meteorology of the Franklin Institute.

W. P. Tatham,
Chairman.

REMARKS.

The general climate of the State for October has been from 2° to 5° colder than usual, especially in the western and elevated counties. The cold of the 15th, 22d, 26th and 31st was quite general, and nearly all the western and northern counties report snow on the 21st and 22d, in amounts from "ground covered" to one inch at Scranton and Wellsboro', and four inches at Greenville. Most vegetation was cut off throughout the State by the killing frost of September 26th, although in some of the eastern and southern counties, and in the lower valleys, the hardier sorts were continued until the severe frosts, which occurred during the latter half of October, and from which no district was free. An abundant growth of fall wheat and grass has been reported.

The colder belt of highlands had a mean of 45° at observed stations, and about 40° for the higher surfaces. The central counties had an average of 47° at observed stations, with a very considerable area of 50° in the valleys, and of 52° at West Chester, Swarthmore, Uniontown, Pottstown and Carlisle, 53° at Pittsburgh, and 55°.6 at Philadelphia, which is not a full degree below the average for a series of years. The mean at Erie was 48°.9, and therefore 4°.4 below the general mean of 53°.3.

The season at the Lake Shore was probably not so much extended as usual, owing to the severe frosts in September and October. None of these changes were either caused or attended by general storms of severity. The month was remarkably free from storms or floods, the rainfall being generally light. The south-western part of the State is reported as very dry. In Westmoreland county the scarcity of water in wells and cisterns is causing much inconvenience. At several posts of observation, the rainfall was less than an inch, as Pittsburgh, State College, Ridgway, McConnellsburg, Huntingdon, Indiana, Greenville, Washington, Greensburg, Catawissa, Charlesville and Phillipsburg. Erie and Fallsington were exceptional with 4.43 inches at Erie, and 3.06 at Fallsington. The number of rainy days varied from four to seventeen, the average for the State being seven. A severe wind storm from the south-west and west occurred in Greensburg, Greenville, Clarionville, Indiana, Meadville and Scranton on the evening of the 23d. The general atmospheric movement for the month was rather less marked than usual, and no north-east storm occurred east of the Alleghenies, as often happens in October.

Lunar halos were observed at Quakertown on the 1st, Indiana 27th, Clarion 27th and 28th. Wild geese were observed flying south on 22d and 26th at Quakertown, 25th at Doylestown and Dyberry, and on the 27th at Greensburg. The observer at Quakertown reports plum trees in blossom on the 14th, and apple trees on the 25th in protected situations. The ground was frozen at most stations on the morning of the 31st.

T. F. T.

PENNSYLVANIA STATE WEATHER SERVICE BULLETIN FOR NOVEMBER, 1887.

Hall of the Franklin Institute,
Philadelphia, *December 1, 1887.*

Owing to delays in procuring a supply of standard instruments, the number of stations reporting and represented in the annexed summary is the same as last month, but it is gratifying to notice the improvement of the service, as shown by the increase of the data contained in the reports, as well as by evident marks of more careful preparation.

The committee is assured that the instruments are about ready, and they will be sent out as soon as practicable to the observers who have been waiting for them.

Attention is again called to the value of local newspaper clippings containing matter of information to the service, and observers are requested to forward them with their reports.

The committee would be glad to hear from Senators or Representatives from counties where stations are not yet established, so as to be assisted in making proper selections of observers, and to confer with parties properly recommended, who desire to take part in the work.

It is very desirable to have records from each county, beginning with the new year.

For the Committee, etc.

W. P. Tatham, *Chairman.*

Sergeant Signal Corps, Assistant.

Remarks.

The mean temperature of the State for November was 39°.2, which is about normal.

The highest temperatures occurred on the 27th, and ranged from 65° at Girardville and Dyberry to 79° at Washington.

This extreme was followed by a cold wave on the 29th and 30th, during which the following low temperatures were noted: Wellsboro', 1°; Drifton, 6°; Clarion, 8°; State College, 8°.5; Greenville, 8°.4; Indiana, 9°, and Philadelphia, 25°. This cold wave was general throughout the United States, and low temperatures extended to the southern parts.

One of its notable features was its slow progressive easterly movement after reaching the Alleghenies.

The greatest daily ranges of temperature during the month occurred about the 2d, and the least daily ranges on the 11th, 15th and 24th. Until the last of the month, the ground was not frozen, so as to seriously interfere with ploughing. Frosts were numerous and general.

The average rainfall for the State was 1.80 inches, which is but little more than half of the usual quantity for November.

The stations reporting the most are Erie 4.13 inches, Dyberry 2.60 inches, Clarion 2.45 inches, Indiana 2.44 inches, Wysox and Greenville each 2.38 inches. The least occurred at Charlesville, .90 inch. and Carlisle .96 inch. The dates on which general rains occurred were the 10th, 11th, 14th, 15th, 19th, 20th, 24th, 25th and 28th.

Much inconvenience has been experienced in many counties from the drouth. In Clearfield and Luzerne counties streams and wells are reported very low. In Northumberland, the scarcity of water has been severely felt at the collieries. During the entire month the fear of a water famine was general in Berks county. Farmers were hauling water in barrels for home use, and cattle were driven daily to running streams, often long distances from home. Springs that were never known to fail ceased to flow.

It is said that the Schuylkill has not been so low for many years. Much damage has been done throughout several counties by forest fires. Light snows prevailed throughout the State on the 10th, 11th, 19th, 20th and 30th. The greatest depth reported was six inches at Scranton and Grampian Hills.

Like September and October, the month was free from severe storms. An area of low pressure, reaching 29.330 at Erie, 29.341 at Pittsburgh and 29.460 at Philadelphia, passed over the State on the 19th, attended by light snow and rain, and was followed by a slight cold wave. An unusual high pressure occurred on the 30th, the barometer reaching 30.920 at Erie and 30.820 at Philadelphia. This was attended by the low temperatures of the 29th and 30th. The following mean barom

eters were reported: Erie, 30.039; Pittsburgh, 30.061; Philadelphia, 30.073. Lunar halos were observed at several stations on the 21st, 22d, 25th, 26th, 27th and 30th. Thunder storms occurred at Grampian Hills on the 11th and at State College on the 28th. Williamsport reports an aurora on the 28th.

APPENDIX.

Act of 21 March, 1837. Section 4.

The Governor of this Commonwealth is hereby authorized to draw his warrant upon the State Treasurer, on the 1st day of April next, in favor of the treasurer of the "Franklin Institute of the State of Pennsylvania, for the Promotion of the Mechanic Arts," for the sum of two thousand dollars, and for the further sum of one thousand dollars on the first day of April for each of the two years next ensuing, for the purpose of promoting the improvement of meteorological science, and the furnishing of each county of this Commonwealth with the necessary instruments for the observation of such atmospheric changes and phenomena as may be useful for the promotion of knowledge in the science of meteorology.

Extract from the minutes of the meeting of the committee on meteorology of the Franklin Institute, held January 22, 1838.

The chairman of the committee of distribution reported a list of persons in the several counties of the State who had accepted the charge of the meteorological instruments, provided in accordance with the act of the Legislature of this State.

These were as follows, according to the enumeration of the counties adopted by the sub committee:

No.	County.	Name.	Address.
1	Philadelphia.		
2	Montgomery,	William Hough,	Norristown.
3	Bucks,	Lemuel H. Parsons,	Doylestown.
4	Lehigh,	Christ F. Beital,	Allentown.
5	Northampton,	Lafayette College,	Easton.
6	Monroe,	James H. Stroud,	Stroudsburg.
7	Pike,	Milo H. Dominick,	Milford.
8	Wayne,	John Torrey,	Honesdale.

VITAL STATISTICS.

Under the act approved the 3d day of June, 1885, to establish a State Board of Health and Vital Statistics, among other things authority was given to the Board so created to have supervision over a State system of registration of births, marriages and deaths. The preparation of the necessary blanks and other forms for obtaining and preserving such records, and the registration of the same, were imposed upon the Central Bureau of Vital Statistics, located at the State Capital. The clerical duties and the safekeeping of the Bureau of Vital Statistics were charged upon the Secretary of Internal Affairs, who was also to provide and furnish apartments and stationery for the Bureau. In accordance with the provisions of this act, the Secretary of the Bureau of Vital Statistics, Dr. Benjamin Lee, had blanks prepared for the quarterly returns of marriages on the first day of January, April, July and October. The blanks called for the date of marriage, the full name, occupation, residence, place of birth, age and color of the male, and the same information regarding the female, except the occupation. These blanks have been furnished to the clerks of the orphans' courts of the several counties, whose duty it has been, under the marriage license law, to keep a record of marriage licenses issued under the act of June, 1885. Only thirty-six counties, embracing the following, have made returns: Adams, Berks, Beaver, Blair, Bedford, Bucks, Butler, Cameron, Centre, Clarion, Clearfield, Columbia, Crawford, Cumberland, Elk, Fayette, Forest, Franklin, Greene, Jefferson, Juniata, Lancaster, Lawrence, Lebanon, Lehigh, McKean,

Mercer, Mifflin, Monroe, Montour, Northumberland, Perry, Potter, Union, Venango and Warren.

In these thirty-six counties there have been 10,520 marriages. Most of these counties have sent returns for only fractions of the year, but ten having complied fully with the request for these statistics. These ten are Beaver, Cameron, Clearfield, Fayette, Greene, Jefferson, Lehigh, Monroe, McKean and Potter. Undoubtedly the clerks of the several counties deemed that they had a good excuse for failing to comply with these instructions, as the act referred to makes no provision for compensation for such work. On this account the act, like many others, fails to accomplish what was intended by the Legislature. The Legislature should make it the duty of clerks of courts to furnish these reports, and provide a penalty for failure to do so, or furnish reasonable compensation for such service. Until such provision is made, full and complete reports from all the counties cannot be procured.

The following table shows that of the 10,520 marriages reported, the ages of 10,368 males and the same number of females were obtained. It will be seen that the age of the youngest female was 13 years, and the youngest male 17 years; the age of the oldest male 85, and that of the oldest female 69. The average age of the males at the time of marriage was 27.6; of the females, 23.27. The following table exhibits the number of marriages at the different ages between the minimum 13 and the maximum 85:

TABLE SHOWING AGES AND NUMBER OF MALES MARRIED.

Ages, . .	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31	32	33	34	35	36	37	38	39	40	41	42	43	44	45	46	47	48

Colored, 99. Divorced, 42. (Total Number, 10,383.) Average age, 27.06.

TABLE SHOWING AGES AND NUMBER OF FEMALES MARRIED.

Ages,	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31	32	33	34	35	36	37	38	39	40	41	42
No. married at above age	1	14	66	248	547	948	1 019	928	1,435	1,032	800	649	487	410	284	246	149	148	91	91	86	57	72	52	43	45	27	67	22	37

Ages,	43	44	45	46	47	48	49	50	51	52	53	54	55	56	57	58	59	60	61	62	63	64	65	66	67	68	69
No. married at above ages	29	23	39	10	12	15	17	19	15	15	13	8	10	7	1	3	5	6	4	4	3	2	2	1	2	1	1

Colored, 99. Divorced, 50. Both parties divorced in four cases. (Total Number, 10,383) Average age, 23.27.

The reports generally fail to show the place of nativity of the contracting parties. The occupation of the males as reported, were, 2,306 engaged in agricultural pursuits; 685 in mining, and the remaining 7,377 in the professions, mechanical arts, merchandise and ordinary labor.

The marriage license law went into effect on the 1st of October, 1885. There were only three counties, Mifflin, Montour and Venango that made reports the first quarter under this law. The following table exhibits the marriages from 27 counties, based upon the returns for the year 1886, with the average number per 1,000 of the population as reported by the last census :

COUNTIES.	MARRIAGES—1886.		
	Number.	Average.	Population.
Adams,	218	6.8	32,454
Berks,	895	7.3	122,599
Beaver,	299	7.6	39,603
Blair,	476	8.9	52,751
Bucks,	318	4.6	68,656
Butler,	262	5.0	52,536
Cameron,	50	10.0	5,159
Clarion,	180	4.5	40,326
Clearfield,	351	8.1	43,407
Columbia,	194	6.1	32,408
Cumberland,	336	7.3	45,978
Crawford,	312	4.5	68,607
Elk,	118	8.9	12,800
Fayette,	457	7.7	58,852
Franklin,	310	6.2	49,855
Greene,	139	4.9	28,290
Jefferson,	239	8.5	27,935
Lancaster,	950	6.8	139,447
Lawrence,	318	9.6	33,311
Lehigh,	506	7.6	65,696
Lebanon,	262	6.8	38,476
McKean,	94	2.2	42,566
Mercer,	360	6.4	56,162
Monroe,	93	4.6	20,175
Potter,	50	3.5	13,798
Union,	110	6.4	16,905
Warren,	162	5.7	27,981
	8,130	6.57	1,236,733

The average being about 6.57 per 1,000 of the aggregate population of these counties, to wit: 1,237,000. At the same proportion there would be 28,137 marriages in the State per annum. In order to avoid the requirements of the license law, numerous marriages of the residents of Pennsylvania take place in New York, New Jersey and other States. It is, therefore, impossible for us to approximate with any degree of certainty to the number of marriages that have taken place among the residents of Pennsylvania. It is estimated, however, that a very large percentage of the marriages of those persons living in the boundary line counties was solmenized outside of this State, and of

these marriages we have no record. From authentic information received from Camden, N. J., it has been ascertained that during the first year of the marriage law of Pennsylvania, the number of marriages solemnized in Camden was 4,000 greater than that of the year immediately preceding, and that in the second year there was a further increase of 700.

It will be observed that although the act of 1885, authorizing the collection of these statistics, provides for ascertaining the number of births and deaths, there have been no statistics gathered on these subjects, and it will be useless to make any effort in that direction until a law shall be passed making it the duty of certain officers to report these facts, providing a penalty for failure to perform such duty, and also providing compensation for the full discharge of the duty. Could these facts be ascertained they would undoubtedly furnish statistics which would be of great use to the people generally.

BUREAU OF ASSESSMENTS.

The Bureau of Assessments contains:

The records of the State and county rates and levies, as made in the several assessment districts; statistics exhibiting the total assessed value of both real and personal property returned as taxable for State and county purposes; a statement of the amount of all property exempt from taxation; and a record of the number of acres of cleared and timber land.

The principal work of this bureau is to procure from the county commissioners the facts referred to above; to examine the assessment returns, verify them, and compile and tabulate them for publication in the annual reports.

By the act of the General Assembly approved May 15, 1874, the county commissioners of each county were authorized and required to make an annual report to the Department of Internal Affairs, exhibiting the amount of real and personal property assessed in the several districts, and the total amount of county tax levied, together with the amount of county debt.

By the act of June 13, 1883, provision was also made for a return by the assessors to the county commissioners of the number of acres of cleared and timber land throughout the Commonwealth; but unfortunately no provision was made by which the commissioners could be compelled to report the aggregate of said assessors' returns, and we are therefore obliged to rely wholly upon their public spirit for the information. The law in this case utterly fails to accomplish what it was designed it should. It was no doubt supposed by the Legislature that the accumulation of these reports would be of great value to the people as statistics, and that they would also furnish to assessors information that would lead to a more uniform appraisement of values and greater equality in the levying of taxes. The purpose of the

Legislature was commendable, as no other question now at issue demands closer attention on the part of the lawmakers and the authorities levying taxes, than does the question of taxation. It is to be regretted that the demand upon the commissioners did not require information showing in *extensio* the amount of taxes assessed for all purposes, whether township, borough, school, city, county or State. Had such returns been required they would have exhibited figures of great value as statistics and also of great value to those upon whom devolves the delicate task of adjusting and establishing rates of taxation.

It has been the practice of the department to prepare and forward to the commissioners of the several counties, blanks that call for much more information than is required by the act referred to. From several counties, however, but little more information has been secured than could be enforced by mandamus. It will be seen, therefore, that these reports cannot be considered of any great weight as statistics, and that they may be misleading on the question of taxation.

The reports that are published herewith seem to be somewhat more complete than those published since the passage of the act of 1874. Special efforts have been made by this department to obtain all the information possible on the subject of taxation, and, while it has necessitated a great deal of correspondence and extra work, we have succeeded in a degree sufficient to furnish additional light to those who are interested. In this effort a commendable spirit has been manifested by many of the commissioners, as is clearly shown by their complete returns. But, on the other hand, some of them, as is shown by the vacant columns in their reports, have failed in the performance of their duty. They have exhibited a carelessness and disregard of the obligations devolving upon them as public officers which reflects upon them personally and does manifest injustice to the counties they represent. The assessments of 1887 compared with those of 1886 show a decrease of 5,086 in the number of taxables; an increase of 148,184 in the number of acres of cleared land, and a decrease of 461,916 acres of timber land. Had proper returns been made last year, and those of this year been correct, the decrease in the acreage of timber land would balance the increase of cleared land; but these figures would seem to indicate the disappearance of over 300,000 acres of timber land. The returns indicate an increase of $8,365,901, in the value of real estate exempt from taxation, and and an increase of $23,401,669 in the value of real estate taxable for county purposes. The value of horses returned is placed at $802,074 less than last year, while the number is increased to 9,285. There appears to be a decrease in the number of neat cattle of 6,429, with a decrease in value of $428,954, Salaries, emoluments of office, etc., are increased $1,959,-319. The aggregate value of all property taxable for county purposes is increased $22,206,398, while there is a decrease in the amount of

tax assessed for county purposes of $61,501 47. The returns show $54,494,749 more money at interest than the report of 1886. There is an increase of $648 in the value of stages, omnibuses, etc. In the aggregate value of all property taxable for State purposes there is an increase of $12,331,206 and a decrease of $57,859 08 in the aggregate amount of State tax assessed. The total amount of county indebtedness reported is $2,291,147 09 less than the total amount of such indebtedness for 1886. There are twenty counties that appear to have no debt. In many of the counties there is a slight increase in the number of taxables, Lackawanna county exhibiting the largest gain; and in a few there is a decrease. Bedford, Dauphin, Perry, Schuylkill, Somerset and Venango counties return the same number as last year. Carelessness and failure of duty on the part of many of the assessors may be inferred from the fact that the total number of taxables returned for 1887 is 5,086 less than the number returned for 1886; while the general advance of business and the consequent steady increase of subjects of taxation would naturally indicate an increase of many thousands in the numbers and values of taxables. In the county of Philadelphia there is a marked change which reflects discredit upon those who have charge of assessments. In 1886 the returns show 249,880 taxables, while this year's returns indicate but 229,092. Certainly these figures cannot approximate the truth when we consider the wonderful prosperity of the city of Philadelphia.

Twenty-two counties do not report any cleared land and twenty others fail to state the number of acres of timber land. Nineteen counties fail to report the value of real estate exempt from taxation. Philadelphia and Lancaster make no return of salaries, emoluments of office, trades, etc. Last year the counties of Lancaster and Lackawanna returned no money at interest, while this year Lancaster returns $24,194,031 and Lackawanna $3,688,740. These amounts, added together, make $27,882,771, or nearly one-half of the total increase in the State since last year. It therefore follows that the figures which on their face indicate an increase of fifty-four millions of dollars at interest are utterly fallacious and misleading. The commissioners of Lancaster county fail to give the number of acres of cleared land, the value of property taxable for State purposes, and the amount of State tax assessed. It is to be regretted that this county in whose importance, wealth and progress her citizens take a just pride, should appear in such an unenviable light in this report.

The act of May 13, 1887, repealed the law which authorized the levying of tax upon household furniture, pleasure carriages and watches. At the time this act became a law the levies for 1887 had been made. Duplicates in most of the counties with taxes assessed upon these articles for 1887, were in the hands of the collectors.

The question was raised by the commissioners of some of the counties whether the repealing act referred to applied to the taxes for

1887. In order that the department might be able to give satisfactory and authoritative information on this subject, a communication was addressed to the Attorney General for his opinion in the premises, to which inquiry the following reply was received:

HARRISBURG, *June 3, 1887.*

Hon. THOMAS J. STEWART,
Secretary of Internal Affairs:

DEAR SIR: In answer to your question whether returns should be made by county commissioners, of carriages, watches and furniture, for 1887, as taxable articles, and whether the laws taxing watches, household furniture and pleasure carriages are now in force for any purpose, I have the honor to state that by the act of 13th May, 1887, all taxes for whatever purpose laid upon the said articles were abolished, and all laws under which said taxes were levied and collected, and so far as they relate to said property, were repealed. The statute is sweeping in its terms. It abolishes the tax, and with it all remedies for its collection, whether assessed prior to the repeal or not. In my opinion, therefore, no returns are required of the said property as taxable.

Very truly yours,

W. S. KIRKPATRICK,
Attorney General.

Immediately upon the receipt of the foregoing, corrected blanks for reports, accompanied by a circular letter embracing the opinion referred to, were transmitted to the county commissioners of each county upon which returns were secured with these former articles of taxation excluded, excepting the returns from the counties of Bradford, Clarion, Jefferson and Philadelphia.

This repealing act caused much confusion in the collection of taxes throughout the Commonwealth, when all difficulty could have been avoided by a simple provision in the law that it should not apply to the taxes of 1887, or those levied at the time of its approval.

These comments, based upon comparisons made between the returns of 1886 and those of 1887, must convince any careful observer that the present machinery provided by law for collecting and furnishing statistical information for the benefit of the officers and people of the Commonwealth, utterly fails to accomplish the objects for which it was intended, and in its present imperfect condition tends only to mislead and confuse.

The report, however, as given is as complete as could be made with the data furnished, and it is respectfully submitted in the hope that the many defects so conspicuously shown, and to which attention has been directed, may impress the next Legislature with the necessity of perfecting the laws and providing machinery that will in the future

enable this department to furnish such reports as will be worthy of the great Commonwealth of Pennsylvania.

The assessment returns are embraced in Part II of this volume.

BUREAU OF INDUSTRIAL STATISTICS.

The frequent conflicts arising between the employed and the employer have rendered the work of the Bureau of Industrial Statistics of much public importance, and it will continue of importance until the combined wisdom of impartial men shall succeed in perfecting a plan for the equitable adjustment of the complicated questions that are constantly arising in the investment of capital and the employment of labor.

The province of the Bureau is, first, to make impartial examinations of the relations existing between capital and labor; of the educational, industrial and social condition of those engaged in manual labor, and to enunciate and advocate those principles of political economy which, if adopted, would tend to better the condition of all industrial classes; second, to collect, compile and publish labor statistics gathered from the employed and the employer; and, third, to publish the mine inspectors' reports from both the anthracite and bituminous coal regions, supplementing the same with statistics of the accidents that occur in mining operations.

The work of the Bureau is published in a separate volume designated as Part III, of the Department's reports.

BUREAU OF RAILROADS, CANALS, TELEGRAPHS AND TELEPHONES.

All corporations of the Commonwealth operating railroad, canal, telegraph and telephone lines are required to make annual detailed reports to this Department, showing the capital subscribed and paid in, the indebtedness, amount of business done, rates of transportation, amount of tonnage, cost of operation and maintenance, percentage and amount of dividends, number of accidents (with extent of injuries) to employés, passengers and others, and many additional facts of public interest; all of which are embraced in Part IV of the annual report of this Department.

A penalty of five thousand dollars may be imposed upon any corporation that fails to make report, in pursuance of the law, of the facts above enumerated.

THE BOARD OF PROPERTY.

During the past year there has been no great pressure of business to claim the attention of the Board. As there has always been more or less difficulty experienced in getting cases for consideration properly before the Board, owing to the general lack of knowledge on the part of attorneys regarding the regulations and manner of procedure, the rules have again been published in full in the appendix of this report

for the information of those who may have business to submit for the consideration of the Board. During the past year the Board held eight meetings, special and stated, at which eighteen cases were heard and acted upon with the following results: Four patents ordered to be granted, two warrants ordered to be issued, one resurvey ordered to be made and four cases ordered to be stricken from the docket. There are still a number of motions and questions pertaining to the granting of patents and warrants and the acceptance of surveys pending for determination by the Board.

APPENDIX.

BOARD OF PROPERTY.

A Board of Property, consisting of the Attorney General, Secretary of the Commonwealth and Secretary of Internal Affairs, is authorized by law.

Its powers are to "hear and determine in all cases of controversy on caveats, in all matters of difficulty or irregularity, touching escheats, warrants on escheats, warrants to agree, rights of preëmption, promises, imperfect titles, or otherwise, which may arise in transacting the business of the said Land Office."

The present Board consists of

William S. Kirkpatrick, *Attorney General.*
Charles W. Stone, *Secretary of the Commonwealth.*
Thomas J. Stewart, *Secretary of Internal Affairs.*

Stated meetings of the Board will be held on the Wednesday following the third Tuesday of each alternate month of the year 1888, to wit: January 18, March 21, May 16, July 18, September 19, and November 21.

Regulations.

I. A caveat may be entered against the granting of a warrant, acceptance of a survey or granting of a patent. It must be in writing and addressed to the Secretary of Internal Affairs. A particular form is not required; but the application, survey or other office right against which it is entered, together with the reason for filing the same, should be distinctly stated.

II. A caveat entered against the granting of a warrant on any application on file bars the issuing of a warrant, unless, after hearing upon a citation, the Board should dismiss the same.

III. No caveat, note on survey, nor writing in the nature of a caveat, shall continue to bar the issuing of a patent to the person or persons against whom such caveat may be entered during a longer period than two years, unless the parties interested in the land shall within the term mentioned take out a citation thereon, in order to bring such dispute to a decision and prosecute the same to effect.

IV. A citation will be issued on a pending caveat on the application of any party in interest. Thirty days' notice must be given to the opposite party of the time at which the case will be heard by the Board, and either party desiring to take the depositions of witnesses to be read at the hearing is required to give the other ten days' notice of the time and place for taking such depositions.

V. The party who enters a caveat becomes plaintiff in the issue joined, and at the hearing shall open the case and may make the concluding argument.

VI. A petition for the rehearing of a case that has been heard and decided will not be considered unless the party presenting the same shall furnish evidence that the opposite party has had at least ten days' notice of the intention to present said petition.

VII. A petition for an order of re-survey must recite the name of the warrantee and date of warrant upon which the former survey was made, and state the reasons for such re-surveys.

VIII. Depositions of witnesses submitted to the Board become a part of the record, and cannot be withdrawn.

IX. Citations must be returned to the Department of Internal Affairs on or before the days fixed therein for the hearing of the cases in which they are issued. All acceptances of notice and agreements to continue cases must be in writing.

X Parties will be heard in person, or may be represented by counsel, as they may elect.

XI. The fees to be charged for the use of the Commonwealth in business relating to the Board are as follows:

Entering caveat,	$1 00
Issuing citation,	1 00
Recording application for re-survey,	1 00
Order of re-survey,	1 00
Copy of action or determination of Board,	1 00

XII. All communications for the Board should be addressed to the Secretary of Internal Affairs.

WARRANTS AND SURVEYS.

A warrant or order of survey authorizes the survey of vacant lands only, as they alone belong to the Commonwealth to grant; but whether the lands applied for are vacant or not, the land officers do not undertake to examine, and in most instances do not possess the means of ascertaining. Of this the applicant must judge for himself. If he know them to be appropriated by prior right, it is against conscience to take out a warrant for them or to have them surveyed as vacant. But he may assert the invalidity of a former grant and insist on a survey. In that case, the deputy surveyor ought, if it be known to him, to note it in his books and return of survey.

RETURNS OF SURVEYS.—Having finished the survey and plotted it, the surveyor ought to return it to the office of the Secretary of Internal Affairs. This is an important part of his duty. Many regulations and laws have from time to time required it, and from its omission frequent disputes have occurred. The deputy surveyor, however, is not obliged to return the survey until his fees and expenses are paid; and if the failure to return is occasioned by the neglect or refusal

of the party to defray them, any loss thereby sustained is imputable to him, and not to the officer. The regulation of the Proprietaries and the acts of Assembly concur in directing the return to be made on paying for the survey. * * * If the party pay or tender the fees, it is the duty of the surveyor to return the survey in a convenient time, and the neglect or fraud of the surveyor will not affect his rights. But it lies on the party to show that the want of the return was not occasioned by any fault or neglect of his own; and, if there is nothing to show that the surveying fees were paid, the inference is that they were not paid. The deputy, being a sworn officer, is, *prima facie*, presumed to have done his duty.

PATENTS.

A patent is a deed from the Commonwealth, under its great seal, conveying to the grantee all its rights in the land, describing it by metes and bounds, and it passes, as respects the Commonwealth, the complete legal title; all the preparatory measures of warrant, application, survey and acceptance being merged in the patent. The granting of a patent is *prima facie* evidence that all the previous requisites have been complied with. Before a patent can be issued the purchase money due, and the patent fee, must be paid; and the land is thenceforth discharged from the lien which till then existed. Generally, the rights of the grantee are concluded by the lines and boundaries described in the patent, though perhaps in a special case there might be an exception.

Third persons claiming by warrant, application, settlement, or otherwise may show that the patent was wrongfully issued to the patentee; or, rather, that he is trustee for him who has the right, the material consideration being, not who has the patent, but to whom it ought to have been granted—for the land officers, in issuing the patent, act merely in a ministerial capacity, and cannot change the rules of law or rights of parties. And even though he who has the patent sell to a *bona fide* purchaser without notice, the vendee is in no better situation. His claim under the patent may be contested by one having a better right by settlement, warrant or location. These titles are not equities within the ordinary rule of being unavailing against a purchaser of the legal title. A patent founded on a fraudulent survey, or obtained by misrepresentation and deceit, is void against third persons affected by it.

A patent, however, has always been received in evidence in the first instance, to show that the legal title was out of the Commonwealth. The question whether it is good is a subsequent one.—*Sergeant's Land Laws, p. 155.*

The following regulations, relative to issuing patents, are published for the information and guidance of owners of unpatented lands:

1. The patent must issue to the actual owner of the land, or party holding title under the warrantee, or to the executors, trustees, or heirs and legal representatives of the person in whom title was vested at death, or to the guardians of minor children of the deceased.

2. Warrantees who remain the owners of the land warranted and surveyed to them can obtain patents in their own names, (if no caveat remains undetermined), without furnishing any brief or statement of title, upon payment of back purchase money, interest and fees.

3. Executors, trustees and guardians representing the warrantee, or his heirs, who apply for patents, must produce evidence of their appointment as such.

4. When the land has passed out of the ownership of the original warrantee, or party who took out the office right, the applicant for patent will be required to furnish evidence of ownership.

5. The present owner of a part of a tract of land surveyed in pursuance of any given warrant, desiring to have a patent in his own name, can obtain it by having the county surveyor make return of survey of such part. In making the survey, the county surveyor must, besides giving the courses and distances and quantity of acres, in the particular part, indicate the residue of the original tract by dotted lines. The applicant will only be required to pay his proportion of the whole amount due on the tract, with fees. Evidence of ownership must accompany application.

6. When an unpatented original tract has been sold and sub divided, the several present owners may unite in an application and statement of title for a patent, and, upon payment of amount due, with patent and other fees, a patent will issue to them, the said applicants, their heirs and assigns, according to their respective rights and interests, without setting forth therein the particular interest of each.

7. In cases where it is difficult to submit the evidence of title required by this department, in order to obtain a patent, any one or more of the owners of the unpatented tract can, through this department, discharge the lien against said tract by the payment of the purchase money, interest and fees, shown to be due by the land-lien docket, and the interest since accrued, and a patent can at any time afterward be issued to those entitled to it, upon proof of ownership.

8. The accounts in the lien dockets are calculated to June 1, 1868. If to the amount due, as shown in its proper column, there be added the interest accruing from June 1, 1868, to the date of forwarding the docket to the prothonotary, at the rate given in the column of rate per cent. of interest, and on this sum interest be calculated at the rate of six per cent. from the time of forwarding the docket until the date of the application for patent, it will give the amount required to procure a patent. (See 2d sec. of the act of the 20th of May, 1864, printed on a subsequent page.) But interest is not charged on patent or other fees. (See act of the 5th of May, 1871.)

A statement of the amount due on any particular tract or tracts, or any other information in relation thereto, will be promptly furnished on application to this department.

Persons sending money to the Department of Internal Affairs for payment of arrears on unpatented lands and for records, &c., should send by registered letter, postal order, or express. Drafts, checks, or post-office money-orders must be made payable to the order of the Secretary of Internal Affairs.

MISCELLANEOUS.

The indorsement, similar to this, "Returned, &c., February 22, 1815," frequently found on copies of warrants and surveys. does not mean the date at which the return or survey was received at this office, but the date at which the Surveyor General made a return of the tract to the Secretary of the Land Office for patenting. And when such indorsement is found on the back of a copy of a warrant or survey, even at the date at which the office of the Secretary of the Land Office was discontinued, it is an evidence, in perhaps ninety-nine cases out of one hundred, that the tract is patented. Some exceptions have been found. Why the custom of marking the warrants and surveys thus, was introduced when a tract was patented, after the office of the Secretary of the Land Office was abolished on the 10th of May, 1844, is not apparent. This custom was discontinued on the 1st of January, 1868, and the indorsement, "Patented to ————, 18—," was substituted.

A mistaken idea, prevalent with many people not familiar with the Land Office, is that the Department has connected drafts, showing the location of every tract of land surveyed in the several counties, and that, therefore, whatever of vacant land there may be in the State can be readily found at this office, and that information can, without difficulty, be given as to the adjoining surveys of any named tract, without advising the Department of the names and dates of the warrants upon which such surveys were made. Had the lands of the Commonwealth been first surveyed and afterwards sold, this idea would have been correct, but the very reverse was the fact, for the lands were sold and warrants for subsequent surveys issued. And, because of this policy, the Department has only single and unconnected copies of the surveys. Unless a given survey calls for warrantee adjoiners, it would be a work altogether out of proportion to the fees allowed to undertake to search out all the warrants and surveys, perhaps for a whole county, in order to find the adjoining tracts, or search for a supposed vacant piece of land; but the task is comparatively easy when the party seeking the information learns, as he readily can from the county surveyor, or persons in the neighborhood, the names of all the surrounding warrantees and dates of warrants, and communicates that data to this Department.

It will be observed, from the foregoing, that in communication with the Department, it is of the first importance to give the name of the warrantee and date of warrant of the survey or patent about which inquiry is made; but when the date of warrant cannot be given, the party asking for official copies or information should give quantity of acres, location, the warrantee name of adjoining tract, or tracts, and any other data in his possession that will aid in searching for the tract.

Frequently applications for warrants for land, made out in due form, are sent to the Department unaccompanied by the purchase money and warrant fee, and as warrants cannot issue until the proper amount of money has been paid into the State Treasury, and, until all the requirements of the law have been complied with, the applications thus made gain no priority over others that may be made for the same lands.

The law does not contemplate that credit should be given on account of fees for searches and official copies; and, therefore, to save correspondence and insure more speedy attention, the proper amount of fees should be sent with each order. If too much is forwarded, the surplus will be promptly returned, with the official papers asked for.

DATES

At which the county land lien dockets, prepared under the act of the 20th of May, 1864, and the supplement of the 4th of April, 1868, were forwarded to the prothonotaries of the several counties:

INSTRUCTIONS TO COUNTY SURVEYORS.

I. Execution of Warrants.

1. You shall faithfully execute every warrant that may be directed to you from this Department, to the best of your skill, knowledge and understanding, *according to the express words* and order of such warrant, and not otherwise. *

2. You shall not make use of any chain-carriers but such as are of good character, who shall take a solemn oath, (which you are authorized by law to administer,) justly and exactly to execute their trust, without favor, partiality, or affection. †

3. You will not, under any circumstances, execute new warrants upon lands heretofore surveyed on old warrants or orders, but report, as nearly as possible, the circumstances relating to the same. And before you make return of any lands surveyed by you on new warrants, endeavor to be satisfied that no warrant of an earlier date has been issued for the same land; and on your return, certify whether the lands have been improved, and, if so, for how many years. ‡

4. You must not execute a warrant on any other land than that which it particularly describes; and in order that your return of survey may show that the warrant has been properly executed, it will be necessary for you to be particularly observant of the *adjoiners mentioned in the warrant;* and where there has been any change in them between the issuing and executing of the warrant, it must be noted in your return of survey. §

5. You will be particularly careful in executing warrants granted

* ¶ 1 of instructions of the Commissioners of Property to Isaac Taylor, Proprietary's surveyor for the county of Chester, signed by said Taylor, on the 28th of eleventh month, 1701.

† ¶ 6 of same.

‡ Adopted February, 1796.

§ Adopted in 1813.

after the 1st day of June, 1814, and not founded on actual settlement, not to interfere with the rights of settlers; and in all cases where an actual resident settlement is included, note on your return whether it was commenced prior or subsequent to the 28th day of March, 1814. *

6. You shall not make return of any survey but such as has actually been made on the ground; and you shall take care that all outlines and boundaries shall be fairly and visibly marked before you quit the field. †

II. Returns of Surveys.

7. You are to make a separate return of survey on each warrant or order issued from this Department within six months after the receipt thereof. ‡

8. Each return of survey must conform with the following requirements, to wit:

I. The paper or parchment used must be of the dimensions of at least eight by twelve inches.

II. It must contain a protracted figure of the land, exactly performed, with the field work annexed.§

III. All streams of water, roads, railroads, canals, township or county lines intersecting or crossing the lines of the survey must be distinctly and visibly marked on the draft at the very place of intersection or crossing, and the distance from the corners expressed in figures on the lines crossed.‖

IV. The lines of so much of the adjacent surveys as may serve to show their connection with the survey returned must be represented on the draft by dotted lines.**

V. When a survey is bounded by a creek or river, the bearings and distances of the several meanderings must be given. ††

VI. Note, whenever they can be obtained, the *warrantee* names of adjoining tracts, as well as the names of the present owners thereof should be given.

VII. The certificate on each return of survey must be made in accordance with the proper form, as printed in the annual reports of the Department.

9. When you return a survey of a part of a tract of land for patenting, you must specify the name of the warrantee, the date of the warrant and the number of acres contained in the whole tract, and on the draft represent the residue of the tract by dotted lines.‡‡ But you are, in no event, to make and return to this Department a "resurvey" of

a tract, either to include more land or to exclude any part, or in any wise alter the original boundary lines thereof, *unless authorized to do so by an order of the Board of Property.* When an order of resurvey has been issued, and sent to you for execution, you are strictly to follow the directions therein contained.

10. You may make official returns of surveys actually made by your predecessors, after having satisfied yourself of their correctness, and that they have been located according to the calls of the warrants.*

11. Surveys intended to be returned to this Department must be made or approved by you.

12. You may survey and return any surplus not exceeding one hundred acres above the quantity mentioned in the warrant, location, ro order of survey. The purchase money for all the surplus land surveyed on warrants must be first paid into the State treasury before the return of survey can be accepted in this Department, of which you will give notice to the owner or owners of such warrant, and always send the money to pay the excess with the return of the survey.†

13. All returns of survey, in order to conform with the files of the department, should be folded as follows: Double the sheet by bringing the upper and lower edges of the sheet evenly together, then fold in each side so as to make a form about two and seven-eighth inches wide, and in length from six to seven inches, according to the size of the sheet. The back of the return should be left blank.

14. With each return of survey send a copy of the tabling and calculation thereof on a separate piece of paper.‡

15. All returns to this Department must be under cover, directed to the Secretary of Internal Affairs, with your name subscribed on the back of the paper or envelope inclosing the same.§

III. Office Duties.

16. You will keep your office open for the reception of all warrants directed to you, which shall be entered in a book kept for that purpose, designating therein the name of the warrantee, quantity of land granted, date of warrant, and the day when you received it. Also, in another book, you will keep fair and regular entries, in order of time, of all surveys and resurveys made by you in pursuance of any warrant or order of survey which you may receive, with a draft or plot thereof, and a copy of the field notes. And the Secretary of Internal Affairs shall, from time to time, have free access to said books of entry and to all other papers relating to your office, which books and papers shall be delivered by you to your successor.‖

---

* ¶ 9 of instructions issued in 1833.

†Act of 13th of March, 1817; repealed by act of 6th of April, 1830; restored by act of 21st of April, 1869.

‡Adopted 1853. See forms.

§Adopted June 7, 1824.

‖ ¶ VIII of the instructions of 1765.

17. Under the provisions of the Constitution of 1873, you are required to keep your office at the county town; but if you desire letters sent to any other address, advise this Department.

18. Before you can enter upon the duties of your office, you must comply with the seventh section of the act of Assembly passed the 9th day of April, 1850, which requires you to take an oath or affirmation, which must be administered in the open court of quarter sessions;* to send a copy of said oath, duly certified, to this Department; and to have your bond approved by the court, and recorded in the office for recording deeds in the proper county, and to forward the same to the Secretary of the Commonwealth, with one dollar, the fee for filing in his office.

RECENT LEGISLATION RELATING TO THE LAND OFFICE.

COUNTY SURVEYORS,

Their Duties.

Under the Proprietary government, deputy surveyors were appointed by the Proprietary, the Commissioners of Property, or the Surveyor General, for certain districts, and given authority to execute warrants or orders, by making surveys and returns thereof to the Land Office. The duties of these deputies were defined by letters of instructions, issued from time to time. Those dated the 28th of Eleventh month, 1701, revised and enlarged in 1765, contain such directions as were then deemed necessary for the information and guidance of the deputies, and formed the basis of those now in force. The act of Assembly of the 9th of April, 1781, establishing the Land Office under the Commonwealth, authorized the Surveyor General to appoint a deputy or deputies in any county of the State, who should have power to make and return into the Land Office surveys of land only in the county for which such deputy or deputies shall be appointed; and the act of 1st April, 1784, by virtue of which the Land Office was opened on the 1st day of July following for the sale of the vacant lands of the Commonwealth, directed that its several officers should transact the business of the Land Office, agreeably to the former customs and usages thereof. By subsequent legislation, the duties of the deputies were more clearly defined. The act of 9th April, 1850, [P. L., 434,] authorized the voters of each county, at the following general election, and every third year thereafter, to elect one competent person, a

* Constitution, Art. VII, Sec. 1, requires oath of all county officers to be filed in the office of the prothonotary of the proper county.

practical surveyor, to act as county surveyor for the proper county for the term of three years, who is required to do and perform all the duties which then pertained to the respective deputies of the Surveyor General.

Term of Office.

[*Constitution, Art. XIV.*]

Section 1. County officers shall consist of sheriffs, coroners, prothonotaries, registers of wills, recorders of deeds, commissioners, treasurers, surveyors, auditors or controllers, clerks of the courts, district attorneys, and such others as may, from time to time, be established by law. * * * * * * * * * * *

Section 2. County officers shall be elected at the general elections, and shall hold their offices for the term of three years, beginning on the first Monday of January next after their election, and until their successors shall be duly qualified; all vacancies not otherwise provided for shall be filled in such manner as may be provided by law.

To Keep Office in the County Town.

Section 4. Prothonotaries, clerks of the courts, recorders of deeds, registers of wills, county surveyors, and sheriffs shall keep their offices, in the county town in which they respectively shall be officers.

To Hold Office Until Successor is Qualified.

[*Act of 17th April*, 1869. *P. L.*, 67.]

A supplement to an act entitled "An act relative to the election of Auditor General, Surveyor General, and county surveyors by the people," approved April ninth, one thousand eight hundred and fifty.

Section 1. That the persons now or hereafter holding the office of county surveyor shall continue to hold and exercise all the duties appertaining to said office until their successors are duly qualified according to the provisions of the act to which this is a supplement.

Fees.

[*Act of 13th April*, 1859. *P. L.*, 606.]

An act relating to the fees of county surveyors.

Section 1. That the several county surveyors of this Commonwealth shall be and are hereby authorized to charge and receive for the services hereinafter mentioned the following fees, and no more, to wit:

For receiving warrant and giving receipt for the same, if required, ... $0 25

For executing warrant, not exceeding one hundred acres, . . . 4 50

For each additional one hundred acres on same warrant, . . . 75

For return of survey to Surveyor General's office, [Department of Internal Affairs,] 1 00

For draft thereof to the warrantee, ... 25

For executing order of resurvey and making return thereof, same fees as for like service on original survey.

For certifying survey made by deputy, ... $0 50
For each mile necessarily traveled in going to and returning from land, ... 10

EXCESS.

[*Act of 2 st April*, 1860. *P. L.*, 87.]

An act relative to returns of surveys to the office of the Surveyor General.

SECTION 1. That so much of the second section of the act approved the sixth day of April, Anno Domini one thousand eight hundred and thirty, as restricts returns of surveys on warrants thereafter to be issued to an amount not greater than ten per centum beyond the number of acres for which the warrant issued, be and the same is hereby repealed: *Provided*, That any excess which may be returned under the provisions of prior laws shall be paid at the time of making such return of survey to the Surveyor General, otherwise the same shall not be accepted.

[Any surplus not exceeding one hundred acres may now be returned on any warrant or order of survey, provided that the money for such surplus accompanies the return. See paragraph 12 of "Instructions to County Surveyors.]"

FEES.

[*Act of 15th April*, 1873. *P. L.*, 75.]

An act relating to the fees of the Surveyor General.

SECTION 1. That from and after the passage of this act the fees to be collected by the Surveyor General for the use of the Commonwealth shall be as follows, namely:

For warrant, including return thereof, ... $5 00
Patent for five acres or less, ... 5 00
Patent for more than five acres, ... 10 00
Copy of patent, ... 1 00
Certificate with seal of office on patent, when mortgage is discharged, ... 50
Every search, ... 25
Calculation of money due on land, including search, ... 50
Caveat, ... 1 00
Issuing citation, ... 1 00
Recording application for and making order of resurvey, . . 1 00
Order of the Board of Property, directed by the Surveyor General to the county surveyor to be executed, ... 1 00
Copy of action or determination of Board of Property, with seal, 1 00
Order for valuing islands, ... 2 00
Entering application on petition to the Board of Property, together with the minutes thereon, for any other purpose than a resurvey, ... 1 00

Certified copy of a draft of a single tract, with certificate and seal, $1 00
Connecting separate drafts into one general draft, with certificates for each separate draft therein, ... 75
Copy of general draft of town or out-lots, for each tract of land therein described, ... 25
Extract from a general draft, for each tract of land therein described, ... 25
Copy of draft of lots or tracts of land annexed to certificate of Connecticut claimants or others, for each tract, ... 75
Copy of warrant, application, or any other office right, relating to but one tract of land not hereinbefore enumerated, . . . 50
Copy of extract from the deputy surveyor's list of returns, and all other extracts not hereinbefore recited, for each tract, . 25
Copy of any record or paper or any part thereof, not included in the foregoing, for two hundred words or less, ... 50
And for every ten words additional, ... 1
Certifying and affixing seal of office to any copy, connected draft, extract, certificate or minute, ... 25

Section 2. All laws and parts of laws inconsistent herewith are hereby repealed, so far as they relate to the fees of the Surveyor General.
Entering lien, under act of 20th May, 1864, for each tract, . . $5 00

LIENS FOR UNPAID PURCHASE MONEY.

1. List of unpatented lands to be forwarded to prothonotaries.
2. Unpaid purchase money, &c., to be entered on lien docket. Interest.
3. Prothonotaries to docket descriptive lists of unpatented lands. Courts, on hearing, may strike off such entry.
4. Supplied by paragraph 10.
5. Repealed by act of April 4, 1868.
6. Graduation act of 1835, continued until November 1, 1864.
7. Attorney General to proceed on liens.
8. Time allowed to persons in the military or naval service.
9. Changed by act of April 15, 1873. [See note.]
10. Land lien dockets. Entries thereon. Fees.
11. Repeals sec. 5 of act of May 20, 1864.
12. Notice to be given when lien dockets have been forwarded to prothonotaries.
13. No suit to be entered for one year.
14. Release of liens on proof of payment.
15. Board of Property to regulate suits for unpaid purchase money. Interest not to be charged on fees.
16. Lists to be furnished to county surveyors.
17. County surveyors to give notice to owners or occupants.
18. County surveyors to make report to Surveyor General.
19. Surveys to be made of parts of original tract.
20. Suits to be by *scire facias*. Service.

[*Act of 20th May, 1864. P. L., 914.*]

An act directing the entry of liens for the principal and interest due the Commonwealth, for lands held by virtue of locations, or other office titles.

1. Section I. That it shall be the duty of the Surveyor General to

make out a list of all lands held by location, or any other office right, issued from the Land Department of this Commonwealth, of every kind and description, upon which no patents have issued, designating the county in which such lands are situated, with such other descriptions of the same as the records of his office will enable him to give, including the names in which such locations or other office rights are entered, and surveys have been returned; and on the list being completed, or any part thereof, be transmitted to the prothonotary of the county in which such lands are situated.

2. SECTION II. That it shall be the duty of the Surveyor General to calculate the amount of purchase money, interest and fees, due on each unpatented tract; and after the descriptions of said tracts have been transmitted to the prothonotaries of the respective counties, and entered, as hereinafter provided, the amounts so found to be due, together with five dollars for the labor and costs of making out and filing, shall form an aggregate sum which shall be entered in a lien docket to be provided and kept for that purpose, and said sum shall bear interest at the rate of six per cent.

3. SECTION III. That it shall be the duty of the prothonotary of each county, upon receiving any descriptive list as aforesaid, to provide a suitable docket, with a proper index, for the purpose of recording all such descriptions of unpatented lands, and shall accurately record the same and index the name of the original warrantee or actual original settler, as the case may be, and each subsequent owner so far as ascertained, and preserve the same among the records of the county: *Provided*, That when any party in interest, by petition under oath or affirmation, setting out the facts in the case, as in affidavit of defense, shall represent to the president judge of the court of common pleas of the county, in which any tract or piece of land, against which the entry directed in the foregoing section has been made, or the principal part thereof, may lie, that said tract has been patented, either in the name against which the entry is made, or in any other name, the said judge shall after such notice to the Surveyor General as he shall deem proper, proceed to hear the case of the petitioner; and the said judge shall, thereupon, make such decree in the premises, either by directing the said entry to be struck from the record, or such other order as to said entry, and also as to costs, as may seem equitable.

4. SECTION IV. That it shall be the duty of the prothonotary of each county, upon receiving from the Surveyor General any such list or calculation of amounts due the Commonwealth for purchase money, interest, and fees, to provide a suitable docket with index, in the form of the lien dockets now in use in the several counties of this Commonwealth, to be styled "Lien Docket of Unpatented Lands," and enter therein the amount so found to be due, which sum shall remain a lien upon such tract or tracts, until paid; and that a fee of fifty cents be paid to the prothonotary for each description so entered, and

that he be allowed the same fees on the liens entered, as are now allowed on judgments entered by warrant of attorney in the court of common pleas.

5. Section V. That it shall be the duty of the prothonotary, upon receiving any such descriptive list, to cause the same to be published in two newspapers in the county where such lands are located, for three successive weeks, for which publication he shall be authorized to pay fifty cents for each tract, and charge the same as costs on the lien docket, and retain his fees and costs out of any moneys, in his hands, due the Commonwealth.

6. Section VI. The amounts which may be due to the Commonwealth on the lands mentioned in the first section of this act, may be paid in accordance with the existing laws in relation to such lands, if the same be paid prior to the first day of November next: *Provided*, That any costs, which may have accrued in accordance with the provisions of this act, shall also be paid, and that the act to graduate lands on which money is due and unpaid to the Commonwealth of Pennsylvania, approved April tenth, Anno Domini one thousand eight hundred and thirty-five, be revived and continued in force, until the said first day of November next; and any survey and appraisements, made since the first day of August last, shall have the same validity for the issuing of patents thereon, as if the last mentioned law had been still in full force.

7. Section VII. That all liens due the Commonwealth for unpatented lands, after the first day of November, Anno Domini one thousand eight hundred and sixty-four, may be proceeded upon by the Attorney General of the Commonwealth, in the manner directed to be pursued against defaulting public officers, by the act of April sixteenth, one thousand eight hundred and forty-five, and the supplement thereto.

8. Section VIII. All persons in the military or naval service of the United States, shall be allowed one year after the expiration of said service, for the taking out of any patent or patents under the provisions of this act.

9. Section IX.* That, hereafter, the patent fee, on town lots not exceeding one-fourth of an acre, shall be one dollar, and on lots not exceeding two acres, five dollars.

[*Act of 4th April*, 1868. *P. L.*, 60.]

A supplement to an act directing the entry of liens for the principal and interest due to the Commonwealth for lands held by virtue of location or other office titles, approved the twentieth day of May, Anno Domini eighteen hundred and sixty-four.

10. Section I. That in lieu of the descriptive lists provided for in said act, it shall be the duty of the Surveyor General to make out and forward to the prothonotaries of the several counties, lien dockets, to be styled "land lien dockets," containing lists of all unpatented and

* Section nine changed by act of April 15, 1873.

patented lands, situate in the counties respectively, upon which there is money due the Commonwealth, and in all cases where surveys have been returned, to enter therein the amount of purchase money, interest, and all fees due, and said aggregate shall remain a lien on such tract until paid or otherwise legally discharged: *Provided*, That the several prothonotaries shall be allowed to charge the fees now authorized by law when any information shall be desired from said records, and for entering any certificate under the seal of the Surveyor General, setting forth that any lien or part of lien against an unpatented tract has been paid, shall charge the party presenting such certificate a fee of twenty-five cents for entering and filing the same.

11. SECTION II. That the fifth section of the act to which this is a supplement, and so much of said act as is inconsistent herewith, be and the same is hereby repealed.

[*Act of 8th April*, 1869. *P. L.*, 21.]

An act directing public notice to be given when county land lien dockets are forwarded to the respective counties, and staying proceedings by the Attorney General for one year from the date of forwarding the same.

WHEREAS, The Surveyor General, at an early day, will be prepared to send out the county land lien dockets, containing accounts due the Commonwealth on account of lands, prepared under the act approved the twentieth day of May, Anno Domini one thousand eight hundred and sixty-four, and the supplement thereto, approved the fourth day of April, Anno Domini one thousand eight hundred and sixty-eight:

And whereas, It is proper that the people owing the State, for or on account of lands, should have notice when the liens therefor are entered in the counties, and that a reasonable time should be given to enable them to liquidate their indebtedness and obtain patents for their lands, before suits shall be brought in such cases by the Attorney General; therefore,

12. SECTION I. That when any county land lien docket, prepared under the foregoing acts, shall be forwarded to any county, the Surveyor General is hereby authorized and directed to cause a notice thereof to be given in one English newspaper, published at the county seat of such county, and also in one German newspaper, if there be one in said county, setting forth that the land lien docket for that county has been forwarded to the prothonotary thereof: *Provided*, That no greater sum than ten dollars shall be paid for such notice or advertisement for any one county; and on evidence being submitted to the Auditor General that such advertisement has been authorized by the Surveyor General, and inserted at the usual rates of advertising, he shall draw his warrant on the treasury in favor of the editor or publisher inserting the same.

13. SECTION II. That no suit or suits shall be entered or instituted by the Attorney General, under the provisions of the seventh section of the act of the twentieth of May, Anno Domini one thousand eight

hundred and sixty-four, until one year shall have elapsed from the date at which the Surveyor General shall have forwarded to each county, respectively, the land lien docket for the same.

[*Act of 15th April*, 1869. *P. L.*, 31.]

A further supplement to an act directing the entry of liens for the principal and interest due to the Commonwealth for lands held by virtue of locations or other office titles, approved the twentieth day of May, Anno Domini one thousand eight hundred and sixty-four.

Whereas, An examination of warrants and returns of survey show in many cases interferences in said returns, and in many instances where patents have issued on some of said surveys, there are balances due upon other warrants covering the same land; therefore,

14. Section I. That whenever satisfactory evidence shall be given to the Surveyor General that a lien or liens have been entered against lands for which the Commonwealth has been fully paid, both for land and patent fees, he is hereby authorized, and it shall be his duty, to give to the party or parties applying for the same a release of said lien or liens, so far as said patented lands are concerned; which said release may be entered on the land lien docket, in accordance with the provisions of the supplement to the act of which this is a further supplement, approved the fourth day of April, Anno Domini one thousand eight hundred and sixty-eight.

[As many persons will apply for releases under the provisions of this law, it is deemed proper to state what will be regarded as satisfactory evidence by this Department. Applicants, in order to avail themselves of the act, should cause a plot or survey of the patented tracts, and the unpatented interfering tracts, (showing the manner in which, and to what extent they cover the same land), to be made by the county surveyor, who will certify that he has made the same at the request of A, B, and C—the owners of the patented tracts, or parts of tracts, or their agents or attorney—giving names of warrantees and dates of warrants and patents, and names and dates of warrants of the unpatented lands, and that he believes the interference or interferences to be as delineated by him. On a paper appended to the above plot of surveys, the applicant or applicants, his or their agent or attorney, will be required to make an affidavit that the interferences are believed to be as delineated by the county surveyor. A release will then be issued to the owner or owners of the patented tract or tracts, relieving them from any and all liability to pay the liens of the Commonwealth entered against such interfering unpatented tract or tracts. Section seven of the act approved the 20th day of May, 1864, invested the Attorney General with authority to proceed against the owners of unpatented lands, to enforce the payment of the arrears of purchase money, interest, and fees due the Commonwealth on said lands. This power, by the following supplement, became vested in the Board of Property.]

[*Act of 5th May*, 1871. *P. L.*, 261.]

A further supplement to an act directing the entry of liens for the principal and interest due the Commonwealth for lands held by virtue of location or other office titles, approved the twentieth day of May, Anno Domini one thousand eight hundred and sixty-four.

15. SECTION I. That the Board of Property shall have full and discretionary power as to the time of entering suits and the number thereof, to be brought for the collection of liens against unpatented lands; and the Attorney General shall proceed, under the seventh section of the said act, to which this is a further supplement, when authorized to do so by the said Board: *Provided*, That no interest shall be charged on patent or other fees.

[*Act of 11th April* 1872. *P. L.*, 51.]

A further supplement to an act directing the entry of liens for the prineipal and interest due the Commonwealth for lands held by virtue of location or other office title, approved the twentieth day of May, Anno Domini one thousand eight hundred and sixty-four.

16. SECTION I. That for carrying into full effect the provisions of the act to which this is supplementary, it shall be the duty of the Surveyor General to make out and forward to the several county surveyors, respectively, from time to time, as the Board of Property may determine, special lists of warrantee names of unpatented tracts, or remaining parts of unpatented tracts, of lands within the several counties, as the same may appear upon the land lien dockets, with such other data relating thereto as he may deem necessary.

17. SECTION II. That it shall be the duty of the county surveyor of each county, to whom the Surveyor General may send special lists of warrantee names of unpatented tracts or parts of tracts of land, and other data relating thereto, situate in the county for which such surveyor shall have been elected or appointed, to endeavor to ascertain the names and residences of the owners, agents or occupiers, and location of said tracts or parts of tracts, or any of them, and to give personal notice in writing to said owners, agents or occupiers, that said tracts or parts of tracts are unpatented, and that unless the arrearages shall have been paid within six months from the time of sending or serving said notice, the Board of Property may direct proceedings to be commenced by the Attorney General to enforce payment, under the provisions of the act to which this is a further supplement: *Provided*, That when unpatented lands, as aforesaid, are unoccupied, and the owners are non-residents of the county, and have no known agent or agents within the county, the said notice may be given by sending it by mail, addressed to the owners or agents, and directed to the post-office nearest their place of residence or usual place of business: *And provided further*, That when lands as aforesaid are unseated. and have been sold for taxes, and the time limited for their redemption has not expired, it shall be the duty of the county surveyor to give

notice, in the manner hereinbefore provided, to the purchasers or their agents, and also to the parties, or their agents, who last paid taxes thereon previous to the sale.

18. Section III. That it shall be the duty of the county surveyor to whom such special list shall have been sent as aforesaid to make a written report in duplicate, within three months, to the Surveyor General, filing a copy of the same in the prothonotary's office of each county, setting forth the names of warrantees, dates of warrants, location of tracts, and the names and residence of the owners, agents, or occupiers of the unpatented tracts or parts of tracts, upon whom he has served the notices as aforesaid, together with the manner of service; and for serving such notices on all the owners, agents, or occupiers of an original unpatented tract, or remaining part of an original unpatented tract, he shall be entitled to a fee of five dollars, to be paid out of the State Treasury, on warrants drawn by the Auditor General, upon the certificate of the Surveyor General.

19. Section IV. That it shall be the duty of the county surveyor, upon the reasonable request of any owner, or his agent, of part of an original tract which has not been patented, to make and return a return of survey of such part to the Surveyor General, and for which service his fees shall be the same as for executing a warrant of survey, as now provided by law for the same quantity of acres.

20. Section V. That when any suits shall be entered by the Attorney General, under the act to which this is a further supplement, it shall be by *scire facias sur liens*, which shall be directed for service to the sheriff of the county in which the land is situate; and if he finds it necessary to insure a service of said writ, he may call to his aid the county surveyor, who shall act as his deputy, for the purpose of serving such writ; and all such writs shall be made returnable to the court of common pleas of the county wherein such lands are situate, where all such suits shall be tried.

SECRETARY OF INTERNAL AFFAIRS.

[*Constitution, Art. IV.*]

[Section I names the Secretary of Internal Affairs as one of the Executive Department, and section 9 constitutes him a member of the Board of Pardons.]

Section XIX. [I.] The Secretary of Internal Affairs shall exercise all the powers and perform all the duties of the Surveyor General, subject to such changes as shall be made by law. His Department shall embrace

[II.] A Bureau of Industrial Statistics.

[III.] And he shall discharge such duties relating to corporations, to the charitable institutions, the agricultural, manufacturing, mining, mineral, timber and other material or business interests of the State as may be prescribed by law.

[IV.] He shall annually, and at such other times as may be required by law, make report to the General Assembly.

SECTION XXI. The term of the Secretary of Internal Affairs shall be four years. * * * * * * * *

[*Art. XVII.*]

SECTION XI. The existing powers and duties of the Auditor General in regard to railroads, canals and other transportation companies, except as to their accounts, are hereby transferred to the Secretary of Internal Affairs, who shall have a general supervision over them, subject to such regulations and alterations as shall be provided by law; and, in addition to the annual reports now required to be made, said Secretary may require special reports at any time upon any subject relating to the business of said companies from any officer or officers thereof.

[These provisions of the Constitution are enforced by acts of Assembly, passed in pursuance thereof, approved respectively on the 11th day of May, 1874, P. L., 135; the 15th day of May, 1874, P. L., 172 and 193; and by the following]:

[*Act of 8th May*, 1876. *P. L.*, 143.]

A further supplement to an act regulating the election of Secretary of Internal Affairs, defining his duties and fixing his salary, approved the eleventh day of May, Anno Domini one thousand eight hundred and seventy-four.

SECTION I. That the Secretary of Internal Affairs and his chief clerk, who shall hereafter be designated Deputy Secretary of Internal Affairs, shall have power and authority to administer oaths or affirmations in any or all matters pertaining to the business of his Department.

SECTION II. All maps, drafts, reports and other papers relating to surveys of State or county lines, State or turnpike roads, railroads, canals, or other public improvements now remaining in the office of the Secretary of the Commonwealth, and not connected with the other records of his office, shall, as soon as practicable after the passage of this act, be transferred to the Secretary of Internal Affairs, who is hereby authorized and directed to receive and deposit the same in his Department; and all such maps, drafts, reports and papers as are now by law required to be placed in the office of the Secretary of the Commonwealth, shall hereafter be deposited in the Department of Internal Affairs.

SECTION III. It shall be the duty of all commissions appointed to reëstablish any of the boundary lines of this Commonwealth, to erect a new county, or to annex part of one county to another county, to transmit a copy of their report to the Secretary of Internal Affairs, to be by him deposited in his Department.

SECTION IV. It shall be the duty of all commissions appointed to resurvey, re-mark, alter, or change any county line, to deposit dupli-

cate copies of their report in the office of the clerk of the court of quarter sessions of the proper county; and after the same has been confirmed by said court, the said clerk shall, upon one of the copies, certify such confirmation, and immediately transmit the same by mail to the Secretary of Internal Affairs, to be by him deposited in his Department.

Section V. Copies of all records, documents, entries, and papers now in the Department of Internal Affairs, or that may be transferred thereto in pursuance of this act, or that may hereafter be deposited therein according to law, shall be made and certified at the request of any person applying for the same, on the payment of the same fees as was prescribed by the fee bill for similar services in the Surveyor General's office at the time the same was merged into said Department, which fees shall be accounted for and paid into the treasury in the same manner as is now provided by law for other fees, to be collected by the said Secretary; and the said copies shall be received in evidence in the several courts of this Commonwealth, in all cases where the original records, documents, entries, and papers would be admitted in evidence.

* * * * * * * * * *

WARRANTS.

[*Act of 14th April*, 1874. *P. L.*, 58.]

An act relative to the issuing of warrants to survey vacant lands.

Section I. That every applicant for a warrant to survey any of the vacant lands of this Commonwealth shall produce to the Surveyor General a particular description of the land applied for, with an affidavit of a disinterested witness, made before a justice of the peace of the township or borough in which the land applied for, or the greater portion of it, is situate, or if there be no justice of the peace in such township or borough, before a justice of an adjoining township or borough, specifying whether the said land be improved or not, and if improved, how long since the said improvement was made, that interest may be charged as now provided by law. The applicant for such warrant shall declare, upon oath or affirmation, before a justice of the peace of the township or borough in which the land, or greater portion of the same, is situate, or if there be no justice in such township or borough, before a justice of an adjoining township or borough, that he verily believes that no warrant or other office right has previously issued for such land, or if one has issued, after giving full particulars in relation thereto, shall depose that he verily believes it has been abandoned; and if at any time thereafter it shall appear that the person or persons deposing, as aforesaid, or any of them, shall knowingly have sworn falsely, such person or persons shall suffer all the pains and penalties of perjury.

Section II. No warrant shall issue for any tract or piece of land on

which settlement is made, or which may be either in whole or in part cleared and fenced, or otherwise improved, used or occupied and held by defined boundaries, unless to such person or persons, respectively, who have made the settlement, clearing, fencing or improvement, their legal representatives or assigns, upon proof of ownership of such settlement or improvement right, and if any warrant shall issue otherwise than as aforesaid, it shall be void: *Provided*, That this section shall not apply to abandoned improvements.

SECTION III. Every applicant for a warrant to survey vacant land shall, after filing his or their application for such warrant, and depositing the amount of the purchase money and fee with the Surveyor General, give at least thirty days' notice of the filing of said application, with a full description of the land as set forth in the application by publication once a week for three successive weeks in one or more newspapers of the county in which the land is situate, and nearest its location, and shall furnish proof that such notice has been given before a warrant shall issue: *Provided*, That if any *caveat* or *caveats* shall have been entered against issuing such warrant, the same shall not issue until directed by the Board of Property, and if the Board of Property, after a hearing upon a citation issued in pursuance of any *caveat*, shall decide against issuing the warrant the purchase money shall be returned to the applicant.

SECTION IV. This act shall not apply to applications for warrants filed with the Surveyor General before its passage.

PRICES OF LAND IN PENNSYLVANIA AT VARIOUS PERIODS.

Prices Under Penn and His Heirs.

Previous to the 27th of December, 1762, £15 10s. ($41 33) per hundred acres, with the exception of a few warrants in the lower counties at £3 10s. ($9 33) per hundred.

From the 27th of December, 1762, to the 5th of August, 1763, £9 ($24) per hundred acres.

From the 5th of August, 1763, to the 6th of August, 1765, £15 10s. ($41 33).

Locations and warrants from the 6th of July, 1765, to the 1st of July, 1784, £5 sterling ($22 22).

Prices under the Commonwealth.

From the 1st of July, 1784, to the 3d of April, 1792, £10 ($26 66⅔) per hundred acres.

New Purchase of 1784.—From the 1st of May, 1785, to the 1st of March, 1789, £30 ($80)

From the 1st of March, 1789, to the 3d of April, 1792, £20 ($53 33⅓).

From the 3d of April, 1792, to the 1st of September, 1817, £5

($13 33⅓) for land in the purchase of 1784, east of the Allegheny river and Conewango creek, unimproved.

Purchase of 1768 and the Previous Purchases.—From the 3d of April, 1792, to the 28th of March, 1814, at the rate of fifty shillings ($6 66⅔) per hundred acres.

Lands in the purchase of 1784, lying north and west of the rivers Ohio and Allegheny, and Conewango creek, £7 10s. ($20).

Undrawn donation lands, from the 1st of October, 1813, at the rate of $1 50 per acre.

Donation lands reduced, from the 25th of February, 1819, to fifty cents per acre.

From the 21st of March, 1814, lands within the purchase of 1768, and the previous purchases, to be at the rate of £10 ($26 66⅔) per hundred acres.

From the 1st of September, 1817, lands within the purchase of 1784, ast of the Allegheny rive ⁄ and Conewango creek, at the rate of £10 ($26 66⅔), except such as have been settled on, agreeably to the act of 3d of April, 1792, between said 3d of April and 1st of September, 1817.

Seventeen townships in Luzerne county—price fixed by the commissioners: First-class, $2 per acre; second-class, $1 20; third-class, 50 cents; fourth-class, 8¼ cents.

Present Price.

The price of all vacant and unimproved land is now at the rate of £10 ($26 66⅔) per hundred acres, except the following:

Lands lying north and west of the rivers Ohio and Allegheny, and Conewango creek, $20 per hundred acres.

Reserve tracts near Erie, Waterford, &c., price fixed by commissioners.

Lands improved agreeably to the act of the 3d of April, 1792, fifty shillings ($6 66⅔) and £5 ($13 33⅓) per hundred acres.

Lands held by Virginia warrants, in the south-west part of the State—the warrants show the terms. Lands were taken under Virginia warrants as low as ten shillings per hundred acres.

It is the practice in the Land Office to charge for the excess of land above *ten per cent.* on fifty shilling warrants, at the rate of £10 per hundred acres.

TABLES

Showing the priee of from one aere to five hundred acres of land at the various rates preseribed by the Proprietary and by the Commonwealth.

Warrants at £15 10s. per cent., two per cent. interest.

FORMS.

FORM No. 90.

Application for Unimproved Land.

. . . . . of the . . . . . of . . . . . ,
in the county of . . . . . appl . . for . . . . . .
acres of land, situated in the township of . . . . . and
county of . . . . . adjoining lands of . . . . . .
. . . . . on the east,
. . . . . on the south,
. . . . . on the west, and
. . . . . on the north.

To the Secretary of Internal Affairs of the Commonwealth of Pennsylvania. } [Applicant sign.]

. . . . . *County ss:*

Before me, the subscriber, a justice of the peace, in and for the township of . . . . . and county aforesaid, personally came . . . . . a disinterested witness, who being duly sworn according to law, did depose and say, that to his certain knowledge the land described in the above application is unimproved.

Sworn and subscribed before me, this . . . . day of . . . . . 188 . . . . . *J. P.* } [Witness sign.]

. . . . . *County ss:*

Before me, the subscriber, a justice of the peace, in and for the township of . . . . . , and county aforesaid, personally came . . . . . the above-named applicant, who being duly sworn according to law, did depose and say, that he verily believe that no warrant or other office right has previously issued for the land above described, either in h own name or in the name or names of any person or persons under whom he claim the same.

Sworn and subscribed before me, this . . day of . . . . . 188 . . . . . , *J. P.* } [Applicant sign.]

NOTE.—If there be no justice of the peace in the township in which the land is situated, the affidavits may be made before a justice of the peace of an adjoining township, in which case the justice should certify to the fact.

After the application has been duly prepared, it should be forwarded to the Secretary of Internal Affairs, together with the proper amount of purchase money and warrant fee. The applicant must then give at least thirty days' notice of the filing of the application with the Secretary of Internal Affairs, with a full description of the land as set forth in the application, by publication once a week, for three successive weeks, in one or more newspapers of the county in which the land is situated and nearest its location; and furnish proof that such notice has been given before a warrant can be issued.

Form No. 91.

Application for Improved Land.

[*When date of Improvement CAN be fixed.*]

. . . . . of the . . . . . of . . . . . in the county of . . . . . appl . . . for . . . . . acres of land, situated in the township of . . . . . and county of . . . . . adjoining lands of . . . . . on the east, ... on the south, ... on the west, and . . . . . on the north.

To the Secretary of Internal Affairs of the Commonwealth of Pennsylvania. } [Applicant sign.]

. . . . . *County ss:*

Before me, the subscriber, a justice of the peace, in and for the township of . . . . . , and county aforesaid, personally came . . . . . a disinterested witness, who being sworn according to law, did depose and say, that to his certain knowledge, the land above described has been improved, and that it was first improved . . . . . A. D. . . . . , and not before; that the improvements thereon, in the main, consist of, [*describe the improvements,*] and that [*here state whether there is any one now settled and residing on the land.*]

Sworn and subscribed before me, this . . . day of . . . . . 188 . . . . . *J. P.* } [Witness sign.]

. . . . . *County ss:*

Before me, the subscriber, a justice of the peace, in and for the township of . . . . . , and county aforesaid, personally came . . . . . , the above-named applicant , who being duly sworn according to law, did depose and say, that he verily believe that no warrant or other office right has been issued for the land above described either in h own name , or in the name or names of any other person or persons, under whom he claim the same, and that he has an equitable right to the land, and the improvements thereon, by [*here give the nature of the right, whether by improvement, purchase, &c.*]

Sworn and subscribed before me, this . . day of . . . . . , 188 . . . . . *J. P.* } [Applicant sign.]

FORM No. 92.

Application for Improved Land.

[*When date of Improvement CANNOT be fixed..*]

. . . . . of the . . . . . of . . . . . in the county of . . . . . appl . . for . . . . . acres of land, situated in the township of . . . . . and county of . . . . . adjoining lands of . . . . . on the east, ... on the south, ... on the west, and . . . . . on the north.

To the Secretary of Internal Affairs of the Commonwealth of Pennsylvania. [Applicant sign.]

. . . . . *County, ss :*

Before me, the subscriber, a justice of the peace, in and for the township of . . . . . and county aforesaid, personally came . . . . . the above-named applicant, who being duly sworn according to law, did depose and say, that he ha made diligent search and inquiry, and cannot find any person by whom he can prove the time at which the land described in the above application was first improved, and further, that he verily believe that no warrant or other office right has been issued for said land either in own name , or in the name or names of any other person or persons under whom he claim the same.

FORM No. 94.

Proof of Notice by Publication of Application for Warrant to Survey Vacant Land

. . . . . *County, ss :*

Before me, a justice of the peace, in and for the said county, personally appeared . . . . . , who, being duly sworn according to law, says that the notice appended, to wit: . . . . . was advertised once a week for three consecutive weeks in the . . . . . published at . . . . . , and that the said

. . . . . is a newspaper of the county in which the land applied for is situated and nearest its location, and that the notice first appeared in the issue of said paper on the . . . . day of . . .

. . . . . .

Sworn and subscribed before me this . . . day of . . . . . 188 . . . . . *J. P.* [Witness sign.]

NOTE.—Extract of act of 14th April, 1874, relative to the issuing of Warrants to Survey Vacant Land.

Section 3. The applicant or applicants for a warrant to survey vacant land shall, after filing his or their application for such warrant, and depositing the amount of the purchase money and fee with the [Secretary of Internal Affairs], give at least thirty days' notice of the filing of said application, with a full description of the land as set forth in the application by publication once a week for three successive weeks, in one or more newspapers of the county in which the land is situate, and nearest its location, and shall furnish proof that such notice has been given before a warrant shall issue.

Form No. 95.

Application for Patent when the Present Owner CAN give a complete statement of the Title from the Warrantee or other Person who took out the Office Right.

I, ... of . . . . . in the county of . . . . . the present owner of . . . . . acres and . . . . . perches, and allowance of land, now situated in the township of . . . . . and county of . . . . . surveyed on a warrant to . . . . . dated the . . . . . day of . . . . . herewith forward the amount of purchase money, interest and fees due the Commonwealth, and request that a patent shall be issued in name for the said tract.

STATEMENT OF TITLE.

. . . . . .

. . . . . .

To the Secretary of Internal Affairs of the Commonwealth of Pennsylvania.

. . . . . *County, ss :*

Before me, the subscriber, a justice of the peace in an for said county, personally came . . . . . the above-named applicant , who, being duly sworn according to law, did depose and say, that to the best of . . . knowledge and belief, the facts set forth in the foregoing application are true ; and further, that he do not know of any

other person or persons claiming title to the above-described land, under the aforesaid warrantee.

Sworn and subscribed before me, this . . day of . . . . . } . . . . . .
. . . . . J. P.

. . . . . County, ss:

Before me, the subscriber, a justice of the peace, in and for said county, personally came . . . . . , a reputable citizen of the township and county in which the land is situated, for which a patent is asked in the foregoing application, who being duly sworn according to law, did depose and say, that, to the best of his knowledge and belief, the aforesaid applicant , and those under whom he claim title, have held the above described tract of land by peaceable possession, and the exercise of ownership, for more than twenty-one years last past.

Sworn and subscribed before me, this . . day of . . . . . } . . . . . .
. . . . . J. P.

NOTE.—Where there is more than one owner of the tract, or when the application is for part only, of the original tract, the form can be varied to suit the requirements of the case.

FORM No. 96.

Application for Patent when the Present Owner CANNOT give a complete statement of the Title of the Warantee, or other Person who took out the Office Right.

I, ... , of . . . . . in the county of . . . . . , the present owner of . . . . . acres and . . . . . perches, and allowance of land now situated in the towhship of . . . . . and county of . . . . . surveyed on a warrant to . . . . . dated the . . . . . day of . . . . . herewith forward the amount of purchase money, interest and fees due the Commonwealth, and request that a patent shall be issued in name for the said tract. And further represent, that owing to the length of of time which has elapsed since the warrant was taken out, and the great number of conveyances and assurances in law vesting the title to the same unable to give a connected statement of them.

To the Secretaiy of Internal Affairs of the Commonwealth of Pennsylvania. } . . . . . .

. . . . . *County, ss:*

Before me, the subscriber, a justice of the peace, in and for said county, personally came . . . . . the above-named

applicant , who being duly sworn acording to law, did depose and say, that to the best of knowledge and belief, the facts set forth in the foregoing application are true; and further, that he do not know of any other person or persons claiming title to the above-described land, under the aforesaid warantee.

Sworn and subscribed before me, this . . day of . . . . . , *J. P.* } . . . . . .

. . . . . *County, ss:*

Before me, the subscriber, a justice of the peace, in and for said county, personally come . . . . . , a reputable citizen of the township and county in which the land is situated, for which a patent is asked in the foregoing application, who, being duly sworn according to law, did depose and say, that to the best of his knowledge and belief, the aforesaid applicant , and those under whom he claim title, have held the above-described tract of land by peaceable possession, and the exercise of ownership, for more than twenty-one years last past.

Sworn and subscribed before me, this . . day of . . . . . , *J. P.* } . . . . . .

Form A.

For Return of an Original Survey.

A draft of a tract of land situated in the township of . . . . . , and county of . . . . , containing . . . acres . . . perches and allowance of six per cent. for roads, &c. Surveyed the . . . day of . . . 188 , in pursuance of a warrant granted to . . . . . , dated the . . day of . . . . . , 18

. . . . . , *C. S.*

To . . . . . , *Secretary Internal Affairs.*

Form B.

For Return of a Tract Surveyed by a Former Deputy or County Surveyor.

A draft of a tract of land situated in the township of . . . . , and county of . . . . , containing . . . acres . . perches and allowance of six per cent. for roads, &c.

Surveyed . . . day of . . . . . , 188 , in pursuance of a warrant granted to . . . . dated the . . . day of . . . . . .

I hereby certify that the foregoing is a correct copy of a survey filed amongst the records of the county surveyor's office of this county, and that it has been examined by me and found correct.

. . . . . , *C. S.*

To . . . . . , *Secretary of Internal Affairs.*

THE METRIC SYSTEM.

[The use of this system of weights and measures was authorized by an act of Congress, approved the 28th day of July, 1866.]

Measures of Length.

Metric Denominations and Values.		Equivalents in Denominations in use.
Myriameter,	10,000 meters,	6.2137 miles.
Kilometer,	1,000 meters,	0.62137 mile or 3.280 ft. 10 in.
Hectometer,	100 meters,	328. feet 1 inch.
Dekameter,	10 meters,	393.7 inches.
Meter,	1 meter,	39.37 inches.
Decimeter,	1-10 of a meter,	3.937 inches.
Centimeter,	1-100 of a meter,	0.3937 inch.
Millimeter,	1-1000 of a meter,	0.0394 inch.

Measures of Surface.

Metric Denominations and Values.		Equivalents in Denominations in use.
Hectare,	10,000 square meters,	2.471 acres.
Are,	100 square meters,	119.6 square yards.
Centare,	1 square meter,	1550. square inches.

Measures of Capacity.

Metric Denominations and Values.			Equivalents in Denominations in use.	
Names.	No. of liters.	Cubic Measure.	Dry measure.	Liquid or wine measure.
Kiloliter or stere,	1,000	1 cubic meter,	1.308 cubic yds.,	264.17 galls.
Hectoliter,	100	1-10 of a cubic meter,	2 bu. & 3.35 pks.,	26.417 galls.
Dekaliter,	10	10 cubic decimeters,	9.08 quarts,	2.6417 galls.
Liter,	1	1 cubic decimeter,	0.908 quart,	1.0567 quarts.
Decileter,	1-10	1-10 of a cubic decimeter,	6.1022 cubic in.,	0.845 gill.
Centileter,	1-100	10 cubic centimeters,	0.6102 cubic in.,	0.388 fluid oz.
Milliliter,	1-1000	1 cubic centimeter,	0.061 cubic in.,	0.27 fluid dr.

Weights.

Metric Denominations and Values.			Equivalents in Denominations in use.
Names.	Number of grains.	Weight of what quantity of water at maximum density.	Avoirdupois weight.
Miller or Tonneau,	1,000,000	1 cubic meter,	2204.6 pounds.
Quintal,	100,000	1 hectoliter,	220.46 pounds.
Myriagram,	10,000	10 liters,	22.046 pounds.
Kilogram or Kilo,	1,000	1 liter,	2.2046 pounds.
Hectogram,	100	1 decaliter,	3.5274 ounces.
Dekagram,	10	10 cubic centimeters,	0.3527 ounce.
Gram,	1	1 cubic centimeter,	15.432 grains.
Decigram,	1-10	1-10 of a cubic centimeter,	1.5432 grains.
Centigram,	1-100	10 cubic millimeters,	0.1543 grain.
Milligram,	1-1000	1 cubic millimeter,	0.0154 grain.

The office of Surveyor General ceased under the provisions of the Constitution of 1873, on the first Tuesday of May, 1875, and the duties devolved upon the Secretary of Internal Affairs.

Secretaries of Internal Affairs.

William McCandless,	commissioned	May 4, 1875.
Aaron K. Dunkle,	do.	May 6, 1879.
J. Simpson Africa,	do.	May 1, 1883.
Thomas J. Stewart,	do.	May 3, 1887.

Deputy Secretaries of Internal Affairs.

J. Simpson Africa,	commissioned	May 4, 1875.
Lucius Rogers,	do.	June 1, 1879.
J. Wilson Greenland,	do.	May 1, 1883.
Isaac B. Brown,	do.	May 3, 1887.

Names and Dates of the Erection of the Several Counties of the Commonwealth of Pennsylvania, and the Territory from which they were Formed.

The first three counties that were formed, to wit: Philadelphia, Bucks, and Chester, were established at the first settlement of the Province of Pennsylvania.

1. Adams, January 22, 1800, formed of a part of York.
2. Allegheny, September 24, 1788, formed of parts of Westmoreland and Washington.
3. Armstrong, March 12, 1800, formed of parts of Allegheny, Westmoreland and Lycoming.
4. Beaver, March 12, 1800, formed of parts of Allegheny and Washington.
5. Bedford, March 9, 1771, formed of a part of Cumberland.
6. Berks, March 11, 1752, formed of parts of Philadelphia, Chester and Lancaster.
7. Blair, February 26, 1846, formed of parts of Huntingdon and Bedford.
8. Bradford,* February 21, 1810, formed of parts of Luzerne and Lycoming.
9. Bucks, one of the three original counties of the Province, 1682.
10. Butler, March 12, 1800, formed of a part of Allegheny.
11. Cambria, March 26, 1804, formed of parts of Huntingdon, Somerset and Bedford.
12. Cameron, March 29, 1860, formed of parts of Clinton, Elk, McKean and Potter.
13. Carbon, March 13, 1843, formed of parts of Northampton and Monroe.
14. Centre, February 13, 1800, formed of parts of Mifflin, Northumberland Lycoming, and Huntingdon.
15. Chester, one of the three original counties of the Province, 1682.
16. Clarion, March 11, 1839, formed of parts of Venango and Armstrong.

*Previous to March 24, 1812, this county was called Ontario, but its name was changed to Bradford on that day.

17. Clearfield, March 26, 1804, formed of parts of Northumberland, Huntingdon and Lycoming.
18. Clinton, June 21, 1839, formed of parts of Lycoming and Centre.
19. Columbia, March 22, 1813, formed of a part of Northumberland.
20. Crawford, March 12, 1800, formed of a part of Allegheny.
21. Cumberland, January 27, 1750, formed of a part of Lancaster.
22. Dauphin, March 4, 1785, formed of a part of Lancaster.
23. Delaware, September 26, 1789, formed of a part of Chester.
24. Elk, April 18, 1843, formed of parts of Jefferson, Clearfield and McKean.
25. Erie, March 12, 1800, formed of a part of Allegheny.
26. Fayette, September 26, 1783, formed of a part of Westmoreland.
27. Forest, April 11, 1848, formed of parts of Jefferson and Venango.*
28. Franklin, September 9, 1784, formed of a part of Cumberland.
29. Fulton, April 19, 1850, formed of a part of Bedford.
30. Greene, February 9, 1796, formed of a part of Washington.
31. Huntingdon, September 20, 1787, formed of a part of Bedford.
32. Indiana, March 30, 1803, formed of parts of Westmoreland and Lycoming.
33. Jefferson, March 26, 1804, formed of a part of Lycoming.
34. Juniata, March 2, 1831, formed of a part of Mifflin.
35. Lackawanna, August 21, 1878, formed of a part of Luzerne.
36. Lancaster, May 10, 1729, formed of a part of Chester.
37. Lawrence, March 20, 1849, formed of parts of Beaver and Mercer.
38. Lebanon, February 13, 1818, formed of parts of Dauphin and Lancaster.
39. Lehigh, March 6, 1812, formed of a part of Northampton.
40. Luzerne, September 25, 1786, formed of a part of Northumberland.
41. Lycoming, April 13, 1795, formed of a part of Northumberland.
42. McKean, March 26, 1804, formed of a part of Lycoming.
43. Mercer, March 12, 1800, formed of a part of Allegheny.
44. Mifflin, September 19, 1789, formed of parts of Cumberland and Northumberland.
45. Monroe, April 1, 1836, formed of parts of Northampton and Pike.
46. Montgomery, September 10, 1784, formed of a part of Philadelphia.
47. Montour, May 3, 1850, formed of a part of Columbia.
48. Northampton, March 11, 1752, formed of a part of Bucks.
49. Northumberland, March 21, 1772, formed of parts of Lancaster, Cumberland, Berks, Bedford and Northampton.
50. Perry, March 22, 1820, formed of a part of Cumberland.
51. Philadelphia, one of the three original counties of the Province, 1682.
52. Pike, March 26, 1814, formed of a part of Wayne.
53. Potter, March 26, 1804, formed of a part of Lycoming.

---

*Part of Venango added by act approved October 31, 1866,

54. Schuylkill, March 1, 1811, formed of parts of Berks and Northampton.
55. Snyder, March 2, 1855, formed of a part of Union.
56. Somerset, April 17, 1795, formed of a part of Bedford.
57. Sullivan, March 15, 1847, formed of a part of Lycoming.
58. Susquehanna, February 21, 1810, formed of a part of Luzerne.
59. Tioga, March 26, 1804, formed of a part of Lycoming.
60. Union, March 22, 1813, formed of a part of Northumberland.
61. Venango, March 12, 1800, formed of parts of Allegheny and Lycoming.
62. Warren, March 12, 1800, formed of parts of Allegheny and Lycoming.
63. Wayne, March 21, 1798, formed of a part of Northampton.
64. Washington, March 28, 1781, formed of a part of Westmoreland.
65. Westmoreland, February 26, 1773, formed of a part of Bedford, and in 1785 part of the purchase of 1784 was added thereto
66. Wyoming, April 4, 1842, formed of a part of Luzerne.
67. York, August 19, 1749, formed of a part of Lancaster.

A TABULAR STATEMENT

Of the population, square miles, and number of acres in the several counties of the Commonwealth of Pennsylvania, with the names of the county towns

NAMES.	Population 1870.	Population 1880.	Square miles.	Acres.	County towns.
Adams,	30,315	32,455	531	339,840	Gettysburg.
Allegheny,	262,204	355,869	757	480,480	Pittsburgh.
Armstrong,	43,382	47,641	612	391,280	Kittanning.
Beaver,	36,148	39,605	452	289,280	Beaver.
Bedford,	29,635	34,929	1,003	641,920	Bedford.
Berks,	106,701	122,597	900	576,000	Reading.
Blair,	38,051	52,740	510	326,400	Hollidaysburg.
Bradford,	53,204	58,541	1,162	743,680	Towanda.
Bucks,	64,336	68,656	595	380,800	Doylestown.
Butler,	36,510	52,536	814	520,960	Butler.
Cambria,	36,569	46,811	666	426,240	Ebensburg.
Cameron,	4,273	5,159	381	243,840	Emporium.
Carbon,	28,144	31,923	402	257,280	Maueh Chunk.
Centre,	34,418	37,922	1,227	785,280	Bellefonte.
Chester,	77,805	83,481	763	488,320	West Chester.
Clarion,	26,537	40,328	572	366,080	Clarion.
Clearfield,	25,741	43,408	1,130	723,200	Clearfield.
Clinton,	23,211	26,278	857	548,480	Lock Haven.
Columbia,	28,766	32,409	479	306,560	Bloomsburg.
Crawford,	63,832	68,607	1,005	643,200	Meadville.
Cumberland,	43,912	45,977	554	354,560	Carlisle.
Dauphin,	60,740	76,148	523	334,720	Harrisburg.
Delaware,	39,403	56,101	195	124,800	Media.
Elk,	8,488	12,800	774	495,360	Ridgway.
Erie,	65,973	74,688	772	494,080	Erie.
Fayette,	43,284	58,842	830	531,200	Uniontown.
Forest,	4,010	4,385	431	275,840	Tionesta.
Franklin,	45,365	49,855	756	483,840	Chambersburg.
Fulton,	9,360	10,149	442	282,880	McConnellsburg.
Greene,	25,887	28,273	620	396,800	Waynesburg.
Huntingdon,	31,251	33,954	899	575,360	Huntingdon.
Indiana,	36,138	40,527	828	529,920	Indiana.
Jefferson,	21,656	27,935	646	413,440	Brookville.
Juniata,	17,390	18,227	407	260,480	Mifflintown.

Tioga,	35,097	45,814	1,124	719,360	Wellsboro'.
Carried forward,	3,203,455	3,926,925	39,193	25,056,932	

TABULAR STATEMENT—Continued.

Names.	Population 1870.	Population 1880.	Square miles.	Acres.	County towns.
Brought forward,	3,203,455	3,926,925	39,193	25,056,932	
Union,	15,565	16,905	315	201,600	Lewisburg.
Venango,	47,925	43,370	658	421,120	Franklin.
Warren,	23,897	27,981	914	584,960	Warren.
Washington,	48,483	55,418	889	568,960	Washington.
Wayne,	33,188	33,513	747	478,080	Honesdale.
Westmoreland,	58,719	78,036	1,046	669,440	Greensburg.
Wyoming,	14,585	15,598	403	237,920	Tunkhannock.
York,	76,134	87,841	921	589,440	York.
Total,	3,521,951	4,282,891	45,086	28,808,442	

Note.—The enumeration of 1880 is classified as follows, viz: Males, 2,136,655; females, 2,146,236; native, 3,695,062; foreign, 587,829; white, 4,197,016; colored, 85,535; Chinese, 156; Indians, 184—total, 4,282,891.

☞Pennsylvania is situated between 39 deg. 43 min. and 42 sec. north latitude, and 2 deg. 17 min. east, and 3 deg. 31 min. west longitude, from Washington. Its mean length is 280.39 miles; mean breadth, 158.05 miles; its greatest length, $302\frac{13}{40}$ miles, and greatest breadth 175 miles and 192 perches.

The latitude of Greenwich is 51 deg. 28 min. 39 sec. north, and the latitude of Washington 38 deg. 53.3 min. The longitude of Philadelphia from Greenwich is 75 deg. 18 min. west, and the longitude of Greenwich from Washington is 77 deg. 00.6 min. east.

The above statement has been taken and calculated from the best charts and tables known and accessible to this Department.

The latitude of the capitol at Harrisburg, as ascertained by recent observations made by the United States Coast Survey, is 40 deg. 15 min. 51 sec.; longitude, 40.3 seconds of time east of Washington, and 5 h. 7 min. 31.8 sec. west of Greenwich.

LIST OF COUNTY SURVEYORS

Whose election or appointment for the term ending the first Monday of January, 1890, has been officially reported to this Department.

COUNTIES.	NAMES OF SURVEYORS.	POST-OFFICE.
Adams,	John G. Brinkerhoff,	Hunterstown.
Allegheny,	Charles Davis,*	Pittsburgh.
Armstrong,	S. B. Gray.†	
Beaver,	James Harper,	Beaver.

Wyoming,	Harry J. Frear,	Factoryville.
York,	Charles H. Fry,†	York.

Note.—A certified copy of the oath of office taken and subscribed by each county surveyor must be filed in this Department. The act of the 9th of April, 1850, [P. L., 434,] required the oath to be administered in the court of quarter sessions of the proper county. The Constitution [Article VII, section 1,] provides that the oath shall be administered by some person authorized to administer oaths, and be filed in the office of the prothonotary.

Those marked with an asterisk (*) hold over under the act of April 17, 1869, this Department not having been advised that successors have been elected or appointed and qualified.

† No oath filed.

‡ No election held.

PART II.--ASSESSMENTS.

ADAMS COUNTY.

Tabular Statement showing the number of taxables, the number of acres of cleared and timber land, and the amount at which all the real and personal property, and all matter and things made taxable by the laws of this Commonwealth were valued, and the amount of taxes assessed thereon for State and county purposes, in the several assessment districts in the county of Adams, made pursuant to the several acts of Assembly relating thereto.

NAMES OF ASSESSMENT DISTRICTS.	Number of taxables.	Cleared land—Acres.	Timber land—Acres.	Value of all real estate.	Value of real estate exempt from taxation.	Value of real estate taxable. * The returns of our assessors as to number of acres of forest and improved lands are very imperfect and cannot be relied upon. In our report for 1886, we estimated the number of acres of forest at 426,240, and the number of acres of improvement at 47,360. It is estimated by those qualified to judge that our several tanneries and lumber establishments have consumed in the past year the timber on 20,000 acres in this county, without adding anything to the number of acres of improvement.

PART I.—LAND OFFICE.
STATE WEATHER SERVICE.
VITAL STATISTICS.

A.

A.—Page.

AGENTS FOR THE PENNS, list of, . . . 187
Application for patents, forms for, . . . 177–179
warrants, forms for, . . . 176–177
Assessments, bureau of—
what it contains, . . . 141
its work, . . . 141
act of 1883, . . . 141
difficulties, . . . 141
remedy, . . . 142
carelessness on the part of assessors, . . . 143
opinion of Attorney General W. S. Kirkpatrick, . . . 144
work for the next Legislature, . . . 144–145

B.

BOARD OF PROPERTY—
its powers, . . . 145
of whom composed, . . . 147
rules governing . . . 147–148
fees, . . . 148
where addressed, . . . 148
Bureaus, classification of, . . . 3
Business transacted in Department of Internal Affairs, resumé of, . . . 8–9

C.

CAVEATS, proceedings on, . . . 147
Commonwealth, titles to land vested, . . . 11
Communication to the Governor, . . . 1
Counties, names and dates of erection, . . . 189–191
tabular statement of area, population, &c., . . . 192–193
County surveyors—
list of, . . . 194–195
instructions to, . . . 153–156
duties, . . . 156–157
term of office, . . . 157
where office must be located, . . . 157
how long held, . . . 157
fee act of 1859, . . . 157–158
excess, act relative to returns, . . . 158
necessity of forwarding certified copy of oath, . . . 195

D.

A.—Page.
DEPUTY SECRETARY OF INTERNAL AFFAIRS, ... 189
Drafts—
misapprehension as to connected, ... 151
lands first sold then surveyed, ... 151
remarks, ... 151–152
